Memo

To: Users of Hospital Summary Report for 2008
From: Pam Gilchrist, Manager
Health Facilities
Date: August 31, 2009
Re: Hospital Data for 2008

Enclosed are the summary reports of hospital data for 2008. The data contained in the reports were obtained from the 2008 **Joint Annual Report of Hospitals** (JAR-H). 170 of the 171 hospitals that were licensed in Tennessee in 2008 completed and returned Joint Annual Reports with a full year of data and one reported on a partial year which will be excluded on the summary reports.

Attachments include a brief narrative description of each report, a comprehensive glossary of terms used in these reports, changes in existing hospitals, and a listing of the hospitals. The glossary should be helpful in understanding the data presented. If any definition is not clear, please contact us. We want to make the data both understandable and useful.

Not all of the data reported on the 2008 JAR-H are included in these summary reports. If a data item of interest is not in the enclosed printout, please contact our office for access to the individual hospitals' full joint annual reports.

The primary geographic categories used in the printout are Total State, Health Department Regions (HDR), and county within Health Department Region. There are 14 HDRs in Tennessee. Attachment C lists the counties in each HDR, and the Hospital Identification Sheet (Attachment E) lists the HDR code for each facility and county.

While an extensive effort has been made to insure that the data reported on the Joint Annual Reports and the resultant reports are complete and accurate, please consider the limitations of the data. We subject each JAR-H to standard editing procedures. Detected errors are corrected with information supplied by the hospital; nevertheless, other, less apparent errors may go undetected. If you find inaccurate or questionable data when using these reports, please alert this office so appropriate steps can be taken.

The hospitals are categorized according to three general types of facilities, which are defined in the glossary in Attachment B.

1. General hospitals, specialty hospitals, and medical centers.
2. Mental health institutes and mental health centers.
3. Other long-term care hospitals such as research facilities and rehabilitation hospitals.

The following caveats should be noted when interpreting these reports:

- A. All data are omitted on hospitals that were open and reported for a time period of less than one year. (This was not applicable for 2008)
- B. Some facilities are able to provide totals only, with no detailed breakdowns.
- C. Financial Data:
 - 1. Although the instructions dictate that all questions on finance be completed using the same accounting method required by the Centers for Medicare and Medicaid Services (CMS) described in the Provider Reimbursement Manual Part 1, accounting systems differ among hospitals so that data may not be strictly comparable.
 - 2. Data are included in total calculations for only those facilities reporting complete data.
- D. Utilization Data: Totals for the computed variables are based only on hospitals reporting all necessary components for the computations.
- E. Patient Origin Data: Hospitals generally report either admissions or discharges excluding newborns. For several hospitals, the number of patients by residence included in Report 4 does not agree with either reported admissions or reported discharges in Reports 1 and 3.
- F. Reporting Period: All hospitals report data based on their fiscal year. Fiscal years of hospitals end May 31st, June 30th, September 30th or December 31st.

Additional information regarding individual hospital reports may be obtained by contacting our staff at the address and telephone number provided above.

Attachment A: Description of Reports

Attachment B: Glossary

Attachment C: Tennessee Health Department Regions with Counties

Attachment D: Hospitals Opened, Closed and Name Changes

Attachment E: Hospital Identification Sheet

Attachment F: Summary Reports of Hospital Data for 2008

xc: Teresa Hendricks, Acting Director
Division of Health Statistics

DESCRIPTION OF REPORTS**REPORT 1
HOSPITALS LICENSED IN TENNESSEE,
BY REPORTING STATUS, SERVICE CATEGORY AND OWNERSHIP**

This report provides a summary of the hospitals that were licensed in Tennessee for the year 2008 providing summary statistics by reporting status, service category and ownership types.

**REPORT 1A
NON-REPORTING AND PARTIAL REPORTING FACILITIES**

This report provides the list of facilities that were licensed in Tennessee for the year 2008, but (1) did not report any data, or (2) did not report data for a full year. It also explains that these facilities are not included in the reports or calculations of aggregates and averages.

**REPORT 1B
ADDRESSES AND PHONE NUMBERS**

This report provides a list of hospitals that were licensed in Tennessee for the year 2008 and provides each facility's address and telephone number.

