

Instructions to remove read only permissions from the NFIRS 5.x client directory.

You need to be logged in as an administrator to perform these steps. If you do not have administrator privileges on your machine, please contact your system administrator to perform these steps for you.

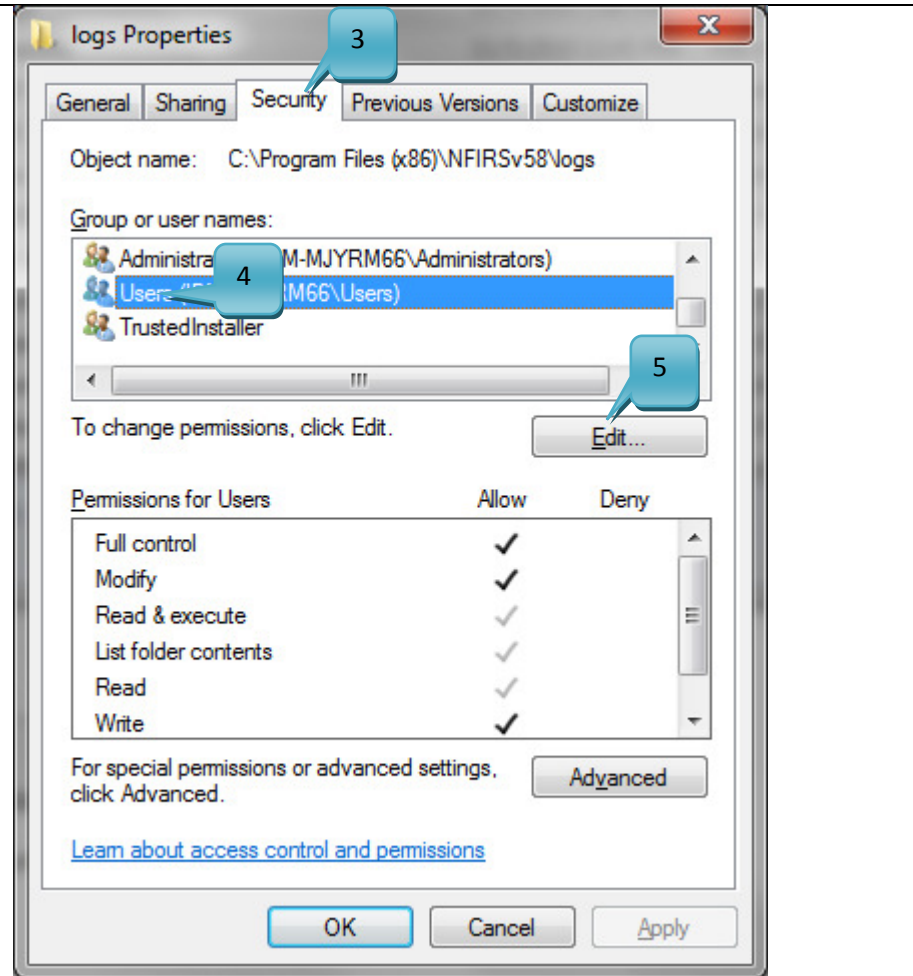

1. Navigate to the directory where the NFIRS 5.8 client is installed. By default this is "C:\Program Files (x86)\NFIRsv58".
2. Right click on the logs directory and select the properties option. You will notice a screen similar to the one on the right.

3. Click on the security tab.

4. Find the line that says “Users (Your Computer Name\Users)” under the “Group or user names:” area and click on it to highlight it.

5) Click on edit button.

6) . On this “permissions screen” find the line that says Users (Your Computer Name\Users) under the “Group or user names: “ area and click on it to highlight it. (Please note though the step is similar to the one before, it is a different screen)

7) On the permissions area make sure Full Control is checked under the allow column.

8) Click on apply and make sure the information is saved.

9) Click ok and exit the pop up screens.

10) Repeat the same steps 2 to 9 for the Cache directory. On step 2 select the Cache directory instead on the logs directory.
