Emergency Planning/Preparedness

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.10 2014

Fire Inspector I

Skill Sheet – INSPI - 16

Given field observations, copies of emergency plans, and records of exercises, the candidate shall verify that emergency planning and preparedness measures are in place and have been practiced, so that plans are prepared and exercises have been performed in accordance with applicable codes and standards and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Verifies that an emergency preparedness plan is in place					
2. Reviews written plan as it applies to codes and standards					
3. Reviews documentation of emergency plan exercises					
4. Uses field observations to confirm emergency preparedness					
5. Identifies the document deficiencies in the emergency plan according to policies of the jurisdiction					
6. Reports deficiencies according to the policies of the jurisdiction					
Candidate must successfully perform 5/6 steps including ALL CRITICAL POINTS		Score: ___/6		Score: ___/6

Emergency Site Access

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.11 2014

Fire Inspector I

Skill Sheet – INSPI - 17

Given field observations, the candidate shall inspect emergency access for an existing site, so that the required access for emergency responders is maintained and deficiencies are identified, documented, and corrected in accordance with the applicable codes, standards, and policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Identifies emergency access requirements based on scenario/situation					
2. Determines if required emergency access is being maintained, utilizing measuring tools if necessary					
3. Identifies deficiencies with site access according to applicable codes, standards and local jurisdiction policies					
4. Documents any deficiencies according to codes, standards, policies					
5. Assures deficiencies are corrected according to codes, standards, policies					
Candidate must successfully perform 4/5 steps including ALL CRITICAL POINTS		Score: __/5		Score: __/5

Code Compliance/Incidental Storage

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.12 2014

Fire Inspector I

Skill Sheet – INSPI - 18

Given field observations and inspection guidelines from the AHJ, the candidate shall verify code compliance for incidental storage, handling, and use of flammable and combustible liquids and gases from an actual field inspection, so that applicable codes and standards are addressed and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Uses observations or learning activity information to determine issues related to code compliance for incidental storage or flammables/combustibles					
2. Verifies code compliance for storage, handling and use of flammable and combustible liquids					
3. Verifies code compliance for storage, handling and use of flammable and combustible gases					
4. Identifies applicable codes, standards and guidelines used to determine compliance					
5. Identifies and communicates effectively any deficiencies according to codes, standards, and guidelines

Code Compliance/HazMat

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.13 2014

Fire Inspector I

Skill Sheet – INSPI - 19

Given field observations, the candidate shall verify code compliance for incidental storage, and use of field hazardous materials, so that applicable codes and standards for each hazardous material encountered are addressed and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Uses observations or learning activity information to determine issues related to code compliance for incidental storage of hazardous materials					
2. Verifies code compliance for storage, handling and use of hazardous materials					
3. Identifies applicable codes, standards and guidelines uses to determine compliance					
4. Identifies any deficiencies according to codes, standards and guidelines

Fire Inspector I

Fire Growth Potential

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.14 2014

Skill Sheet – INSPI - 20

Given field observations, the candidate shall recognize a hazardous fire growth potential in a building or space, so that the hazardous conditions are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Recognizes hazardous fire growth potential					
2. Identifies and documents conditions contributing to the potential situation					
3. Identifies applicable codes, standards and guidelines uses to determine compliance					
4. Identifies remedies for the hazardous conditions					
5. Documents and reports deficiencies according to jurisdiction policies

Code Compliance

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.15 2014

Fire Inspector I

Skill Sheet – INSPI - 21

Given a learning activity or observations from an actual field inspection, the candidate will verify code compliance for a specific fire protection issue so that the applicable codes and policies are identified, and compliance is determined. The candidate will prepare written correspondence to the responsible party outlining the issue, referencing the appropriate codes and standards, and any acceptable ways to correct the deficiency or problem.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Identifies fire safety issue in writing					
2. Notes appropriate fire protection and prevention practices					
3. Lists acceptable way to correct deficiency/problem					
4. Includes all pertinent information					
5. Writes correspondence that is clear and legible					
6. Uses appropriate spelling, grammar and punctuation					
7. References applicable codes and standards appropriately					
8. Reports deficiencies according to codes, standards, and policies of the agency					
Candidate must successfully perform 6/8 steps including ALL CRITICAL POINTS		Score: __/8		Score: __/8

Fire Inspector I

Flow Testing

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.16 2014

Skill Sheet – INSPI - 22

Given fire flow test equipment and an installed water distribution system, the candidate shall verify fire flow for a site, so that required fire flows are in accordance with applicable codes and standards and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction.

