¹ Field-grown nursery stock requires bait + contact insecticide treatment; as of 2/16/16 no labels were available for the contact insecticide portion of the treatment. Therefore the only IFA quarantine use for bait as of 2/16/16 is within the IFA-free nursery program.

² All the chlorpyrifos labels were on the companies' websites as of 2/16/16; not all may be available throughout 2016 but existing supplies of any chlorpyrifos EC label with IFA quarantine use patterns may be used up
