JOHN C. SCHROER
COMMISSIONER

BILL HASLAM
GOVERNOR

TO: Chuck Rychen
Assistant Chief Engineer of Operations

FROM: Brad Freeze, Director of Traffic Operations

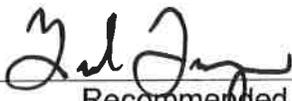

SUBJECT: **Proprietary Item Request and Justification**
The Town of Farragut
Signal Controllers

The Town of Farragut requests approval to use PEEK 3000E controllers on all signalization projects within the Town of Farragut as they are designed and bid. The following are justifications for this request.

- 1) Allowing the use of the requested controllers will facilitate synchronization with the town's current network of signal equipment. The Town of Farragut currently maintains 24 signals, all of which are PEEK 3000E controllers.
- 2) The town's technicians and those of their signal maintenance contractor are trained in the trouble-shooting and maintenance of PEEK controllers. The ability to specify PEEK 3000E controllers within the town will allow for more efficient and less expensive repair and maintenance due to the town's familiarity with this product.

Coordination of this request can be done through: Darryl W. Smith, PE (Town Engineer) at (865) 966-7057

I, Brad Freeze, Director of Traffic Operations of the Tennessee Department of Transportation, do hereby certify that in accordance with the requirements of 23 CFR 635.411(a) (2) that the patented or proprietary item listed above is essential for the synchronization with existing facilities.

**RE: Request for Proprietary Traffic Signal Products Certification
(Traffic Signal Controllers)**

Dear Mr. Moss:

The Town of Farragut would like to request the use of PEEK 3000E controllers on all Traffic Signal projects within the Town of Farragut. Currently, the Town maintains 24 signals located within our jurisdiction, and all signals have PEEK 3000E controllers.

The use of the PEEK 3000E controllers is for synchronization capabilities within our existing traffic signal network. Our technicians, as well as those of our signal maintenance contractor, are trained in trouble shooting of the PEEK products, and we believe continuing the use of these controllers in all of our signals will allow us to continue this efficiency. Thank you for consideration of this request.

Please feel free to call or email if you have questions or need additional clarification.

Sincerely,

Darryl W. Smith, PE
Town Engineer