Expected time to complete skill(s) is 20 minutes

Performance Steps	Test		Retest	
	P	F	P	F
Safely performs the following steps:				
1. Assures proper use of personal protective equipment and utilizes data gathering devices as necessary				
2. Locates personnel at test hydrant and all flow hydrants, as necessary				
3. Removes cap from test hydrant and attaches pressure gauge				
4. Assures all remaining caps are snug and opens hydrant				
5. Bleeds air from pressure gauge using petcock (if applicable)				
6. Reads and records static pressure on test hydrant pressure gauge				
7. Removes cap(s) from the outlet(s) on the flow hydrants				
8. Checks and records the hydrant coefficient				
9. Opens flow hydrants, as necessary				
10. Records velocity pressure of flow hydrants using pitot gauge				
11. Records residual pressure on test hydrant				
12. Slowly closes the flow hydrants, assures drainage and replaces caps				
13. Closes test hydrant and replaces caps				
14. Records all results				
15. Completes all skills in a safe manner				
Candidate must successfully perform 11/15 steps including ALL CRITICAL POINTS	Score: __/15		Score: __/15

Fire Flow Test Computation-Graphical Analysis

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.16 2014

Fire Inspector I

Skill Sheet – INSPI - 23

Given the provided learning activity and water supply data, the candidate will verify fire flow for a site, determine flow results and graph them accordingly on the paper provided in order to determine available fire flow in GPM at 20 psi residual pressure. The candidate will verify that flow results are in accordance with the applicable codes and standards where any deficiencies should be identified, documented and reported according to agency and procedures.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Determines which GPM scale should be utilized					
2. Locates and plots the static pressure on the vertical scale at 0 GPM					
3. Locates the total water flow measured during the test on the chart					
4. Locates the residual pressure noted during the test on the chart					
5. Plots the residual pressure above the total water flow measured					
6. Draws a straight line from the static pressure point through the residual pressure point on the water flow scale					
7. Reads the GPM available at 20 psi residual and records the figure					
8. Identifies deficiencies, documents and reports in accordance with policies and procedures of the jurisdiction					
Candidate must successfully perform 6/8 steps including ALL CRITICAL POINTS		Score: __/8		Score: __/8

Fire Flow Test Computation-Mathematical Method

Reference source: NFPA 1031, *Standard for Professional Qualifications for Fire Inspector and Plans Examiner*, 4.3.16 2014

Fire Inspector I

Skill Sheet – INSPI - 24

Given the provided learning activity and water supply data, the candidate will mathematically compute the available fire flow for the site and verify its appropriateness for the site given applicable codes and standards where any deficiencies should be identified, documented and reported according to agency policies procedures.

Expected time to complete skill(s) is 20 minutes

Performance Steps		Test		Retest	
Safely performs the following steps:		P	F	P	F
1. Determines the h r factor (pressure drop to residual pressure) according to the table provided					
2. Determines the h r factor (pressure drop during test)					
3. Multiplies Qf (flow during test) by correct h r factor from table provided					
4. Divides figure determined from line 3 by the correct hf factor from table provided = Qr					
5. Correctly determines Qr (flow available at desired residual pressure)					
6. Identifies deficiencies, documents and reports in accordance with policies and procedures of the jurisdiction					
Candidate must successfully perform 5/6 steps including ALL CRITICAL POINTS		Score: __/6		Score: __/6
