Hazardous Waste Permit Number: TNHW-108
Class I Modification Number: 13 (A-923)

To whom it may concern:

Because you have requested to be kept informed of such matters, Nuclear Fuel Services, Inc. (NFS) is providing the required notice for a Class I modification to its existing Hazardous Waste Management Part B Permit (TNHW-108).

NFS is required by the Nuclear Regulatory Commission (NRC) to review and revise, as necessary, the Emergency Plan and supporting Emergency Procedures on an annual basis. Since the Emergency Plan and Emergency Procedure NFS-HS-E-05, "Spill Response and Reporting," are components of the Part B Permit, NFS submitted revised copies to the Division of Solid Waste Management (DSWM) on March 1, 2011. These documents have been designated as "Official Use Only" and cannot be released to the public due to their sensitive nature. The revisions to the documents do not alter permit conditions or reduce the capacity of the NFS facility to protect human health or the environment. The DSWM has reviewed and approved these changes as a Class I Permit modification effective as of March 11, 2011.

Thank you for your interest in our facility.

Sincerely,

NUCLEAR FUEL SERVICES, INC.
