

**BILL HASLAM**  
GOVERNOR  
STATE OF TENNESSEE

January 13, 2019

Mr. Scott Hamilton  
Executive Director  
Appalachian Regional Commission  
1666 Connecticut Avenue, N.W.  
Washington, D.C. 20009-1068

Dear Mr. Hamilton:

It is my pleasure to submit Tennessee's State Appalachian Strategy Statement for the 2019 fiscal year. This is a plan and corresponding strategy for the development of Appalachian Tennessee, not merely for the expenditure of ARC funds.

This document was prepared with my understanding and involvement. If you have any questions regarding content, you may call my ARC Alternate Board Member, Brooxie Carlton, at 615-741-8806 or the ARC Program Manager, Logan McCoy, in the Department of Economic and Community Development, at 629-201-0063.

Best Regards,

A handwritten signature in blue ink, appearing to read "Bill Haslam".

Bill Haslam

Department of  
**Economic &  
Community Development**

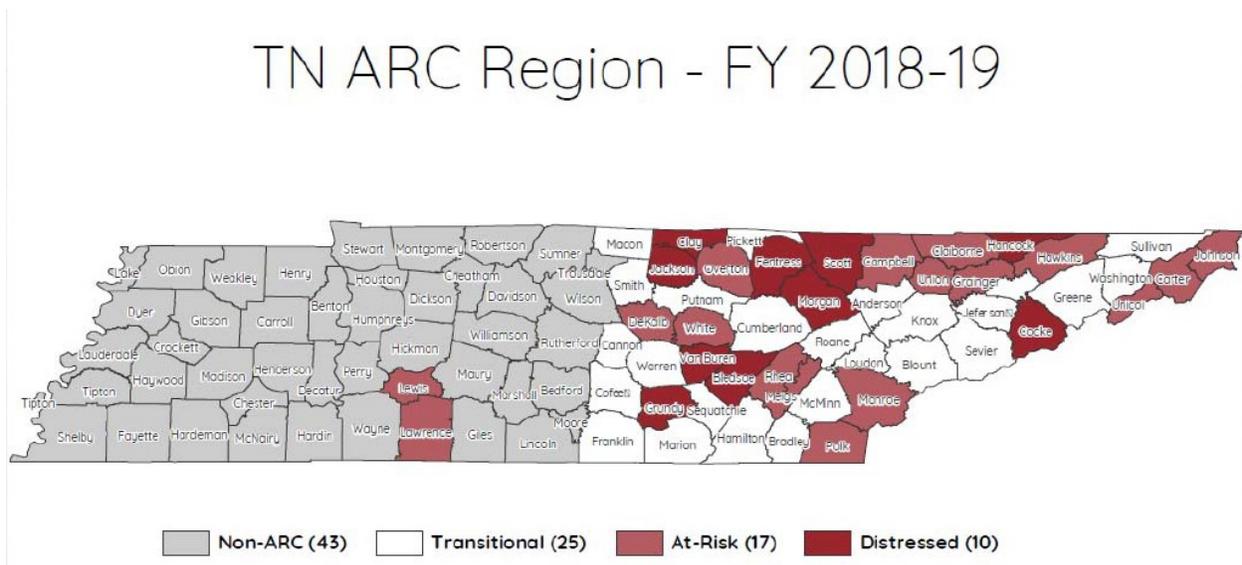

**Tennessee Appalachian Development Program  
Fiscal Year 2019 Strategy Statement**

## Introduction

Each year the thirteen member states of the Appalachian Regional Commission (ARC; [arc.gov](http://arc.gov)) submit strategy statements outlining their plans for the use of ARC funds in the region in accordance with Section 5.3 of the ARC Code. The 2019 Strategy Statement

1. Discusses the economic challenges and opportunities, as well as new developments and resources, that are impacting the state's Appalachian counties;
2. Provides an overview of targeted investment priorities for the program year;
3. Lays out specific state strategies for the state's Distressed Counties;
4. Sets forth the state operating program policies; and
5. Describes the methods used to review proposals.

