

CIW Web Security Associate

Aligned Program of Study: Cybersecurity

Description

The CIW Web Security Associate is ideal for students interested in Cybersecurity. The CIW Web Security Associate certification covers security principles, such as establishing an effective security policy, and the different types of hacker activities that individuals are most likely to encounter. Students who receive this certification can pursue a career in many aspects of online and network security. CIW Web Security Associate credential is the first level of the CIW Web Security Series.