**REPORT 2
SELECTED UTILIZATION
BY HOSPITAL TYPE AND DEPARTMENT OF HEALTH REGIONS**

The data presented in the report are categorized according to the three general types of facilities: General/Specialty, Mental Health and Other Long Term. Totals are presented for the State and for the Health Department Regions. The data in the report are submitted by the hospitals except for the following items that were calculated by the Division of Health Statistics staff: Staffed Bed Days Open, Staffed Bed Percent Occupancy, Licensed Bed Days Open, Licensed Beds Percent Occupancy, Average Length of Stay, and Average Daily Census. The glossary provides the formulae used to calculate these values. The values for computed variables are calculated only for those hospitals that report all of the components necessary for computation. The values for staffed and licensed occupancy rates in hospitals and for average daily census for mental health institutes and centers were not calculated when admissions/discharges and inpatient days were not supplied.

**REPORT 2A
SELECTED UTILIZATION DATA BY TYPE OF HOSPITAL**

The data presented in the report are categorized according to the three general types of facilities and are arranged by facility within county, within Health Department Region, and within the State as a whole. The data in the report are submitted by the hospitals except for the following items that were calculated by the Division of Health Statistics staff: Staffed Bed Days Open, Staffed Bed Percent Occupancy, Licensed Bed Days Open, Licensed Beds Percent Occupancy, Average Length of Stay, and Average Daily Census. The glossary provides the formulae used to calculate these values. The values for computed variables are calculated only for those hospitals that report all of the components necessary for computation. The values for staffed and licensed occupancy rates in hospitals and for average daily census for mental health institutes and centers were not calculated when admissions/discharges and patient days were not supplied.

**REPORT 3
PERCENT DISTRIBUTION OF DISCHARGES AND DISCHARGE PATIENT DAYS
ACCORDING TO AGE OF PATIENT AT DISCHARGE,
BY TYPE AND HEALTH DEPARTMENT REGION**

This report provides the age distribution of patients discharged from hospitals in the State. The proportion that each of the three broad age groups contribute to the total discharges and total discharge patient days according to type of facility is presented first for the State and for each Health Department Region. Wherever discharges and discharge patient days were not given, admissions and inpatient days have been used.

DESCRIPTION OF REPORTS

REPORT 3A
 ADMISSIONS/DISCHARGES AND INPATIENT/DISCHARGE PATIENT DAYS
 ACCORDING TO AGE OF PATIENT

This report presents the numbers of patients discharged and discharge patient days in three broad age groups for each hospital that reported the age distribution of patients. Wherever discharge and discharge patient days were not given, admissions and inpatient days have been used.

REPORT 4
 SHORT-TERM HOSPITALS LICENSED IN TENNESSEE
 PATIENT ORIGIN DATA - ADMISSIONS OR DISCHARGES
 ACCORDING TO COUNTY OF RESIDENCE BY LOCATION OF FACILITY

By examining this report, it is possible to determine what proportion of residents of each county obtained care in their county (if the county had a hospital), in surrounding counties, and in other counties in Tennessee. The data presented in the report describe the referral patterns (Patient Origin) for patients served by Tennessee short-term hospitals.

Location of patient residence is defined in terms of Resident County for Tennessee residents or resident state for nonresidents. The unit of measure utilized is patient admission or patient discharge from a hospital. The reporting of this measure, whether admission or discharge, depends on the way each hospital keeps its records.

The data are presented by Resident County (in alphabetical order) of the patient and show the names of the individual hospitals serving these patients. A percent distribution which indicates the percentage of a particular resident county's patients who were served by facilities in each listed county is also included in this report.

Following the data for residents of each county in Tennessee, there is a summary of those from Tennessee whose county is not known. This is followed by a listing by state of patients from states bordering Tennessee and other named states not bordering Tennessee. The last group is a listing of all facilities that reported at least one patient whose residence state is unknown.

Please note that these data reflect only admissions or discharges from Tennessee facilities. The number of Tennessee residents being served by hospitals outside of Tennessee is not available.

REPORT 5
 SELECTED DATA FOR INPATIENT NEWBORN AND MATERNAL SERVICES

This report presents data on the number, type and outcome of deliveries occurring in each general hospital and data on the availability and utilization of selected newborn services. Individual facility data as well as totals for the State and each HDR are provided.

REPORT 6
 SELECTED FINANCIAL DATA

Selected financial data for Tennessee hospitals is presented in this report. All of the data are as they were reported by each individual hospital. A dash in any column of the report denotes that the specified hospital did not report the data in that column.

