

AutoCAD Certified User

Aligned Programs of Study: Architecture & Engineering Design

Aligned Course: Architectural & Engineering Design III (5927)

Description

AutoCAD Certified User is an Autodesk certification for individuals to validate the entry-level skills needed to effectively use AutoCAD software. Knowledge demonstrated includes creating or plotting drawings, editing objects, working with layouts, etc. This certification is an excellent way for students with about 50 hours of real-world Autodesk software experience to validate their software skills. Earning User-level certifications while in school gives students confidence as they continue to master Autodesk products and pursue Professional-level certifications in the future. Though experience and training in AutoCAD is not required to become eligible for the exams, test-takers are unlikely to succeed without it. Reviews of the various Autodesk user certifications are found [here](#).

Materials and Resources

Autodesk AutoCAD software is free and can be accessed [here](#). There are a variety of training materials and resources found on the [Certiport website](#). The AutoCAD Certified User exam objectives can be found [here](#). The Autodesk Education Community Support resources can be accessed [here](#).

Testing Sites

To find a testing site, click [here](#). Test must be taken onsite. There are two Certiport approved testing sites in Tennessee:

Tennessee College of Applied Technology - Nashville
100 White Bridge Rd.
Nashville Tennessee 37209
615-425-5525

Tennessee College of Applied Technology - Morristown
821 W. Louise Avenue
Morristown Tennessee 37814
423 586-5771

Schools may become a Certiport Authorized Testing Center testing at no additional cost if they meet the minimum technical requirements. More information can be found at [here](#).
