

Cisco Certified Network Associate (CCNA)

Program of Study: Networking Systems

Aligned Course:

- Networking (6097)

Description

The 200-101 Interconnecting Cisco Networking Devices Part 2 (ICND2) exam is associated with the CCNA Routing and Switching certification. Candidates can prepare for this exam by taking the Interconnecting Cisco Networking Devices Part 2 (ICND2) course. This exam tests a candidate's knowledge and skills required to successfully install, operate, and troubleshoot a small to medium-size enterprise branch network. The exam includes topics on LAN switching technologies, IP routing technologies, IP services (FHRP, syslog, SNMP v2 and v3), troubleshooting, and WAN technologies.

The Cisco Certified Network Associate (CCNA) Routing and Switching certification allows students increase their value to employers and stay current with advances in networking knowledge and skills. The CCNA Routing and Switching certification program provides the education and training required for installing, configuring, operating, and troubleshooting larger routed and switched networks.

Materials and Resources

There are a variety of training materials and resources found on [CISCO's website](#).

Testing Sites

If the school is not an approved Pearson VUE testing site, then testing centers can be [searched online](#). However, schools may become testing centers at no additional cost if they meet minimum technical requirements. More information can be found at this link: <https://home.pearsonvue.com/For-test-centers.aspx>

Required Instructor Qualifications

You must have a Pearson VUE certified administrator proctor the test if you have obtained a testing site license.

- Training is at no cost
- Training is self-paced
- Must pass a no cost open book exam
- A Pearson VUE administrator cannot hold or be seeking a certification credential from CISCO
