Introduction

Pursuant to Tenn. Code Ann. §§ 7-86-108(a)(1)(B)¹ and 7-86-315,² the Tennessee Emergency Communications Board (“Board” or “TECB”) hereby proffers its annual report to the Governor, Speakers of the General Assembly and the Senate and House Finance, Ways and Means Committees. This annual report of the Board’s activities covers the period from July 1, 2006 through June 30, 2007.

¹ Tenn. Code Ann. § 7-86-108(a)(1)(B) states in pertinent part:

The board shall report annually to the finance, ways and means committees of the senate and the house of representatives on the status of statewide implementation of wireless enhanced 911 service and compliance with the federal communications commission order, the status and level of the emergency telephone service charge for CMRS [commercial mobile radio service] subscribers and users, and the status, level, and solvency of the 911 Emergency Communications Fund.

² Tenn. Code Ann. § 7-86-315 states:

The board shall report annually to the governor and the speakers of the general assembly on the activities of the board for the preceding year. The board shall receive and consider from any source whatsoever, whether private or governmental, suggestions for amendments to this chapter.

Statement of the Chairman

On behalf of the members of the Tennessee Emergency Communications Board (“Board”), I am pleased to present you with a report of the Board’s major activities and accomplishments for the 2007-2008 fiscal year. Since our last report, the Board has worked on local, state and federal levels to provide operational and financial support to Tennessee’s 100 emergency communications districts (“ECDs”) which provide or facilitate 911 in our state.

During fiscal year 2007-2008, the Board continued programs that substantially expanded its funding for ECD operations. These include re-authorization of a grant of \$50,000 per ECD over five years for maintenance of GIS mapping systems and continuation of the \$14 million annual distribution of operational funding and the essential equipment funding program.

The additional funding has improved the overall financial condition of the State’s ECDs. Currently only two districts are deemed financially distressed pursuant to Tenn. Code Ann. § 7-86-304(d), the lowest number since the Board’s creation in 1998. In addition, no districts have reported that they are “at risk” as defined in TECB Policy No. 27. Only four districts sought increases to their local 911 service charge on landlines during the fiscal year.

The Board’s project to modernize the state’s aging 911 infrastructure is proceeding. The project, referred to as Next Generation 911 (“NG-911”), involves construction of an internet protocol platform that will improve 911 call delivery, enhance interoperability, and increase the ease of communication between ECDs, allowing immediate transfer of 911 calls, maps, photos, caller information and other data statewide. The TECB determined that the statewide IP network being deployed by the state’s Office of Information Resources will be sufficiently redundant and robust for 911. This important project will assure that Tennessee maintains its position at the forefront of 911 deployment into the future.

The Board took a leadership role on the national level by filing a Petition at the Federal Communications Commission (“FCC”) seeking an inquiry into the growing problem of harassing and fraudulent 911 calls from discarded and disconnected cell phones. These calls can divert valuable 911 resources from callers who are truly in need of emergency assistance. FCC call forwarding rules currently require wireless carriers to transmit all wireless 911 calls, including those made from discarded and disconnected phones, to 911 call centers. Tennessee drafted the petition and the signatories included the states of Tennessee, Michigan, Montana, New Jersey and Washington, the National Emergency Number Association, the National Association of State 911 Administrators and the Association of Public-Safety Communications Officials.

In closing, I wish to acknowledge the continued hard work, dedication and innovation of hundreds of E-911 professionals and telecommunications industry officials. Because of the efforts of so many, Tennessee remains a national leader in 911 and continues to provide its citizens and guests with high-quality 911 service.

Sincerely,

Randy Porter
Chairman

Overview

The Emergency Communications Board is a self-funded, nine-member agency administratively attached to the Department of Commerce and Insurance,³ created “for the purpose of assisting emergency communications district (“ECD”) boards of directors in the area of management, operations, and accountability, and establishing emergency communications for all citizens of the state.”⁴ The Board is funded through a monthly emergency telephone service charge on users and subscribers of non-wireline communications services.⁵

By statute, the Board exercises financial and operational oversight over the state’s 100 ECDs which are the statutorily created municipalities that administer or facilitate local E-911 call taking and/or dispatching services across the state.⁶ The Board establishes technical, operational and dispatcher training standards, and administers grants and reimbursement programs which distribute funds to ECDs.⁷ It also provides substantial technical assistance to ECDs upon request.⁸ Its enabling legislation authorizes the Board, upon request, to increase the emergency telephone service charge on landlines in ECDs to the statutory maximum and to provide supervision and evaluation to ECDs that meet the statutory criteria for financial distress.⁹

The Board works on the local, state and federal levels to facilitate the technical, financial and operational advancement of the Tennessee’s 911 system and its ECDs. A major focus has been to implement and maintain wireless Enhanced Phase 2 911 service in the state, as set forth by the Federal Communications Commission (“FCC”) in orders and regulations it has issued on 911-related matters since 1994. Tennessee was the third state in the nation to fully deploy the equipment and technology needed for Phase 2 service to automatically locate 911 calls from properly equipped cell phones. The Board has received national recognition for its leadership in 911-related matters.