REPORT 7
 SELECTED FINANCIAL DATA PER ADJUSTED PATIENT DAY

Selected categories of revenue and costs per adjusted patient days of care for Tennessee hospitals are presented in this report. The hospital name, type of ownership, staffed beds, and patient days are as reported by each facility. Calculated columns follow Patient Days. Therefore, the calculated variables begin with the column labeled Adjusted Patient Days and end with the column variable labeled Operating Costs, including and excluding depreciation. A dash in any column indicates that the specified hospital

DESCRIPTION OF REPORTS

did not report the data in that column or did not report the items necessary to complete the calculations of the data in the column.

REPORT 8**ADJUSTMENTS TO GROSS REVENUE BY STATE, REGION AND COUNTY**

This report represents total amounts of adjustments to revenue reported by short-term hospitals for the State, Health Department Region and county. All of the Adjustments to Gross Revenue variables are sums of information reported by the individual hospitals with the exception of the last column. This column presents total adjustments to revenue (government programs, bad debts, etc.) as a percentage of gross charges. The purpose of this column is to provide a measure of the relationship of adjustments to total revenue for all facilities in each listed geographic area. The totals in this report include data from only short-term hospitals.

REPORT 8A**ADJUSTMENTS TO GROSS REVENUE BY REGION AND FACILITY**

Included in this report are the amounts of adjustments of revenue according to type of adjustment for each hospital in the State and by county. All data are as reported by the individual facilities except for the last column which shows a calculation of the percentage of gross charges that total adjustments represented for each facility. A dash in any column of the report denotes that the specified hospital did not report the data in that column.

GLOSSARY

Adjusted patient day - An adjustment of inpatient days to allow production of a measure of gross revenue as a ratio to patient care. Gross patient revenue includes inpatient revenue as well as outpatient and newborn revenue. In order for patient day information to be realistically related to gross revenue, inpatient days are adjusted by applying the ratio of total gross revenue to inpatient revenue to the reported inpatient days. The actual formula used to calculate adjusted patient days is:

$$\left(\frac{\text{Inpatient}}{\text{Days}} \right) \times \frac{\text{Gross Patient Revenue}}{\text{Inpatient Revenue}}$$

where

$$\text{Gross Patient Revenue} = \text{Outpatient Revenue} + \text{Newborn Revenue} + \text{Inpatient Revenue}$$

Adjustments to revenue - Deductions from charges; the difference between the gross charges and the actual amount of payment received by the hospital.

Adjustments, government contractual - The difference between the gross charges for services provided to patients who are enrolled in a government program and the payment received from the respective government program excluding the obligations of the patients for deductibles and coinsurance.

Adjustments, nongovernmental contractual - The amount of discount given to insurance companies and/or employers because of the volume of business and promptness of payment which the provider expects as a result of a contractual agreement.

Admissions - The number of adult and pediatric patients (excluding newborns) admitted to the facility during the reporting period.

Average charge - The mean of the charges for patient days of care, regardless of the degree of patient care rendered. The formula is:

$$\frac{\text{Total Gross Charges}}{\text{Number of Adjusted Patient Days}} = \text{Average Charge}$$

Average daily census - The average number of patients in a facility on any day of the reporting calendar year. Example:

$$\frac{15,610 \text{ Inpatient Days}}{365 \text{ (or 366) Days in a Year}} = \text{An average of 42.8 persons in hospital each day of the year}$$

Average length of stay - The average number of days of service rendered to each inpatient before discharge from an institution during a given period (usually a calendar year). Example:

$$\frac{15,610 \text{ Inpatient Days}}{2,168 \text{ Admissions}} = 7.2 \text{ Days average length of stay}$$

Bad debts - Bad debts represent uncompensated care for which the hospital directly billed the patient and for which the patient should reasonably be expected to pay. A vigorous in-house collection effort until such time as the account can clearly be determined to be bad debt (such as patient cannot be located) or for a period of at least 180 days is assumed. The hospital would declare the account as a bad debt after determining that the patient or the guarantor has income and/or assets which would enable him/her to pay, but the patient or guarantor ignores all collection efforts.

GLOSSARY

Bankrupt accounts would be considered bad debts unless there is documented evidence that the medical bill caused the bankruptcy and then this would be counted as medically indigent.

