

Safe Schools and Classrooms

Our common problem:
better supporting students,
teachers, administrators,
and classrooms through
behavior crises.

Our best solution:
use trained professionals
and evidence based
strategies to deescalate
and prevent crises.

Solutions to address student behavior should incorporate the tools Tennessee already funds: **FREE technical assistance for any school is already available** from the TN Technical Assistance Network ("TN-TAN") through the TN Dept. of Education.

All of us want safer classrooms.

Existing resources Tennesseans are already paying for must be part of the solution. Any solutions should help schools connect with this FREE support when classrooms are struggling.

Learn more about TN-TAN or ask
for help in your district.