Fifty-two Tennessee counties are included in the service region of the ARC. The Tennessee Department of Economic and Community Development (TNECD) administers the Appalachian Regional Commission funds in Tennessee. Within the department, the Community and Rural Development division is responsible for the day-to-day administrative duties. The Deputy Assistant Commissioner, Brooxie Carlton, is the State's Alternate member of the Commission; Logan McCoy, is the ARC Program Manager, and Lindsay Gainous is the ARC Program Coordinator.

## Economic Challenges and Opportunities

### Challenges

The Appalachian region of Tennessee faces a few key challenges:

**Infrastructure:** lack of adequate or outdated infrastructure is a persistent problem in Appalachian Tennessee. This includes water and sewer, transportation and broadband infrastructure.

Leadership: many communities in Appalachia lack leaders who can identify needs and opportunities, develop effective and measurable economic development initiatives, and create community development opportunities in their communities.

Workforce: the lack of a skilled workforce is a continuing challenge for the area. Industries that may find a rural location advantageous often face the problem of inadequate skills in the labor force. Many rural areas traditionally have not had access to educational and training opportunities that prepare the labor force to operate in a high technology work environment. This deficiency becomes more of a problem as industry utilizes evermore complex machinery and equipment. This problem is sometimes compounded by the lack of training facilities to upgrade the skills of the local labor force in the immediate area. Therefore, even if industries locate in rural areas, it is often difficult for those individuals with inadequate skills to secure and maintain employment.

### **Opportunities and Strengths**

Tennessee has considerable strengths that have led to economic growth over the last few years and that will continue to impact job creation and expansion over the coming year. The State ranks

- #5 in the U.S. for best infrastructure (CNBC, 2018)
- #3 in the Southeast and 8<sup>th</sup> in the U.S. for net manufacturing job growth since 2013 (EMSI and US Bureau of Economic Analysis)
- 1<sup>st</sup> in the nation for lowest state debt per capita (The Tax Foundation) and one of only eight states with no income tax
- #1 Shovel Ready Sites program (*Area Development*)
- 2<sup>nd</sup> in the Southeast and 15<sup>th</sup> in the nation for personal income growth since January 2011
- #4 for best business climate (*Business Facilities*)
- State of the Year for economic development for 2013 and 2014 (*Business Facilities*)
- Fastest improving state in the nation and largest growth of any state in a single testing cycle on the 2013 National Assessment of Educational Progress and #1 in Education: Race to the Top Leaders (*Business Facilities*)

Additionally, the state recorded more than 20,500 job creation commitments in 2018 which has led to a 10% private sector job growth rate since January of 2011. And, Tennessee is the only state in the nation to offer two years of tuition-free education at a community college or technical center to high school graduates (Tennessee Promise) and adults wishing to obtain, or complete, a degree (Tennessee Reconnect).

The Center for Business and Economic Research (CBER) of the College of Business Administration at the University of Tennessee prepares the Tennessee Business and Economic Outlook yearly (<http://cber.bus.utk.edu/erg/erg2015.pdf>). According to this

report, 2018 was the ninth year of consecutive economic growth and economic indicators point to that growth continuing in 2019 and 2020.

Between 2011 and 2018, the State's unemployment level dropped from 9.2 to 3.6%; however, Tennessee is below the national rate of 3.9% in December of 2018 (TN Department of Labor and Workforce Development).

TNECD has a continued focus on rural development. \$11M in programs have been announced by the TNECD Community and Rural Development division for this fiscal year to promote industrial site development, tourism enhancement, entrepreneurial development in central business districts, etc. (tnecd.com/rural). TNECD has increased the percentage of new job commitments in rural communities from 28.7 to 45.6 from 2015 to 2017.

### Tennessee Targeted Investment Opportunities

Priorities for the use of ARC funds in FY 2019 continue to be based on three factors: the priorities of Governor Haslam as expressed in the Tennessee Appalachian Development Plan, priorities of local elected officials, and areas where the greatest gaps in services exist and where ARC funds can have the greatest impact.

