Essay #5

Score Point: 2

This flawed essay fails to demonstrate proficiency in expository writing skills. The writer chooses to visit Mars in the future and lists some reasons for his/her choice; however, the response displays no apparent organizational strategy or development of any relevant details. Serious errors in mechanics, usage, and sentence structure prevent the reader from comprehending most of the writer's explanations ("Becuse thay have sinse of water," "But people cant have people on the moon").
