MONTHLY ELECTRONIC INTERSTITIAL MONITORING REPORT

This report is used to document interstitial monitoring of underground storage tanks (UST) systems equipped with secondary containment. Interstitial monitoring is required on all UST systems installed after July 24, 2007.

- Document the status of any alarms reported during the monitoring period.
- Maintain these records for a minimum of 12 months and submit them for review upon request by the division.
- Attach copies of all monthly sensor status and alarm history reports for the monitoring period.

V. INTERSTITIAL MONITORING ALARM LOG

- Document all sensor alarms that occurred during the previous 30 days using this section of the report.
- Document that all alarms or suspected releases have been investigated and, if necessary, attach the appropriate documentation to this report.
- If your monitoring device is capable of producing an "alarm history" report, attach a copy of the report to this form.

Date of Alarm	Cause of Alarm	Describe Action Taken:

I have completed a review of the monthly interstitial monitoring release detection records for this facility. The electronic console is functioning normally (no warning lights or error messages), all sensors are operational. All alarms and suspected releases discovered during this monitoring period have been documented and properly investigated.