#### Funding Priorities

FY 2019 priorities are in the following areas which align with the 2016-2020 Investing in Appalachia's Future document, the ARC strategic plan:

ARC Investment Goal 1: **Economic Opportunities – Invest in entrepreneurial and business development strategies that strengthen Appalachia's economy**

Primary Objectives: Support entrepreneurs and local businesses; develop the infrastructure need to create new jobs including broadband infrastructure.

**ARC Investment Goal 2: Ready Workforce – Increase the education, knowledge, skills, and health of residents to work and succeed in Appalachian**

Primary Objectives: Align programs with the “Drive to 55” initiative; provide training opportunities for the current and future workforce.

**ARC Investment Goal 3: Critical Infrastructure – Invest in critical infrastructure – especially broadband; transportation, including the Appalachian Development Highway System; and water/wastewater systems**

Primary Objectives: Provide quality basic infrastructure in distressed counties and distressed areas; invest in infrastructure that creates jobs in the industrial and tourism sectors.

**ARC Investment Goal 4: Natural and Cultural Assets – Strengthen Appalachia’s community and economic development potential by leveraging the Region’s natural and cultural heritage assets**

Primary Objective: Develop local and regional tourism assets.

**ARC Investment Goal 5: Leadership and Community Capacity – Build the capacity and skills of current and next-generation leaders and organizations to innovate, collaborate, and advance community and economic development**

Primary objective: Plan for strong, sustainable economic development.

In addition to these goals and the corresponding objectives that are more fully described in the Tennessee Appalachian Development Plan, Tennessee is focused on eliminating distressed communities. Projects that create economic and community development opportunities, create jobs, promote leadership and community capacity development, and develop the distressed communities based on their assets will be prioritized.

**Tennessee Strategies for Distressed Counties**

Of Tennessee’s 52 Appalachian counties, 10 are designated as distressed by ARC for FY 2019. These counties are among Tennessee’s most distressed regardless of the

measures used and will receive special consideration and treatment in order to move them from their distressed county designation as indicated above. The TNECD ARC team will meet with each distressed county and/or their local development district to plan for the future use of ARC funding to move the counties out of distress.

## **Development Strategy**

Tennessee's strategy for reducing the number of distressed counties consists of the following elements:

### *1. Economic Development and Job Creation*

TNECD has increased the percentage of jobs created in rural and distressed communities over the last three years. We continue to monitor progress in this area and focus on creating jobs where they are most needed. TNECD Business Development staff work with the local communities daily to grow existing communities. The Community and Rural Development division as well as Launch Tennessee that is supported by TNECD work to develop and train entrepreneurs in the rural and distressed communities.

### *2. Leadership Development*

Leadership development is crucial in distressed counties to develop the skill sets required to engage citizens and organizations and to identify the needs, resources and opportunities to develop viable economic development strategies to move communities forward. TNECD works with economic development organizations, universities and other groups to train leaders in economic development and planning principles.

### *3. Infrastructure Improvements and Expansion*

The provision of infrastructure, for both quality of life and economic development purposes, is a high priority in distressed counties. For this reason, infrastructure grants in distressed counties will be funded at the maximum 80 percent. Communities are encouraged to use other sources of funding as well for infrastructure projects including USDA Rural Development, Community Development Block Grants and the State Revolving Loan fund. Regular meetings are held with these organizations to discuss potential projects and how to combine funding to address infrastructure needs throughout the region and particularly in distressed communities and utility districts. The Community and Rural Development division also works with the Tennessee Broadband Office to fund projects, particularly in distressed counties and distressed areas that expand broadband access.

### *4. Workforce Development*

Inadequate education and training in many of Tennessee's rural areas represents a serious disadvantage to economic development. The Basic Education Program, funded by the Tennessee General Assembly, and administered by the Tennessee Department of Education, represents a major initiative to equalize access to education and training. Other opportunities to enhance the capabilities of the workforce in distressed counties will be sought.

## ***5. Community Development***

Community Development and quality of life must be in place before economic development can occur. TNECD has a continued focus on promoting community and economic development in rural areas. Initiatives including Three-Star, Tennessee Placemakers and Community Development Block Grant programs, will be targeted to rural, distressed communities with the goal of eliminating distressed counties.

