

BASF Plant Science Certification

Aligned Program of Study: Horticulture Science

Description

The BASF Plant Science Certification verifies individuals have a solid understanding of plant science, including plant processes, nutrition, genetics, and evaluation. The certification exam also assesses major topics in the plant science industry, including water resources and measurement, crop production, fertilizer and pesticide safety, pests and diseases, and scientific classification.

Preparing to offer the certification

Exam Details

The certification exam is a 100-question, randomized assessment. Exam questions are in the format of multiple-choice, sort order, diagramming, matching, labeling, and other question types to fully evaluate an individual's competency of the industry standards. The certification exam should be proctored within a controlled environment.
