

AutoCAD Certified User

Aligned Programs of Study: Architecture & Engineering Design

Description

AutoCAD Certified User is an Autodesk certification for individuals to validate the entry-level skills needed to effectively use AutoCAD software. Knowledge demonstrated includes creating or plotting drawings, editing objects, working with layouts, etc. This certification is an excellent way for students with approximately 50 hours of real-world Autodesk software experience to validate their software skills. Earning User-level certifications while in school gives students confidence as they continue to master Autodesk products and pursue Professional-level certifications in the future. Though experience and training in AutoCAD is not required to become eligible for the exam, test-takers are unlikely to succeed without it. Reviews of the various Autodesk user certifications are found [here](#).

Certification Information

Test Owner

Certiport

Phone: (800) 497-8923