The Board is currently engaged in a project to modernize the state’s aging analog 911 infrastructure. The project, referred to as Next Generation 911 (“NG-911”), involves construction and management of an internet protocol platform that will improve 911 call delivery, enhance interoperability, and increase the ease of communication between ECDs, allowing immediate transfer of 911 calls, maps, photos, caller information and other data statewide.

³ See Tenn. Code Ann. §§ 7-86-302, 7-86-303(c) (The Board is funded by a service charge on users and subscribers of non-wireline service). Eight of the nine Board members are appointed by the Governor for fixed terms. The ninth member is the designee of the Office of the Comptroller of the Treasury. The Board is served by a staff of eight.

⁴ Tenn. Code Ann. § 7-86-302(a).

⁵ Tenn. Code Ann. §§ 7-86-108(a)(1)(B), 7-86-303(d).

⁶ See Tenn. Code Ann. § 7-86-106; Tenn. Code Ann. § 7-86-302, 7-86-306.

⁷ See Tenn. Code Ann. §§ 7-86-205, 7-86-306(a)(9) through (11).

⁸ Tenn. Code Ann. § 7-86-306(a)(7).

⁹ Tenn. Code Ann. §§ 7-86-306(a)(12); 7-86-304(d).

BOARD ACTIVITIES AND OUTREACH EFFORTS

Status of Statewide Implementation of Wireless E-911 Service and VoIP

All public safety answering points (“PSAPs”) affiliated with Tennessee’s 100 emergency communications districts (“ECDs”) are E-911 Phase II ready, meaning that each possesses the equipment and technology to automatically plot the location of 911 calls from properly equipped non-wireline devices such as cell phones. Tennessee was the third state in the nation to reach this milestone, in April 2005. These PSAPs are also equipped to receive 911 calls and location information from Voice over Internet Protocol (“VoIP”) devices. Tennessee’s ECDs are in compliance with all applicable E-911 directives issued by the Federal Communications Commission.

Status of Statewide Technical Assistance Program

The Director of 911 Technical Services, Rex Hollaway, made 81 site visits and drove 14,545 miles during the past fiscal year to assist ECDs on a variety of issues including design assistance for new PSAP construction, oversight on equipment and service implementations, coordination of wireless carrier upgrades, and to update PSAP equipment and service profiles. He also serves as an Emergency Services Coordinator with the Tennessee Emergency Management Agency (“TEMA”) as a liaison with our ECDs and carriers during a disaster. He attended the state and national 911 association meetings and serves on technical workgroups sponsored by the National Emergency Number Association (“NENA”).

Status of Wireless Carrier Deployment

As of June 30, 2008, the following wireless carriers are offering Phase II service throughout their service areas in Tennessee: Advantage, Alltel, AT&T, Cellular South, Cingular, Cingular - DCS, ClearTalk NTCH, Cricket, Sprint PCS, T-Mobile, SunCom - Triton, US Cellular, and Verizon. Notable changes are: 1) Western KY - Yorkville provided service in FY2008, but notified TECB that it was terminating service in Tennessee effective 6/30/08; and 2) SunCom – Triton was absorbed by T-Mobile effective 12/31/08.

T-Mobile activated 28 tower sites in the area around Knox County on 12/31/07 and completed its Knoxville area market turn-up for Phase I by March 15, 2008. T-Mobile informed staff that it plans to deploy in Union, Lawrence and Morgan Counties in December 2008 and will deploy Phase I and II by March 31, 2009.

Uses of the Non-wireline Fund

The emergency telephone service charge on users and subscribers of non-wireline phone service is the TECB’s sole revenue source. The funds are used to fulfill the TECB’s statutory mandates of establishing emergency communications for all citizens of the state, and assisting the state’s 100 ECDs in the areas of management, operations and accountability. Twenty-five percent of all income the Board receives from the service charge is distributed directly to the ECDs by population; in addition, the Board offers many other funding programs to the ECDs to assure reliable 911 service statewide. The service charge remains at \$1.00

per month per subscriber and user of any non-wireline service that connects a user dialing or entering the digits 911 to a PSAP, including wireless phone and IP-enabled services.

