

## PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction and/or modification of air contaminant sources as noted below. The proposed construction and/or modification is subject to part 1200-03-09-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9<sup>th</sup> Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12<sup>th</sup> Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Ajax Paving Industries, Inc. with a mailing address of P.O. Box 7058, Troy, Michigan 48084. They seek to obtain an air contaminant permit (Division identification number: 24-0105-01/965321) for construction of a temporary portable concrete batch plant along the Norfolk/Southern Yard, east of Parnell Road and south of Highway 57, southwest of Rossville, TN. This will involve a short term project to pour concrete pads near the rail line. This proposed operation would consist of a central mix concrete batch plant with mobile conveying equipment for sand and aggregate with material bins. The portable unit contains silos, a weigh hopper, central mixer, and load-out discharge for truck loading. Particulate emissions from the silo vent, silo-to-weigh batcher vent, and discharge chute to trucks with hood pickup are controlled by a centralized baghouse. Mr. Thomas Krinov is the assigned Division person.
