Prescribing Guide – Standard Control for Clients with Advanced Control Specialty Formulary® for State of Tennessee

Effective July 1, 2026

The 2026 Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary® for State of Tennessee is intended to be a useful reference and informational tool for medical providers. It is intended to assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

HEPARINS AND HEPARINOID-LIKE AGENTS 53
IN VITRO/LOCK ANTICOAGULANTS 54
THROMBIN INHIBITORS 54
ANTICONVULSANTS 55
AMPA GLUTAMATE RECEPTOR ANTAGONISTS 55
ANTICONVULSANTS - BENZODIAZEPINES 55
ANTICONVULSANTS - MISC. 55
CARBAMATES 57
GABA MODULATORS 58
HYDANTOINS 58
SUCCINIMIDES 58
VALPROIC ACID 58
ANTIDEPRESSANTS 58
ALPHA-2 RECEPTOR ANTAGONISTS (TETRACYCLICS) 58
ANTIDEPRESSANT COMBINATIONS 58
ANTIDEPRESSANTS - MISC. 58
GABA RECEPTOR MODULATOR - NEUROACTIVE STEROID 59
MONOAMINE OXIDASE INHIBITORS (MAOIS) 59
N-METHYL-D-ASPARTIC ACID (NMDA) RECEPTOR ANTAGONISTS 59
SELECTIVE SEROTONIN REUPTAKE INHIBITORS (SSRIS) 59
SEROTONIN MODULATORS 59
SEROTONIN-NOREPINEPHRINE REUPTAKE INHIBITORS (SNRIS) 60
TRICYCLIC AGENTS 60
ANTIDIABETICS 61
ALPHA-GLUCOSIDASE INHIBITORS 61
ANTIDIABETIC COMBINATIONS 61
BIGUANIDES 63
DIABETIC OTHER 63
DIPEPTIDYL PEPTIDASE-4 (DPP-4) INHIBITORS 63
DOPAMINE RECEPTOR AGONISTS - ANTIDIABETIC 63

INTRODUCTION

We are pleased to provide the 2026 ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** for the State of Tennessee as a useful reference and informational tool. The ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** can assist practitioners in selecting clinically appropriate and cost-effective products for their patients.

The drugs represented have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion. The ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** is reflective of current medical practice as of the date of review.

The information contained in this ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** is provided solely for the convenience of medical providers. We do not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. All the information in the ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber. The document is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable.

We assume no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

National guidelines can be found on the National Guideline Clearinghouse site at https://www.ahrq.gov/gam/.

PREFACE

The ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** is organized by sections. Each section is divided by therapeutic drug class primarily defined by mechanism of action.

Individual pharmacy benefit plans may impose restrictions or not reimburse some products. In addition, over-the-counter (OTC) products, with the exception of insulin and diabetes monitoring products, are usually not included in the pharmacy benefit. Pharmacy law requires a valid prescription for purchase of needles and syringes in certain states. OTC products are listed for informational purposes. If covered in the pharmacy benefit, OTC products require a valid prescription.

Drugs represented in the ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** may have varying cost to the plan member. Prescription benefit plan may alter coverage of certain products or vary copay amounts based on the condition being treated. Generic medications typically are available at the lowest cost, brand-name medications on the ***Prescribing Guide - Standard Control for Clients with Advanced Control Specialty Formulary®*** will generally cost more than generics, and brand-name medications not on the list will generally cost the most.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The services of an independent National Pharmacy and Therapeutics Committee ("P&T Committee") are utilized to approve clinically appropriate drug therapies. The P&T Committee is an external advisory body of clinical professionals from across the United States. The P&T Committee's voting members include physicians, pharmacists, a pharmacoeconomist and a medical ethicist, all of whom have a broad background of clinical and academic expertise regarding prescription drugs. Voting members of the P&T Committee must disclose any financial relationship or conflicts of interest with any pharmaceutical manufacturers.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product.

One way to reduce out-of-pocket cost is by requesting a generic drug. Generic drugs are usually priced lower than their brand-name equivalents. Prescription generic drugs are:

- Approved by the U.S. Food and Drug Administration for safety and effectiveness and are manufactured under the same strict standards that apply to brand-name drugs.
- Tested in humans to assure the generic is absorbed into the bloodstream in a similar rate and extent compared to the brand-name drug. Generics may be different from the brand in size, color, and inactive ingredients, but this does not alter their effectiveness or ability to be absorbed just like the brand-name drug.
- Manufactured in the same strength and dosage form as the brand-name drugs.

When a generic drug is substituted for a brand-name drug, you can expect the generic to produce the same clinical effect and safety profile as the brand-name drug.

WHAT IS A DRUG TIER?

Each covered drug is assigned to a Drug Tier. The Drug Tier is a group of drugs that indicates what your Copayment or Coinsurance is for each drug. A Deductible may also

apply. For information about your Copayments, Coinsurance and/or Deductible, please consult your benefits information available online by visiting Caremark.com or contact a CVS Caremark Customer Care representative at 1-877-522-TNRX (8679). When you create a State of Tennessee Health Plan online account, you can easily access your benefit information online 24 hours a day, 7 days a week.

A preferred drug is a drug that the Pharmacy and Therapeutics Committee has determined provides greater value than its alternatives when considering clinical effectiveness, safety and overall value.

The Drug Tier is marked throughout this document by one of the following symbols:

Symbol	Drug Tier	Description
1	Tier 1	Preferred Generic Drugs
2	Tier 2	Preferred Brand-Name Drugs
3	Tier 3	Non-preferred drugs (may include Brand Name or Generic Drugs)

PLAN DESIGN

This document represents a closed formulary plan design. The medications listed on the document are covered by the plan as represented. Certain medications on the list are covered if utilization management criteria are met (i.e., Prior Authorization, Quantity Limits, Step Therapy, etc.); requests for use of such medications outside of their listed criteria will be reviewed for medical necessity. If a medication is not listed on the document, a formulary exception may be requested for coverage. Medical necessity or formulary exception requests will be reviewed based on drug-specific prior authorization criteria or standard non-formulary prescription request criteria.

Drugs that require a Prior Authorization are indicated in the document by **PA**.

Drugs that require Step Therapy authorization for coverage are indicated with **ST**. Step Therapy requires that drugs be used in a specific prescribing order.

Drugs that have dispensing quantity limitation are indicated in the document by **QL** along with the limits noted in the parentheses. Drugs are designated with a QL because they are typically not taken on a regular schedule and/or because of potential safety and utilization concerns. The Quantity Limit program provides for a maximum quantity of drug product that a member may receive per prescription and/or over a specific period of time. Many drug products have quantity limits based upon the dosage described in product labeling.

Some medications are available in quantities greater than the typical 30-day supply. The State of Tennessee offers a 90-day fill option for certain drugs used to many chronic heart conditions such as high blood pressure.

PRIOR AUTHORIZATION CRITERIA

The plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval from the plan before you fill your prescriptions. If you don't get approval, the plan may not cover the drug.

STEP THERAPY CRITERIA

There are effective, lower-cost drugs that treat the same health condition as this drug. You may be required to try one or more of these other drugs before the plan will cover your drug. If you have already tried other drugs or your doctor thinks they are not right for you, please have your prescribing doctor call CVS Caremark for an override.