During the 2007-2008 fiscal year, the Board expended or distributed approximately \$30.8 million in financial support to ECDs for various funding programs including: \$13 million for the statutory 25% contribution; \$14 million for operational funding; \$1 million in grants; and \$3 million in equipment reimbursements and payment of wireless trunking and Automatic Location Information ("ALI") charges. Approximately \$9.6 million was expended for cost recovery for carriers and others to implement, operate, maintain or enhance the state's 911 system; \$1.4 million was expended for administration. The total percentage of the TECB's available non-wireline revenue distributed to ECDs was 74%. During the 2007/2008 fiscal year, net revenues exceeded expenditures by approximately twenty percent, due primarily to the Board's decision to postpone deployment of the NG-911 project to determine if the successful bid on the Department of Information Resources' RFP to implement a statewide Internet Protocol platform would be sufficiently robust and redundant for 911. The bidder was selected in May 2008.

The Board's budgeted continued expenditures of \$51.9 million for fiscal year 2008-2009 include the following: \$1.2 million for ECD reimbursements for equipment and 911 trunking and ALI costs; \$12.5 million for the 25% allocation to ECDs; \$14 million for ECD operations support; \$1 million for GIS Mapping Maintenance grants to ECDs; \$5.6 million for beginning phases of the Next Generation 911 project; \$3.2 million for Administration and contracted services; and \$14.5 million for Phase I and Phase II carrier cost recovery.

The Board is preparing for the financial challenges associated with modernizing Tennessee's 911 infrastructure through its conservative stewardship of the 911 fund. The modernization project, called Next Generation 911 or NG911, will replace the State's aging analog 911 infrastructure with a digital platform which will improve interoperability and increase the ease of communication between emergency communications districts, allowing the immediate transfer of 911 calls, maps, photos, caller location information and other data statewide. The Board projects non-recurring build out costs of approximately \$44 million over the next five years and recurring operational costs of up to \$16.5 million annually. The NG911 project was originally planned for implementation in FY 2006-2007, but the Board opted to explore whether the infrastructure planned for a statewide IP network being built as part of the NET TN project under the auspices of the Office of Information Resources in the Department of Finance and Administration would be sufficiently redundant and robust for 911 purposes. The Board is taking preliminary steps toward deployment and has requested a Budget Improvement for FY2009-2010 in the amount of \$5 million.

TECB Funding Programs, Reimbursements and Grants

The TECB distributes twenty-five percent (25%) of the revenue generated by the monthly service charge on users and subscribers of non-wireline telephone service to the ECDs, based on the proportion of the population of each district to that of the State. The funds are distributed every two months.

The Board also provides a number of non-statutory funding programs for the ECDs, like the \$14 million operational support program. Under this program, each district receives \$40,000 annually as an acknowledgement of the basic costs intrinsic to providing 911 service without regard to the size of the ECD. The remainder of the \$14 million (\$9.96 million) is divided among the districts based on seven (7) population groups. A set amount is allocated to each

group based on the average audited cost ratios of each of the population groups, determined from an analysis of audited financial statements from the 2004-2005 fiscal year. In figuring this calculation, all personnel costs, including salaries and benefits, were excluded in order to assure more equal treatment between districts that dispatch and those that do not. Each ECD in each of the seven (7) population groups receives the same dollar amount. The population groups receive the following annual distributions, which may be used in the operation of the districts for all purposes permitted under the TECB Revenue Standards:

<u>Populations (2005 estimates):</u>	<u>Annual distribution to each ECD (per population group):</u>
Under 15,000	\$ 72,215
15,000 - 29,999	\$ 86,169
30,000 - 49,999	\$104,081
50,000 - 74,999	\$120,041
75,000 - 99,999	\$176,619
100,000 - 199,999	\$234,923
over 300,000	\$918,619

This formula lessens the disproportionality inherent in the strictly population based distribution required by law, which provides the larger districts with substantially more funding and provides comparatively less support to the smaller, more rural districts. The four most populous districts receive over 33% of the total annual revenue from the 25% distribution. The formula also avoids the pitfalls of an equal distribution, which fails to reflect the cost differences related to the size of the populations served by the ECDs.

The Board also continues to offer ECDs prospective funding and reimbursements up to the following amounts:

- \$50,000 for Geographic Information System (“GIS”) Mapping Systems
- \$40,000 for Controllers
- \$150,000 for Essential Equipment
- \$5,000 for Master Clocks
- \$150,000 to each ECD that Consolidates (to a maximum of 3 ECDs)
- \$1,000 to Train Dispatcher Trainers
- \$100,000 to Cover Uninsured Catastrophic Losses

The TECB administers the GIS Mapping Maintenance Grant program, which provides eligible ECDs with up to \$10,000 annually to assist with the installation and maintenance of GIS mapping systems. GIS mapping systems assist PSAPs in determining the location from which each 911 call originates. In addition, GIS mapping systems enable emergency personnel to dispatch emergency vehicles more efficiently and effectively to the scene of the emergency. Like all maps, to work effectively, GIS mapping systems must be religiously updated and maintained for accuracy.

