State Forest Timber Sales Information

Each year stands of timber are selected to be harvested on the State Forests to maintain healthy forests or harvested to start a new forest cycle that maintains a healthy tree age and habitat distribution across the forests.

Tennessee's State Forest resources are utilized and managed for the citizens of Tennessee for multiple uses. These forests are managed according to the state laws and rules found in the Tennessee Code Annotated, Title 11, Chapter 4; and Rules, Chapter 0080-07-01, Protection of the State Forests. Additionally, professional foresters manage the resources according to scientific forestry principles for their sustained use.

In the process of managing for healthy and sustainable forests and the utilization of the resources that are found on the State Forests, the State regularly harvests timber. Harvests are generally administered through timber sales and these sales are governed by the procedures outlined in General Services Rule 0690-2-1-.18 (a), Disposal of Forestry Products. Basically, the removals of regularly scheduled harvested timber are sold through a sealed bid process with the timber going to the highest bidder. The Purchaser and the State then enter a Timber Sales Contract that outlines the terms and conditions of the sale and removal of the timber. By rule, all scheduled sales require the collection from the Purchaser a performance deposit in the amount of 7% of the sale price.

6. The PURCHASER shall exercise caution and utmost care to prevent damage to trees not designated for harvest. Damage shall be determined and assessed at the sole discretion of the STATE and/or according to Section 7 (Penalties) of this Contract. The PURCHASER shall not cut, push down, or negligently damage any trees that have been marked with **pink paint** to mark the boundary of the sale areas, **blue paint** to mark boundaries of equipment exclusion zones, and/or **bands of orange paint** to mark den or other leave trees.
7. The PURCHASER shall cut all trees 4.5 feet tall and taller (slashing), except within equipment restriction zones or other areas otherwise designated, where slashing shall **not** be implemented. Stumps of severed trees shall not exceed 12 inches in height above the ground.

9. Delimbing devices may be used for pine species only, but such devices shall be located away from the landing(s) at points designated by the STATE. Hardwood species shall be topped and delimbed where the tree falls. Skidding of the tree-length boles (merchantable bole minus top and limbs) is acceptable for all species. Trees falling outside the sale area shall be pulled back into the sale area and non-merchantable tops and limbs severed in the immediate sale area.

**PRO FORMA CONTRACT**

10. The PURCHASER shall **not** allow excessive volumes of cut-off logs, tops and limbs to accumulate at either landings or delimbing devices. Cut-off logs, tops and limbs that for whatever reason accumulate at landings and delimbing devices shall be scattered evenly back onto the sale area each day in a manner and to the degree that is acceptable to the STATE.
11. Within each sale area, logging shall be carried out in sections at the discretion of the STATE. Each section must be completely harvested, with the exceptions and requirements mentioned above, before proceeding to the next section.
12. While on Prentice Cooper State Forest, equipment, trucks and trailers must remain on rocked surfaces when outside the sale area(s) and associated landing(s), except with written permission from the STATE.
13. The PURCHASER shall have all logging equipment inspected by the STATE for presence of non-native, invasive plant species contamination prior to first entry to the State Forest or if equipment is used at another location during the course of this contract. All equipment shall be cleaned to the satisfaction of the STATE before moving logging equipment onto the State Forest.
14. The PURCHASER shall NOT enter Prentice Cooper State Forest before 5:00AM EST except as permitted by the STATE.
