

OSHA 10-Hour Construction Industry

Aligned Programs of Study:

- Mechanical, Electrical, & Plumbing (MEP) Systems
- Residential & Commercial Construction
- Structural Systems
- Welding

Description

The OSHA 10-Hour Construction Industry certification allows students to increase their value as entry-level workers by demonstrating mastery of the recognition, avoidance, abatement, and prevention of safety and health hazards in the general industry workplace. The program also provides information regarding workers' rights and employer responsibilities. OSHA training and certification ensures that workers are more knowledgeable about workplace hazards and their rights. Students who obtain the OSHA 10-Hour Construction Industry certification will develop a safety mindset and acquire marketable skills for a competitive edge.

Certification Information

Test Owner

Occupational Safety and Health Administration

<https://www.osha.gov/training/outreach>

Registration Procedures

1. For online testing, the school must purchase a voucher number or access code for each student or a site-license from an authorized online training provider.
2. For testing with a certified trainer, the certified trainer will provide instructions for student registration.
3. For testing by an OSHA certified teacher trainer, the training will include information regarding how to register students.

Preparing to offer the certification

Exam Details:

For OSHA recognition, the training and testing of students **must** be carried out in one of the following three ways:

1. Students use an approved online [OSHA training test owner](https://www.osha.gov/dte/outreach/training_providers.html) for training and test administration.
2. Students are taught by a certified OSHA trainer: *Certified trainers may be located by contacting:*
 - a. OSHA: https://www.osha.gov/dte/outreach/training_providers.html - see FAQs
 - b. Volunteer State OSHA Training Center: osha@volstate.edu
 - c. United Steel Workers: <http://www.uswtmc.org/programs/osha-training>
 - d. The University of Tennessee Center for Industrial Services: <https://www.cis.tennessee.edu/>
3. Students are taught by their classroom teacher, provided the teacher becomes a certified OSHA trainer by attending online training from the U.S. Department of Labor at <https://www.osha.gov/dte/outreach> or onsite training at Volunteer State Community College OSHA Training Center. The Volunteer State Community College OSHA Training Center is the only OSHA approved training site in Tennessee. For more information, contact the Volunteer State OSHA Training Center at osha@volstate.edu.

Vendors

TDOE does not currently have data-sharing agreements with any OSHA-10 vendor, therefore the burden of proof to provide evidence of earning the certification will be on the school system. Vendors must be OSHA approved. Trainers must be OSHA certified.
