

Reportable Diseases and Conditions In Tennessee

The reporting of evidence of certain animal diseases is a requirement under the Standards for Accreditation of Veterinarians in Tennessee and all other states. These diseases must be reported to the State Veterinarian or USDA, APHIS, VS Area Veterinarian in Charge. It is the professional responsibility of the veterinarian to report these diseases properly and promptly so that appropriate control measures may be instituted. Reportable diseases include all diseases for which control or eradication programs are in effect, and all foreign animal diseases not known to exist in this country.

In addition to the evidence of diseases, there are certain conditions that should be reported as soon as possible to the State Veterinarian's office. The State Veterinarian's office is located at Ellington Agricultural Center, 440 Hogan Rd. Porter Bldg., P.O. Box 40627, Nashville, Tennessee 37204. The office phone number is (615) 837-5120. The office e-mail address is animal.health@tn.gov

Avian Diseases

- ★ Avian Influenza (Fowl Plague)
- ★ Fowl Typhoid (*Salmonella gallinarum*)
- ★ Pullorum Disease (*Salmonella pullorum*)
- ★ Velogenic Viscerotropic Newcastle Disease

- ★ Rabies
- ★ Scabies (psoroptic)
- ★ Screwworms
- ★ Tuberculosis
- ★ Trichomoniasis

Bovine Conditions

- ★ Vesicular Conditions
- ★ Mucosal conditions

- ★ Hemorrhagic conditions
- ★ Multiple abortions of unknown etiology
- ★ Central nervous system or undiagnosed encephalitic conditions
- ★ Severe respiratory conditions
- ★ Pox or lumpy skin conditions
- ★ Unusual myiasis or acarasis (flies, mites, ticks, etc.)
- ★ High morbidity and or mortality of unknown etiology

Equine Diseases

- ★ Anthrax
- ★ Equine Infectious Anemia
- ★ Piroplasmiasis
- ★ Rabies
- ★ Screwworms

Equine Conditions

- ★ Vesicular Diseases
- ★ Viral Encephalitis
- ★ Hemorrhagic conditions
- ★ Multiple abortions of unknown etiology
- ★ Central nervous system or undiagnosed encephalitic conditions
- ★ Severe respiratory conditions
- ★ Unusual myiasis or acarasis (flies, mites, ticks, etc.)

Reportable Diseases and Conditions In Tennessee

- ★ High morbidity and or mortality of unknown etiology

Captive Deer and Elk Diseases

- ★ Anthrax
- ★ Brucellosis
- ★ Chronic Wasting Disease
- ★ Rabies
- ★ Screwworm
- ★ Tuberculosis

Captive Deer and Elk Conditions

- ★ Vesicular Conditions
- ★ Multiple abortions of unknown etiology
- ★ Central nervous system or undiagnosed encephalitic conditions
- ★ Chronic weight loss of unknown cause
- ★ Unusual myiasis or ascariasis (flies, mites, ticks, etc.)
- ★ High morbidity and or mortality of unknown etiology

Porcine Diseases

- ★ African Swine Fever
- ★ Anthrax
- ★ Brucellosis
- ★ Classical Swine Fever (Hog Cholera)
- ★ Pseudorabies
- ★ Rabies
- ★ Screwworms

Porcine Conditions

- ★ Vesicular Diseases
- ★ Hemorrhagic conditions
- ★ Multiple abortions of unknown etiology

- ★ Central nervous system or undiagnosed encephalitic conditions
- ★ Severe respiratory conditions
- ★ Unusual myiasis or ascariasis (flies, mites, ticks, etc.)
- ★ High morbidity and/or mortality of unknown etiology

Sheep and Goat Diseases

- ★ Anthrax
- ★ Bluetongue
- ★ Rabies
- ★ Scabies
- ★ Scrapie
- ★ Screwworms

Sheep and Goat Conditions

- ★ Vesicular Diseases
- ★ Mucosal conditions
- ★ Hemorrhagic conditions
- ★ Multiple abortions of unknown etiology
- ★ Central nervous system of undiagnosed encephalitic conditions

Small Animal / Cat and Dog Diseases

- ★ Rabies
- ★ Screwworms

Small Animal Conditions

- ★ Multiple abortions of unknown etiology
- ★ Unusual myiasis or acariasis (flies, mites, ticks, etc.)
- ★ High morbidity and or mortality of unknown etiology

All Species

- ★ Rabies
