

## OSHA 30-Hour Construction Industry

### Aligned Programs of Study:

- Mechanical, Electrical, & Plumbing (MEP) Systems
- Residential & Commercial Construction
- Structural Systems

### Description

The OSHA 30 Hour Construction Industry Training course is a comprehensive safety program designed for anyone involved in the construction industry. Specifically devised for safety directors, foremen, and field supervisors; the program provides complete information on OSHA compliance issues. Within 6-8 weeks of successful completion of the course, participants will receive an OSHA 30-Hour Construction Industry Outreach, Department of Labor course completion card.

### Certification Information

Test Owner

Occupational Safety and Health Administration

<https://www.osha.gov/training/outreach>

### Registration Procedures

1. For online testing, the school must purchase a voucher number or access code for each student or a site-license from an authorized online training provider.
2. For testing with a certified trainer, the certified trainer will provide instructions for student registration.
3. For testing by an OSHA certified teacher trainer, the training will include information regarding how to register students.

### Preparing to offer the certification

Exam Details:

For OSHA recognition, the training and testing of students **must** be carried out in one of the following three ways:

1. Students use an approved online [OSHA training test owner](#) for training and test administration.
2. Students are taught by a certified OSHA trainer: *Certified trainers may be located by contacting:*
  - a. OSHA: [https://www.osha.gov/dte/outreach/training\\_providers.html](https://www.osha.gov/dte/outreach/training_providers.html) - see FAQs
  - b. Volunteer State OSHA Training Center: [osha@volstate.edu](mailto:osha@volstate.edu)
  - c. United Steel Workers: <http://www.uswtmc.org/programs/osha-training>
  - d. The University of Tennessee Center for Industrial Services: <https://www.cis.tennessee.edu/>
3. Students are taught by their classroom teacher, provided the teacher becomes a certified OSHA trainer by attending online training from the U.S. Department of Labor at <https://www.osha.gov/dte/outreach> or onsite training at Volunteer State Community College OSHA Training Center. The Volunteer State Community College OSHA Training Center is the only OSHA approved training site in Tennessee. For more information, contact the Volunteer State OSHA Training Center at [osha@volstate.edu](mailto:osha@volstate.edu).

**Vendors**

TDOE does not currently have data-sharing agreements with any OSHA-30 vendor, therefore the burden of proof to provide evidence of earning the certification will be on the school system. Vendors must be OSHA approved. Trainers must be OSHA certified.
