DEPARTMENT OF GENERAL SERVICES

Disposal – Fee (with Right to Hire an Auction Firm)

Requested Action: Approval of disposal in fee with waiver one appraisal and to release an RFP for auctioneer services

Transaction Description: Transaction No.15-06-006-BN

- **Location:** Davidson County – 2.11+/-acres – 450 & 460 James Robertson Pkwy, Nashville, TN
- **Estimated Sale Price:** Fair Market Value
- **Estimated Auctioneer Cost:** To be negotiated

Comment: The Tennessee Regulatory Authority building is property that's in excess of the State's needs. Considering the downtown location, age and condition of the building, this is believed to be an appropriate property to pilot a sale by auction process.

The Tennessee Historical Commission determined that the **disposal** of this 50+ year old property does adversely affect this State-owned resource. The mitigation plan worked out with the Tennessee Historical Commission (THC) is that marketing materials will discuss possible property qualification for a 20% Federal Investment Tax Credit for historical buildings, and STREAM shall make photographic record of the building in the manner requested by THC.

Date of Last Transfer: January 2, 1986
Previous Owner: Northwestern Mutual Life Insurance Co.
Original Cost to State: \$3,800,000

DEPARTMENT OF GENERAL SERVICES

Statewide

Requested Action: Approval to award a contract to the best evaluated proposer for a Power Purchase Agreement (PPA)

Project Title: Energy Generation Systems

Project Description: Generation of electricity from systems installed and maintained by others and located on State owned properties.

SBC Number: 460/000-06-2015

Comment: The State seeks to reduce electrical utility cost and consumption through the installation of on-site renewable energy generating systems. The energy generating systems will be contracted through a PPA and the term of the contract will be for 25 years with a right to terminate with removal after six years. Payments will be diverted from the User Agencies' electrical operating costs and will be less than the current annual energy expenditures. The projected operating cost savings are due to the reduced cost of electricity from the on-site systems as compared to purchasing electricity from the grid. All sites will be subject to the approval of the State Building Commission. Sites on which energy generating systems will be installed are:
