

Briggs and Stratton Master Service Technician

Aligned Programs of Study: Agricultural Engineering & Applied Technologies

Aligned Course: Agricultural and Biosystems Engineering (5963)

Description

Briggs and Stratton Master Service Technician certification holders are recognized among the best in the business. Having this certification allows students to increase their value as entry- and advanced-level workers by demonstrating advanced mastery in operational theory, governor systems, ignition systems, fuel systems and carburetors, charging systems, diagnostics, failure, and warranty analysis of small engine systems. Students who obtain the Briggs and Stratton Master Service Technician certification have marketable skills giving them a competitive edge.

Materials and Resources

Once the teacher has set up a Briggs & Stratton [PowerPortal account](#), students will have access to the Briggs & Stratton PowerPortal to use the online course material and other resources before taking the exam. Registered teachers and students will have unlimited access to materials, resources, and other materials at no cost.

Registration Procedures for Online Testing

The teacher will need to set up a [PowerPortal](#) account. After submitting the registration, Briggs & Stratton set up the account within 24 hours. The teacher will set up individual technician accounts for each student to access the exams. Each exam must be passed before advancing to the next level.
