

CERTIFICATES OF COMPETENCY ISSUED TO WATER AND WASTEWATER OPERATORS

On November 3, 2011, certificates of competency were issued to 218 individuals who successfully completed the certification requirements for water and or wastewater treatment operators. To be issued a certificate of competency, a water or wastewater plant operator must meet specific education and experience requirements; and successfully complete a written exam. The 'Water Environmental Health Act' establishes certification of operators. Requirements for certification operators are found in the 'Rules Governing Water and Wastewater Operator Certification' Tennessee's environmental regulations require that water and wastewater treatment plant have a certified operator in direct responsible charge. However, operators may become certified to increase their knowledge and skills in their field of work. The Water and Wastewater Operator Certification Board would like to recognize and support the efforts of these individuals to better protect the public health and waters of our state. Listed below are the individuals who successfully completed the November 3, 2011 examinations
