RE: Tennessee Life & Health Guaranty Association

DATE: October 1, 1990

There appears to be confusion among some insurers about whether credit life companies and credit accident and health companies were intended to be members of the Guaranty Association. The Tennessee Life and Health Guaranty Association Act states that it includes life, accident and health coverages without reference to any specific lines of coverage. It is the Department position that all life, accident and health coverages in whatever form they may take, including credit life and credit accident and health, are included within the Act.
