

Veterinary Medical Application Certification

Aligned Program of Study: Veterinary and Animal Science

Description

The Veterinary Medical Applications Certification validates the individual’s knowledge and understanding of animal science, including the livestock industry’s history and practices, terminology, and livestock management practices. Also, the certification exam assesses major topics in the animal science industry, including genetics, reproduction, nutrition, and health management.

Exam Details

The Fundamentals of Animal Science Certification is hosted on the iCEV testing platform. The 100 question certification exam contains randomized assessment items in the format of multiple-choice, sort order, diagramming, matching, labeling, and other question types. The exam is designed to evaluate an individual’s competency of the industry standards fully. The certification exam should be proctored within a controlled environment.