TECB New Policies and Policy Changes

During fiscal year 2007-2008, the Board adopted a number of new policies. Among them are the following:¹⁰

POLICY NO. 40

During the August, 2007 meeting, the Board revised Policy No. 40 to assure that it would not be misinterpreted to pay for catastrophic losses in lieu of insurance, if an ECD had not obtained insurance. An additional sentence was added to the policy which clarifies that ECDs without liability insurance are not eligible for assistance under Policy No. 40. The revised Policy now states:

UNINSURED CATASTOPHIC LOSS ASSISTANCE

On January 26, 2006, the Tennessee Emergency Communications Board initiated a program making emergency communications districts ("ECD") with uninsured catastrophic losses eligible for financial assistance in an amount up to \$100,000. In order to expedite such assistance during an emergency, the Executive Director of the Tennessee Emergency Communications Board ("TECB") is hereby authorized to release such funds, subject to approval by the TECB chairman, if the following criteria have been met:

1. Release of the funds is necessary for the restoration or adequate provision of 911 service;
2. The funds shall be used only for items authorized by the 911 Revenue Standards;
3. The ECD Director or Chairperson provides:
 - A signed certification of immediate need;
 - A signed certification that if funds provided to the ECD are later reimbursed from insurance or other reimbursing agency, said funds shall be returned to the ECB;
 - A copy of vendor quotation(s) for the item(s) for which funding is sought.
4. The Director of E-911 Technical Services will conduct a site visit to verify use of the funds as soon as practicable.

Catastrophe is defined as a partial or complete loss of equipment or facilities resulting from fire, earthquake, tornado, lightning, hazardous waste, acts of God, or similar events deemed catastrophic by the TECB in accordance with this policy.

This program is not intended to provide funding in lieu of an ECD properly insuring its facilities and property.

ECDs without liability insurance are not eligible for this assistance.

¹⁰ The Board's policies are included on its website at <https://www.tn.gov/commerce/e911>.

POLICY NO. 41

During the August 2007 meeting, the Board also voted to require financially distressed ECDs to provide TECB staff with meeting minutes and financial reports to assist the TECB in supervising the ECDs. Financially distressed ECDs are subject to the TECB's supervision and evaluation.¹¹ The new Policy states:

REPORTING REQUIREMENTS FOR FINANCIALLY DISTRESSED ECDs

Financially distressed districts, shall provide the TECB with copies of all ECD board of directors meeting minutes and the financial reports required to be provided at every regularly scheduled meeting under Tenn. Code Ann. § 7-86-123. Minutes shall be filed with the TECB no later than seven (7) days after approval; financial reports shall be filed no later than seven (7) days after each ECD meeting.

POLICY NO. 14

During its May 2008 meeting, the Board Amended Policy No. 14, the policy governing the procedures for ECDs seeking increases to their local 911 service charge on landlines. The amendment added an additional requirement to the applications process for ECDs requesting rate increases from the TECB. ECDs must certify they are in compliance with Tenn. Code Ann. § 7-86-205, the Dispatcher Training Law, and Tenn. Comp. R. & Reg. 0780-6-2, the Dispatcher Training Regulations. The language amending the Policy states:

8. In the application packet, the ECD shall execute the following certification:

Certification of Dispatcher Training

I hereby certify that each emergency call taker or public safety dispatcher who receives an initial or transferred 911 call from the public who is working for or, pursuant to an interlocal agreement, on behalf of the _____ Emergency Communications District has satisfied the minimum requirements for dispatcher training established in Tenn. Comp. R. & Reg. 0780-6-2. I further certify that evidence of completion of such training is available for inspection, as are attendance records, course outlines and lesson plans.

¹¹ Policy No. 16 sets forth the duration of financial distress and Policy No. 37 requires financially distressed ECDs to obtain TECB permission before entering into financial obligations over \$5,000.

Status of TECB Advisory Committees

The TECB Operations Advisory Committee continues to provide technical and operational recommendations to the Board. Its members include:

Mark Archer	Dir., Henry County ECD	(West , Tier III)
Roger Hager	Dir., Claiborne County ECD	(East, Tier IV)
Bob Moore	Dir., Gibson County ECD	(West TN, Tier III)
Chris Masiongale	Dir., Overton/Pickett	(Middle, Tier IV)
Allen Muse	Cingular	(Middle)
Jamison Peeveyhouse	Dir., Weakley County ECD	(West TN, Tier III)
Jimmy Peoples	Dir., Hamblen County ECD	(East, Tier III)
Larry Potter	Dir., Morgan County ECD	(East, Tier V)
Buddy Shaffer	Dir., Sumner County ECD	(Middle, Tier III)

During its April 2007 meeting, the TECB voted to form a Policy Advisory Committee to study and advise on policy matters, particularly issues impacting both 911 and other governmental agencies and those arising during legislative sessions. Committee members were intended to reflect a balance of interests, locations and demographics, and include representatives of ECDs of various sizes and locations, local governments, and other 911 technical experts.¹² Its members include:

