

Dremel-3D Printer Certification

Aligned Programs of Study:

- Advanced STEM Applications
- Engineering
- Technology

Description

National Coalition of Certification Centers (NC3) certifications are available to students who successfully complete the NC3 curriculum through a certified school, taught by an NC3-certified trainer. NC3 develops a standardized and comprehensive curriculum that covers multi-disciplines in conjunction with its industry partners, incorporating extensive hands-on learning for students.

The Dremel-3D Printer certification is designed to train instructors and students on the setup, functionality, operation, troubleshooting, and basic design software for the Dremel Idea Builder 3D Printer. This certification will also jump-start students' imaginations on future career choices and offer enhanced employment potential and higher productivity on the job. It is also a stackable certification with other Dremel products.

Certification Information

Test Owner

National Coalition of Certification Centers (NC3)

4940 88th Avenue

Kenosha, WI 53114

Phone: (262) 914-1515

Testing Sites/Centers

End-of-module exams are given online and can be taken at the certified center. Offsite testing can be arranged by an instructor if determined to be necessary. Testing information can be located at <http://www.nc3certs.com>.

Registration Procedures

1. Schools should begin by registering any instructors considered for TTT at one of the sites available. More information can be viewed at <http://www.nc3.net>. Please note, all multimeter training can be done online and does not require the instructor to attend TTT events.
2. For NC3 guidelines and requirements, schools should contact lisa.marshall@nc3.net
3. Once a school has fulfilled the required list of training aids and tooling for a certification package, the school will have the option to enroll for full NC3 membership if desired. This option is available on a school-by-school basis and at the school system and statewide levels.
4. NC3 will monitor and evaluate certification usage on a yearly and month-to-month basis. Instructors will be required to recertify based on the curriculum or technological changes.
5. As students complete modules, the instructor can print and present students with a stackable credential. NC3 will offer complete digital back up for all certificates and testing completed.
6. Contact lisa.marshall@nc3.net for more guidelines and program information.

Preparing to offer the certification

Required Instructor Qualifications

NC3 requires the instructor to attend a train the trainer (TTT) event at one of the multiple locations across the country. Once the instructor has completed course work and passed testing, they will be ready to instruct and certify students.

Exam Details

Testing is free for students, but the school must have the tools and certified teacher to administer the certification testing.

Materials and Resources:

More information is available online at <https://www.nc3.net/>. More detailed information is at <http://www.nc3certs.com>. Curriculum and testing can all be located under the "Instructor" tab. All testing can be accessed under this tab

Vendors with Data Sharing MOU with TDOE

TDOE does not currently have a data-sharing agreement with Certiport, therefore the burden of proof to provide evidence of earning the certification will be on the school system.
