

# Microsoft Technology Associate- Developer Certificate: MTA Software Development Fundamentals

**Aligned Program of Study:** Coding

**Aligned Course:**

- Coding II (6099)

## Description

**Microsoft Technology Associate (MTA)** is an introductory Microsoft certification for individuals considering a career in technology. MTA certification addresses a wide spectrum of fundamental technical concepts, assesses and validates your core technical knowledge, and enhances your technical credibility. To become a Microsoft Technology Associate, you must pass the **MTA Software Development Fundamentals** exam in the MTA Developer track. Students only need to pass this exam to become MTA certified. However, there are additional exams students can choose to further their training. MTA certifications allow students to explore career options in IT and validate their understanding of core concepts in IT infrastructure, databases, and software development. Each MTA certification can be earned in one semester and can be used to demonstrate your ability and commitment when applying for above entry-level IT positions.

## Materials and Resources

There are a variety of training materials and resources found on [Microsoft's website](#).

## Testing Sites

If the school is not an approved Pearson VUE testing site, then testing centers can be found online at <http://www.pearsonvue.com/microsoft/>. However, Schools may become testing centers at no additional cost if they meet the minimum technical requirements. More information can be found at this link: <https://home.pearsonvue.com/For-test-centers.aspx>

## Required Instructor Qualifications

You must have a Pearson VUE certified administrator proctor the test if you have obtained a testing site license.

- Training is at no cost
- Training is self-paced
- Must pass a no cost open book exam
- A Pearson VUE administrator cannot hold or be seeking a certification credential
