

A close-up, warm-toned photograph of a young child's face, looking slightly to the right. The child's eyes are dark and expressive, and their skin has a soft, natural glow. The lighting is soft, highlighting the texture of the skin and the shape of the nose and lips.

# Snort. Sniffle. Sneeze. No Antibiotics Please.

**Treat colds and flu with care.  
Talk to your doctor.**

As a parent, you want to help your child feel better. But antibiotics aren't always the answer. They don't fight the viruses that cause colds and flu. What will? Fluids and plenty of rest are best. Talk to your doctor. Find out when antibiotics work – and when they don't. The best care is the right care.
