

Autodesk Inventor Certified User

Aligned Program of Study: Engineering, Technology, and Applied STEM

Aligned Courses: Engineering Practicum (6141) STEM IV: Practicum (6147)

Description

Autodesk Inventor Certified User is an introductory Autodesk certification for individuals interested in obtaining marketable 2D and 3D design skills. This certification addresses a wide spectrum of fundamental technical concepts. From learning how to navigate the user interface, managing files, creating 2D and 3D sketches and then taking those sketches to create and animate assemblies and sheet metal parts. This certification assesses and validates your core technical knowledge, and enhances your technical credibility and can be used to demonstrate your ability and commitment when applying for above entry-level positions.

Materials and Resources

Free Autodesk Inventor software is free and can be accessed [here](#). There are a variety of training materials and resources found on the [Certiport website](#). The Autodesk Inventor exam objectives can be found [here](#). The Autodesk Education Community Support resources can be accessed [here](#).

Testing Sites

To find a testing site, click [here](#). However, schools may become a Certiport Authorized Testing Center testing at no additional cost if they meet the minimum technical requirements. More information can be found at [here](#).

Test Owner and Registration

Certiport

Phone: (800) 497-8923