Bassinet, non-licensed - A non-licensed bassinet or crib is any bassinet or crib for normal, routine newborns born in the hospital and located in the newborn nursery. These bassinets are not available for the admission of an out-born patient and are not included in the licensed bed capacity for the hospital.

Bed days open (staffed or licensed beds) - The number of beds in a facility times the number of days each bed was open for admission. Example:

Hospital X had 50 beds in operation on 12/31/06; 45 beds were in operation from 1/1/06 through 12/31/06, 5 beds were opened 7/1/06.

45 beds x 365 (or 366) days in a year	=	16,425
5 beds x 183 days open during year	=	915
Total	=	17,340

Birth, live - The expulsion or extraction of a live-born infant from the uterus.

Capital assets - Any long-term asset (building, equipment, land, etc.).

Charity - Services provided to medically needy persons for which the hospital usually does not expect payment. These persons have insufficient income and/or assets with which to pay for their care. (Insufficient income is defined as an amount not to exceed 100 percent of the federal poverty guidelines.) They are not eligible for Medicaid or other state or federal programs or benefits of these programs have been exhausted. The patient has no insurance or has a very limited insurance policy.

A patient is considered to be a charity patient if, after meeting with the patient or guarantor and performing a thorough investigation of his/her past payment history, income, assets, and liabilities, it is felt that the patient or guarantor is unable to satisfy part or all of the obligations due to socioeconomic conditions which are not expected to improve in the foreseeable future.

Chronic disease hospital - A facility which provides medical and skilled nursing services to patients with long-term illnesses who are not in an acute phase, but who require an intensity of services not available in nursing homes.

C-section (Cesarean) delivery - The delivery of a fetus through an incision of the abdominal wall and uterine wall.

Depreciation, accumulative - A decrease allowed in computing the value of property for tax purposes summed over the period of years, reflecting the declining value of capital assets (building, equipment, etc.).

Depreciation, annual - A decrease in a calendar year allowed in computing the value of property for tax purposes, reflecting the declining value of capital assets (building, equipment, etc.).

Discharges - The number of adult and pediatric discharges (excluding newborns) plus all deaths.

Discharge patient days - The total number of patient days of care rendered to patients discharged during the reporting period, excluding newborns, but including neonates, patients in swing beds, and deaths. This figure should include days of care rendered to those patients prior to the beginning of the reporting period.

GLOSSARY

Expenses - Expired costs for goods and services that have been used or consumed in carrying on some activity during the reporting period and from which no benefit will extend beyond the present.

Fetal death (reportable) - A fetal death of 500 grams or more or in the absence of weight, of 22 completed weeks of gestation or more. Induced abortions are excluded from the fetal death count.

General hospital - A facility which provides diagnostic and therapeutic services to patients for a variety of medical conditions, both surgical and non-surgical.

Gross charges - The hospital's full established rate for all hospital services rendered to patients.

Infant death - The death of a live-born infant under one year of age.

Inpatient days - The number of adult and pediatric days of care rendered during the entire reporting period. An inpatient day of care (also commonly referred to as a patient day or a census day) is a period of service between the census-taking hours on two successive calendar days, the day of discharge being counted only when the patient was admitted the same day.

Licensed beds - The maximum number of beds authorized by the appropriate state licensing (certifying) agency or regulated by a federal agency.

Licensed beds percent occupancy - See percent occupancy.

Long-term hospital - A facility which renders care to patients suffering from diseases or conditions which exist over an extended period of time, such as tuberculosis.

Maternal death - A death of a woman due to complications of pregnancy, childbirth, and the puerperium.

Medicaid (Title XIX) - A federally-aided, state-operated and administered program which provides medical benefits for certain low income persons in need of health and medical care. The program, authorized by Title XIX of the Social Security Act, is basically for the poor. Persons who are members of one of the categories of people who can be covered under the welfare case payment programs: the aged, blind, disabled, or members of families with dependent children where one parent is absent, incapacitated or unemployed. Medicaid coverage is also provided in Tennessee for certain groups of medically needy persons who are not categorically eligible. Subject to broad federal guidelines, states determine the benefits covered, program eligibility, rates of payment for providers, and methods of administering the program.