1. David Connor	Exec. Dir., County Comm.'s Assn.	(Middle TN)
2. Colleen Edwards ¹³	Former Interim Policy Chief, TRA	(Middle TN)
3. Mark Blackwood	Dir., Maury County EMA	(Middle TN)
5. John Lowry	President, TN Assn. Chiefs of Police Chief, Johnson City P.D.	(East TN)
6. David Baxter ¹⁴	Murfreesboro Fire Chief President, TN Fire Chiefs Assn. Member EMS Bd.; Rutherford County ECD	(Middle TN)
7. Bob Kirk	Alderman, Dyersburg TACIR Member	(West TN)
8. Raymond Chiozza	Dir., Shelby County ECD	(W. TN, Tier I)
9. Jennifer Estes	Dir., Loudon County ECD President -- TENA	(E. TN, Tier III)
10. Theda Bramlett ¹⁵	Dispatch Sup'r., Bradley County ECD ECD Board Member, Polk County ECD Former President, TENA	(E. TN, Tier II) (E. TN, Tier V)
11. Johnny Cheatwood	Dir., Lawrence County ECD	(M. TN, Tier III)

¹² Members were selected and approved during the August 2007 Board meeting.

¹³ Mrs. Edwards has since resigned and was replaced during the November 2008 meeting with Kim Augustine, Director of the Madison County ECD and Secretary of TENA.

¹⁴ Chief Baxter recently retired and has resigned from the Committee.

¹⁵ Ms. Bramlett has since resigned as was replaced during the November 2008 meeting with Chris Masiongale, Director of Overton-Pickett Counties ECD and former TENA president.

- | | | |
|--------------------|---------------------------------------|------------------|
| 12. Wayne Anderson | Sheriff & ECD Member, Sullivan County | (E. TN, Tier II) |
| 13. Jimmy Turnbow | Dir., Wayne County ECD | (W. TN, Tier V) |

During its April 2007 meeting, the TECB authorized the Committee to consider the following issues:

- 1) What is the role of local governments with 911 and dispatching? How should the costs of dispatching be allocated? Should the state have written guidelines regarding local government contributions to 911?
- 2) What are the best geographical boundaries for ECDs? Should state law be changed to create a limit of one ECD per county? Should the law or TECB policies be changed to encourage greater consolidation of ECDs?
- 3) Should the state increase dispatcher training oversight; for example, certification of courses, enforcement of training requirements? If so, should the oversight be imposed through legislation or regulation, and should the responsibilities be assigned to the TECB or another agency?
- 4) Should the TECB's authority over ECDs and PSAPs that are not affiliated with ECDs be clarified or altered?

During the January and May 2008 TECB meetings, the Board authorized additional issues for consideration by the Policy Advisory Committee:

- 1) Whether the current 911 funding programs and models are providing sufficient support to ECDs.
- 2) Whether to take action to assure the accuracy of 911 location functionality in PBXs and multi-line phone systems.

FCC Petition on Harassing Non-Initialized 911 Calls

On February 14, the TECB filed a petition requesting the Federal Communications Commission ("FCC") to open an inquiry into the growing national problem of harassing and fraudulent 911 calls from discarded and disconnected cell phones, also called "non-initialized phones." These calls can divert valuable 911 resources from callers who are truly in need of emergency assistance. FCC call forwarding rules, which generally require wireless carriers to transmit all wireless 911 calls, including those made from non-initialized phones, to 911 call centers, have been interpreted to prohibit wireless carriers from intervening when repeated harassing calls become disruptive of 911 resources. The TECB drafted the petition and the signatories included the states of Tennessee, Michigan, Montana, New Jersey and Washington and National Emergency Number Association ("NENA"), the National Association of State 911 Administrators ("NASNA") and APCO.

After filing, the Executive Director joined the presidents and vice presidents of NENA and APCO and their lawyers at FCC to discuss the petition, meeting with Chairman Martin, Commissioners Adelstein, McDowell and Tate and Chief Poarch of the Public Safety and Homeland Security Division.

The FCC granted the petition on April 11 and issued a Notice of Inquiry. The FCC then requested comment, analysis, and information on three specific areas: "(1) the nature and extent of fraudulent 911 calls made from NSI devices; (2) concerns with blocking NSI phones used to make fraudulent 911 calls, and suggestions for making this a more viable option for carriers; and (3) other possible solutions to the problem of fraudulent 911 calls from NSI handsets." Since the close of the comment period in July 2008, the FCC has taken no action.

