

**Department of Human Services  
Vehicle Alarm System Approval List for  
Child Care Centers Providing Transportation**

Below is a listing of vehicle alarm system companies that have come to our attention since the law passed in 2004.

The products associated with the companies listed below represent a variety of price ranges and design options. **Please note that the Department can not endorse a specific product. It is child care provider's responsibility to determine which device best meets their needs.**

These items have been added to the approval list, because they **appear** to have the ability to meet the requirements of the law/rule for vehicle alarm systems, provided that they are installed properly. Some of the systems have a variety of installation options. In order to meet the requirements of the law, the system must be installed in such a way that it **prompts staff to inspect the vehicle for children before an alarm sounds**.

**Note:** We are also aware of some other systems that are still in development at this time, but may be available in the future. Systems that are still in development were not included on the approval list. We will continue to add companies to this list as new systems come to our attention. Any company that would like to be added to the list must submit a detailed description of their product to the Department for approval (be sure to specifically describe how your system prompts staff to inspect the vehicle for children before an alarm sounds). Please send your information to:

**Department of Human Services  
Attn: David Shirk, Licensing, 14<sup>th</sup> Floor  
Citizens Plaza Building  
400 Deaderick Street  
Nashville, TN 37248  
Or  
David.Shirk@state.tn.us**

**Additional Note:** Some bus manufacturers have their own alarm systems. In many cases they only install these systems on the buses they manufacture. These systems may not be on the approval list because they are not available to the general public separate from purchasing a particular bus. We will, however, approve any alarm device that meets the definition of the law. If you are considering purchasing a vehicle with an alarm system that is not on the approval list, please contact your Program Evaluator to confirm that the alarm system meets the definition of the law.