Medically indigent - Medical indigency is a status reached when a person uses or commits all available current and expected resources to pay for medical care to the maximum extent practical for a reasonable period and not all charges can be paid. A person who can afford the basics of life, i.e., food, shelter, and clothing, but who has insufficient income and/or assets to pay incurred hospital and medical bills is medically indigent. Prior to classifying deductions from charges as either "low income medically indigent" or "other medically indigent," reasonable collection efforts that are at least as great as the Medicare standard for collection of deductibles or coinsurance from Medicare patients must be completed. The portion of the bill that remains unpaid should then be classified as a medically indigent deduction.

Medically indigent, low income - A patient should be classified as low income medically indigent after the hospital has made a reasonable determination that the patient cannot pay all or part of the hospital bill and that the patient's income is greater than 100 percent but does not exceed 150 percent of the published federal poverty level that is in effect during the reporting period for the appropriate family size. The patient is not eligible for medical benefits from state or federal programs or benefits from these programs have been exhausted. The patient has no insurance or a limited insurance policy.

GLOSSARY

Medically indigent, other - A patient should be classified as other medically indigent after the hospital has made a reasonable determination that the patient cannot pay all or part of the hospital bill and that the patient does not satisfy the income requirement for low income medically indigent. The patient is not eligible for medical benefits from state or federal programs. The patient has no or inadequate health insurance. Bankrupt accounts for which there is evidence that the medical bill caused the bankruptcy and unpaid accounts due to catastrophic illnesses which result in medical bills that are in excess of an amount that a patient could ever reasonably be expected to pay are examples of other medically indigent.

Medicare (Title XVIII) - A nationwide health insurance program for people aged 65 years and over, for persons eligible for social security payments for over two years, and for certain workers and their dependents who need kidney transplantation or dialysis. Health insurance protection is available to insured persons without regard to income. Medicare has four parts. Hospital insurance (Part A) that helps pay for inpatient care in a hospital or skilled nursing facility (following a hospital stay), some home health care and hospice care. Medical insurance (Part B) that helps pay for doctors' services and many other medical services and supplies that are not covered by hospital insurance. Medicare Advantage (Part C) formerly known as Medicare + Choice plans are available in many areas. People with Medicare Parts A and B can choose to receive all of their health care services through one of these provider organizations under Part C. Prescription drug coverage (Part D) that helps pay for medications doctors prescribe for treatment.

Mental health hospital - See psychiatric hospital.

Net patient revenue - Total gross patient charges minus adjustments to charges.

Newborn patient days - The patient days of care received by infants delivered in a facility.

Operating costs - The monetary expense related to running a facility.

Operating costs excluding depreciation - The monetary expense related to running a facility which does not include the decrease allowed in computing the value of the facility's property for tax purposes.

Operating costs including depreciation - The monetary expense related to running a facility including the decrease allowed in computing the value of the facility's property for tax purposes.

Pediatric hospital - A facility which provides medical and skilled nursing services to patients who are categorized as children.

Percent occupancy (staffed beds or licensed beds) - The average proportion that all beds in a facility were in use in a given time period (usually a calendar year). This value can be determined by using either Staffed Bed Days Open or Licensed Bed Days Open. The formula is:

Hospital X had 15,610 Inpatient Days and 17,345 Bed Days Open

$$\frac{15,610 \text{ Inpatient Days}}{17,345 \text{ Bed Days Open}} \times 100 = 90.0 \text{ Percent Occupancy}$$

Psychiatric hospital - A facility which provides diagnostic treatment and support services to patients with mental or emotional disorders.

Research hospital - A facility that specializes in medical research for certain specialized diseases, conditions, or population groups.

GLOSSARY

Revenue, patient - The charges for patient services.

Revenue, all other - Revenue from sources other than patient services.

Short-term hospital - A facility which treats diseases or conditions which generally last over a short period of time; acute care hospitals.

Specialty hospital - A facility which treats specific diseases or conditions and which excludes patients not suffering from these diseases or conditions. An example of such a facility would be an eye and ear hospital.

Staffed beds - The total number of adult and pediatric beds set up, staffed and in use at the end of the reporting period. This number should be less than or equal to the number of licensed beds.

Staffed beds percent occupancy - See percent occupancy.

TennCare - A program to provide health care to individuals who are Medicaid eligible, or uninsurable. Additionally, depending on income and access to alternative coverage, and the availability of state funding, the uninsured can also participate in the program. Started on January 1, 1994, TennCare underwent major revisions in 2004.