Next Generation 911 Infrastructure Modernization Project

In September of 2006, the Board unanimously voted to proceed with a project to modernize the state's aging analog 911 infrastructure. The project, referred to as Next Generation 911 ("NG-911"), involves construction and management of an internet protocol platform that will improve 911 call delivery, enhance interoperability, and increase the ease of communication between ECDs, allowing immediate transfer of 911 calls, maps, photos, caller information and other data statewide. Prior to its decision, the Board commissioned and considered a feasibility study on the project by its technical consultants, R.L. Kimball & Associates.

In early 2007, multiple meetings were held in an effort to identify the stakeholders and opportunities for the NG-911 network. Listed below are the primary goals and objectives of this project:

- Improve public safety for citizens of and visitors to Tennessee;
- Equalize service across the state, increasing functionality and capabilities for all PSAPs;
- Improve call transfer functionality across jurisdictions, including LATA boundaries;
- Improve communications between PSAPs;
- Facilitate transfer of GIS data across jurisdictional boundaries;
- Prepare PSAPs for future 9-1-1 technologies (telematics, VoIP, ACN, etc.);
- Provide a cost effective means of PSAP backup and fail over (call rerouting);
- Improve reliability and redundancy in the 9-1-1 delivery network;
- Transition E9-1-1 related network costs from ECDs to the ECB;
- Facilitate a cooperative project initiative involving all stakeholders and other potential partners in Tennessee.

In the fall of 2007, the Office of Information Resources ("OIR") in the Tennessee Department of Finance and Administration issued a Request for Proposal ("RFP") for a statewide, secure Internet Protocol ("IP") network to serve certain state agencies including the Tennessee Bureau of Investigation. The TECB entered into negotiations with OIR staff to determine whether this network would be sufficiently robust to serve the needs of the NG-911 project.

In the summer of 2008, the successful bidder on the RFP, AT&T Corporation, was selected. After close review of the successful bid by the Board's technical consultants, the Board authorized staff to enter into negotiations regarding use of the state's IP platform.

Tracking of Wireless Misroutes

During the 2006-2007 fiscal year, the Board has taken an active role in tracking and correcting misrouted wireless 911 calls. Misroutes are 911 calls that are routed to a PSAP that is not in the same county or a county adjacent to the caller, often due to programming errors by the carriers. Generally, calls sent to an adjacent county are due to tower placement, an issue that cannot be corrected at the present time, rather than misrouting. During the fiscal year, 7

misroutes were reported and were either corrected by the carriers involved or deemed to be acceptable due to the limited availability of towers required for triangulation to be effective.

Misroutes

A misroute was reported on July 21 in Benton County after the ECD's PSAP received a 911 wireless call from a Cricket phone originating in Benton County, Mississippi. The Cricket phone reportedly had been misrouted off a Verizon Wireless tower. The problem was fixed by July 29 when corrections were made to the routing instructions for the tower.

On June 23, 2008, some of Maury County's wireless calls defaulted to Nashville Metro. Additional communications between Nashville Metro personnel and other PSAPs indicated the problem affected Giles, Lawrence, and Montgomery Counties. The problem appeared to be corrected until July 9 when Maury County experienced similar problems with some Cricket calls, which appeared to be due to a default routing issue. Nashville Metro is the default center for many misrouted calls in middle Tennessee and was commended for its willingness to handle the extra call load.

While the above mentioned misroutes were being investigated, Staff discovered that AT&T Business Systems had changed its 911 repair number without notifying the individual districts or the TECB. On July 30, the TECB Director of E-911 Technical Service, Rex Hollaway, sent all ECDs a technical bulletin with many of the NOC numbers, including AT&T's new one.

Increases to the Emergency Telephone Service Charge on Landlines

Between July 1, 2007 and June 30, 2008, four of the state's 100 ECDs applied for an increase to the locally-collected emergency telephone service charge on landlines imposed in its service area. During its October 2007 meeting, the Board approved requests for rate increases by Knox and Fayette County ECDs. Washington County ECD's request was approved during the January 2008 meeting. In May, the Board approved Grundy County ECD's request. Each of these districts requested to increase their rates to the statutory maximum of \$1.50 per residential line and \$3.00 for business lines for specific purposes. Knox County ECD's intent was to update equipment and reduce its debt. The purpose for Fayette County ECD's request was to purchase equipment and add a new dispatch station. For both Grundy and Washington County ECDs the intent was to replace aging equipment, provide new technologies to enhance service and provide salary increases to employees. Grundy County ECD also sought the increase in order to maintain funding for dispatching and to fund the position of a full time director.¹⁶

As of June 30, 2008:

- 40 of the 100 ECDs have landline rates at the statutory maximum of \$1.50 for residential lines and \$3.00 for business lines (requiring a referendum or request to TECB)

¹⁶ The following conditions apply to all ECD rate increases. First, within three (3) years of the date of approval, ECDs must submit a financial report to the TECB consistent with TECB Policy No. 14 (15), at which time the TECB will consider the propriety of maintaining the rate. Further, should the current contributions to the ECD from other governmental entities be reduced, the TECB will revisit its decision to increase the service charge.