### **Tennessee ARC Operating Policies**

#### **Ineligible Activities**

There are certain types of projects which are inappropriate for federal funding. Except for very unusual circumstances, which will be fully documented and explained, the following types of activities will not be eligible for ARC funding in Tennessee:

1. Projects that would result in the relocation of business enterprises from another state to Tennessee.
2. Funding commitments that will influence the location of new industry or the expansion of existing business enterprises within the state. This restriction, however, will not extend to assisting a community in meeting the infrastructure or social demands that may be placed on it by a business that has already decided to locate or expand.
3. Projects that are related to the general operation of local governments. This would include the construction of city halls, courthouses, jails, fire halls, etc., as well as salaries and operating costs related to these governmental functions. This restriction will not, however, extend to programs operated by local governments that provide direct service to the residents of Appalachian Tennessee such as education or health services.
4. Political activities of any kind, at the local, state or national level, will be ineligible for ARC funding.

#### **Grant Rates**

Distressed counties may be funded to the maximum 80 percent ARC funding; At-Risk counties will be eligible for 70 percent. Transitional counties may be funded to the maximum 50 percent ARC funding, and total federal funding for all projects will be limited to 80 percent. These percentages apply to construction projects. Non-construction projects may have different requirements.

For multi-county projects, if half or more of the counties participating are distressed, the project may be funded at 80 percent. If less than half but at least one of the participating counties are distressed counties, ARC assistance may be limited to the higher of 50 percent or the average percentage applicable to the various counties in the project.

Development district funding is at 75 percent with the remaining 25 percent as non-federal if a district has at least one distressed county. All of Tennessee's five Appalachian developments have at least one distressed county.

### **Maximum Grants**

Grant amounts will not exceed \$500,000 in most cases. However, for very large and complex projects with high total costs, a \$500,000 maximum grant may place an inordinate burden of funding on the local government. Therefore, projects which reach the \$500,000 ceiling will be individually evaluated against the financial ability of the potential grantee, and grants in excess of \$500,000 will be recommended if warranted.

### **Exceptions Authorized**

The above policies are reasonable, and the state fully intends to implement them as stated. The state also recognizes that there may be instances where one size does not fit all, and unusual conditions will warrant exceptions. It is not possible at this time, however, to identify conditions which will warrant exceptions because this will be different in each situation. Therefore, each situation which warrants an exemption to the state's base policies will be fully explained when the application is submitted.

### **Notices**

The state sends emails to eligible grantees when pre-applications are due. The information is also given to the development districts and consultants as well as to a list of those who have expressed interest in ARC funding.

### **Development Districts**

Local Development Districts ([tennesseedevelopmentdistricts.org](http://tennesseedevelopmentdistricts.org)) are enabled by state statute and organized by local governments to provide planning and technical assistance to the governmental entities in their areas.

Tennessee relies on the development districts for regional and local planning, project development, application preparation and grant administration. These are extremely

useful services, especially in the rural areas and distressed counties. This will continue, and the state will look for additional opportunities to strengthen the development districts. The development districts that serve the ARC region are as follows:

First Tennessee Development District,  
ftdd.org

Upper Cumberland Development District,  
ucdd.org

East Tennessee Development District,  
etdd.org

South Central Tennessee Development District,  
sctdd.org

Southeast Tennessee Development  
District, sedev.org

### **Tennessee ARC Operating Policies**

Additional project information including the pre-application, when available, is at <http://tn.gov/e.cd/topic/appalachian-regional-commission>

Pre-applications are available in the fall and are emailed to local governments, local development districts and non-profit and community agencies that have indicated interest in the program. Pre-applications will be due in December. Notifications that full applications will be accepted and submitted to ARC generally occurs in the Spring. Full applications are due to ARC approximately six weeks after they are requested by TNECD.

Applications are reviewed by the TNECD Community and Rural Development staff for eligibility and alignment with the ARC and State goals and priorities. Applications are ranked based on need, innovation, strategy, collaboration, outcomes on people and the economy, sustainability and their metrics. All projects must also be approved by the Governor's office.

Construction projects must have a preliminary engineering report included with the pre-application. Additional funding required must be fully committed before the project can receive final approval.