- 48 of the 100 districts have rates that are at or below the maximum amount that districts can set for themselves of \$0.65 for residential lines and \$2.00 for business lines:
 - 9 of the 100 districts have set their landline rates for residential and/or business lines below the maximum districts can set for themselves (below \$0.65 for landlines and \$2.00 for business lines)
 - 35 of the 100 ECDs have set their rates at the maximum rate districts can set for themselves (at \$0.65 for landlines and \$2.00 for business lines)
- 13 of the 100 ECDs have rates above \$0.65/\$2.00 and below \$1.50/\$3.00.

The average monthly residential service charge in Tennessee is \$0.98. As of February 2006, the national average for the 40 states that have similar wireline fee structures was \$0.81.¹⁷

Financially Distressed Districts

The Board's statutory responsibilities include monitoring the financial health of the ECDs. Districts that are deemed to meet the statutory definition of financial distress are subject to the Board's supervision and evaluation. Tenn. Code Ann. § 7-86-304 originally defined financial distress through specified evidence revealed in annual audits. In 2004, that section was amended at the Board's request to provide alternative criteria that did not require waiting for the completion of annual audits.

A district is deemed financially distressed if its annual audits show that the district:

- Has a negative change in net assets for a period of three (3) consecutive years;
- Has deficit total net assets; or
- Is in default on any indebtedness.

Notwithstanding annual audits, the Board may determine that a district is financially distressed if it:

- Is the subject of an IRS lien; or
- The TECB determines that the district cannot satisfy its financial obligations to the extent that continued operation is at risk; or
- The district has defaulted on indebtedness due to insufficient funds, the default is not cured within 60 days and the TECB determines that the district cannot satisfy its financial obligations to the extent that continued operation is at risk.¹⁸

The consequences of being deemed financially distressed include:

- The district is subject to the supervision and evaluation of the TECB.

¹⁷ *Emergency Challenge: A Study of E-911 Funding Structure in Tennessee; A TACIR Report to the General Assembly*, p. 68 (TACIR 2006).

¹⁸ Tenn. Code Ann. § 7-86-304(d).

- The TECB may prescribe the structure of the landline rates of the district up to the statutory maximum.
- Under Board Policy No. 16, financially distressed districts are to remain subject to the supervision and evaluation of the Board for a period of not less than two consecutive years of positive cash flow.
- Under Board Policy No. 41, financially distressed districts must provide the TECB with copies of all ECD meeting minutes and financial reports from every regularly scheduled meeting no later than 7 days after approval or each meeting respectively.

Ten districts have been determined to be financially distressed since the Board was created in 1998:

- (1) Campbell County ECD, a Tier III¹⁹ district, was deemed distressed in 2/01; rates raised to \$1.15/\$2.50 in 4/01; the city of LaFollette created a separate ECD from Campbell County in 1996 which reduced the landline income substantially; rates raised to \$1.50/\$3.00 in 6/06; leased from financially distressed status in January 2008.
- (2) Pickett County ECD, a Tier V district, was deemed distressed in 12/00; it merged with Overton County ECD in 10/01; rates raised to \$1.50 on residential lines, \$3.00 on business lines in 10/01; 2 consecutive years of positive cash flow after merging with Overton County ECD.
- (3) Hawkins County ECD, a Tier III district, was deemed distressed in 2/01; rates raised to \$0.90/\$2.25 in 4/01; 2 consecutive years of positive cash flow.
- (4) Cocke County ECD, a Tier III district, was deemed distressed in 4/01; rates raised to \$1.15/\$2.50 in 6/01; 2 consecutive years of positive cash flow.
- (5) McNairy County ECD, a Tier IV district, was deemed distressed in 4/01; rates raised to \$1.15/\$2.50 in 6/01; 2 years positive cash flow.
- (6) Morgan County ECD, a Tier V district, was deemed distressed in 4/02; rates raised to \$1.50/\$3.00 in 4/02; 2 years positive cash flow.
- (7) Giles County ECD, a Tier IV district, was deemed distressed in 7/04; rates raised to \$1.50/\$3.00; 2 consecutive years positive cash flow; released from financially distressed status during the October 2007 Board meeting.
- (8) Hancock County ECD, a Tier V district, was deemed distressed in 4/06; rates raised to \$1.50/\$3.00.

¹⁹ The TECB developed the Tier methodology as a means of ranking ECDs by the population they serve based on data from the 2000 U.S. Census and landline and wireless fee revenues. The Tiers rank from Tier I, which includes the four largest ECDs to Tier V, which includes the 33 ECDs with the lowest population and incomes from wireline and wireless sources.

- (9) Polk County ECD, a Tier V district, was deemed distressed in 4/06; 2 consecutive years positive cash flow; released from financially distressed status during the February 2007 Board meeting.
- (10) Jackson County ECD, a Tier V district, was deemed distressed in 4/07; rates set at \$1.50/\$3.00 in 6/01 by application.²⁰

Of the 10 ECDs that have been deemed financially distressed pursuant to Tenn. Code Ann. § 7-86-304(d), Hancock and Jackson remain so. During the 2007-2008 fiscal year, there were fewer financially distressed ECDs than at any prior time since the TECB was created.

²⁰ Jackson County ECD's financial difficulties arose primarily from a 2002 loan agreement for over \$600,000, with a balloon payment. The loan was to purchase equipment. The ECD also experienced management problems in 2004 requiring Board involvement and financial assistance.

Illustration Comparing Implementation of Non-wireline Phase II 911 Service For Tennessee and the United States

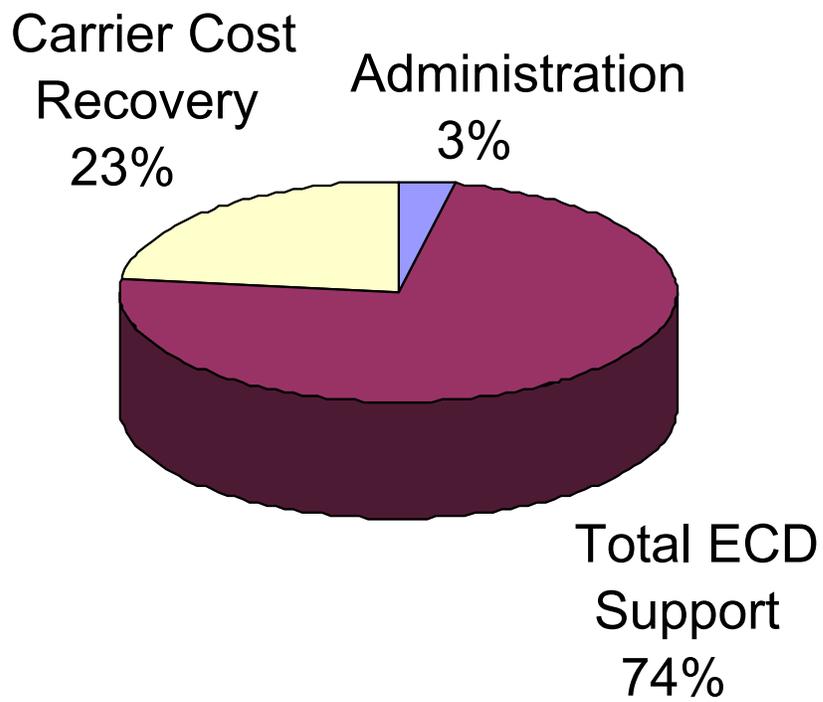

All public safety answering points (“PSAPs”) affiliated with Tennessee’s 100 emergency communications districts (“ECDs”) are E-911 Phase II ready, meaning that each possesses the equipment and technology to automatically plot the location of 911 calls from properly equipped non-wireline devices such as cell phones. Tennessee was the third state in the nation to reach this milestone, in April 2005. These PSAPs are also equipped to receive 911 calls and location information from Voice over Internet Protocol (“VoIP”) devices. Tennessee’s ECDs are in compliance with all applicable E-911 directives issued by the Federal Communications Commission.

Source of map presented below is the National Emergency Number Association.

ERRATUM

TO: Readers of the Annual Report
FROM: James C. Barnes, Accounting Manager
DATE: April 1, 2009
RE: Corrections to 2008 Annual Report

The following errors were discovered after the Annual Report for Fiscal Year 2008 was printed.

Appendix page 22 entitled "Amount of 25% Distribution to Wireless Funds for 5 Years" actually included the total amounts of the 25% distributions from FY2000 for an eight year period instead of five years. Also the following errors on this schedule have been noted:

Data for FY2006 for Gibson County shows \$77,794.68 and should be \$91,694.69.
Data for FY2006 for Grainger County shows \$35,280.31 and should be \$39,340.42.

Appendix pages 26 and 27 entitled "Status of Funding Support to ECDs from 7/1/01 Through 6/30/08" did not include data from FY2008. Replacement pages have been generated to include FY2008 data and also to include the 25% funds provided. The replacement pages are attached.

We sincerely apologize for any problems or inconvenience these errors may have caused.

**STATUS OF FUNDING SUPPORT TO ECDS From 7/1/01 Through 6/30/08
INCLUDES 25% DISTRIBUTIONS, REIMBURSEMENTS, GRANTS AND OPERATIONAL FUNDING**

All amounts are rounded to the nearest dollar.
