We will set all students on a path to success.

Tennessee Youth Risk Behavior Survey Results

2019
Best for All
We will set all students on a path to success.

Academics
All Tennessee students will have access to a high-quality education, no matter where they live.

Whole Child
Tennessee public schools will be equipped to serve the academic and non-academic needs of all students.

Educators
Tennessee will set a new path for the education profession and be the top state to become and remain a teacher and leader.
What is the Youth Risk Behavior Survey (YRBS)?
YRBS monitors six categories of health-related behaviors that contribute to the leading causes of death and disability among youth and adults, including—

- Behaviors that contribute to unintentional injuries and violence
- Sexual behaviors related to unintended pregnancy and sexually transmitted diseases, including HIV infection
- Alcohol and other drug use
- Tobacco use
- Unhealthy dietary behaviors
- Inadequate physical activity
- In addition, the YRBS monitors the prevalence of obesity and asthma and other health-related behaviors
What are the purposes of the YRBS?

The YRBS was designed to:

- Determine the prevalence of health behaviors.
- Assess whether health behaviors increase, decrease, or stay the same over time.
- Examine the co-occurrence of health behaviors.
- Provide comparable national, state, territorial, tribal, and local data.
- Provide comparable data among subpopulations of youth.
- Monitor progress toward achieving the Healthy People objectives and other program indicators.
How are the YRBS results used?

State, territorial, tribal government, and local agencies and nongovernmental organizations use YRBS data to set and track progress toward meeting school health and health promotion program goals, support modification of school health curricula or other programs, support new legislation and policies that promote health, and seek funding and other support for new initiatives.
2019 Tennessee YRBS Results
Percentage of High School Students Who Rarely or Never Wore a Seat Belt, * by Sex, Grade, † and Race/Ethnicity, ‡ 2019

- *When riding in a car driven by someone else
- †11th > 10th; H > W (Based on t-test analysis, p < 0.05.)
- All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
- This graph contains weighted results.
Percentage of High School Students Who Rarely or Never Wore a Seat Belt,* 1993-2019†

*When riding in a car driven by someone else
†Decreased 1993-2019, decreased 1993-2007, decreased 2007-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,\textsuperscript{*} by Sex, Grade, and Race/Ethnicity,\textsuperscript{†} 2019

*In a car or other vehicle, one or more times during the 30 days before the survey
\textsuperscript{†}B > W, H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,* 1993-2019†

*In a car or other vehicle, one or more times during the 30 days before the survey
†Decreased 1993-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle, * by Sex, Grade, † and Race/Ethnicity, 2019

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey
†10th > 9th, 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th, 12th > 11th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle, * 2013-2019†

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey
†No change 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.
Percentage of High School Students Who Carried a Weapon,* by Sex,† Grade,† and Race/Ethnicity,† 2019

*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey
†M > F; 10th > 11th, 12th > 11th; W > B (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Carried a Weapon,* 2017-2019†

*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey
†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]
This graph contains weighted results.
Percentage of High School Students Who Carried a Gun,* by Sex,† Grade,† and Race/Ethnicity,† 2019

*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey
†M > F; 12th > 11th; H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Carried a Gun,* 2017-2019†

*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey.
†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.
Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* by Sex, Grade, and Race/Ethnicity,† 2019

*On at least 1 day during the 30 days before the survey
†H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* 1993-2019†

*On at least 1 day during the 30 days before the survey
†Increased 1993-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

This graph contains weighted results.
Percentage of High School Students Who Were Threatened or Injured with a Weapon on School Property,* by Sex,† Grade, and Race/Ethnicity,‡ 2019

*Such as a gun, knife, or club, one or more times during the 12 months before the survey
†M > F; B > W, H > W (Based on t-test analysis, p < 0.05.)
‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Tennessee - YRBS, 2019 - QN16
Percentage of High School Students Who Were Threatened or Injured with a Weapon on School Property,* 1993-2019†

*Such as a gun, knife, or club, one or more times during the 12 months before the survey
†No change 1993-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Were in a Physical Fight,* by Sex,† Grade,† and Race/Ethnicity,‡ 2019

*One or more times during the 12 months before the survey
†M > F; 9th > 12th, 10th > 12th, 11th > 12th; B > W, H > W (Based on t-test analysis, p < 0.05.)
‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Were in a Physical Fight,* 2017-2019†

*One or more times during the 12 months before the survey
†No change 2017-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]
This graph contains weighted results.
Percentage of High School Students Who Were in a Physical Fight on School Property,* by Sex,† Grade,† and Race/Ethnicity,† 2019

*One or more times during the 12 months before the survey
†M > F; 9th > 12th, 10th > 12th, 11th > 12th; B > W, H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Were in a Physical Fight on School Property,* 1993-2019†

*One or more times during the 12 months before the survey
†Decreased 1993-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).] Data not available for 1995, 1997, 1999, 2001. This graph contains weighted results.
Percentage of High School Students Who Experienced Physical Dating Violence,* by Sex,†
Grade,† and Race/Ethnicity, 2019

*Being physically hurt on purpose by someone they were dating or going out with [counting such things as being hit, slammed into something, or injured with an object or weapon] one or more times during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey
†F > M; 11th > 9th, 11th > 12th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Experienced Physical Dating Violence,* 2013-2019†

*Being physically hurt on purpose by someone they were dating or going out with [counting such things as being hit, slammed into something, or injured with an object or weapon] one or more times during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey.

†Increased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.
Percentage of High School Students Who Were Bullied on School Property,* by Sex,† Grade, and Race/Ethnicity,‡ 2019

*Ever during the 12 months before the survey
†F > M; W > B (Based on t-test analysis, p < 0.05.)
‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Were Bullied on School Property,* 2009-2019†

*Ever during the 12 months before the survey
†Increased 2009-2019, increased 2009-2015, no change 2015-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Were Electronically Bullied,* by Sex,† Grade, and Race/Ethnicity,‡ 2019

*Counting being bullied through texting, Instagram, Facebook, or other social media, ever during the 12 months before the survey
†F > M; H > B, W > B (Based on t-test analysis, p < 0.05.)
‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Were Electronically Bullied, * 2011-2019†

*Counting being bullied through texting, Instagram, Facebook, or other social media, ever during the 12 months before the survey
†No change 2011-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.
Percentage of High School Students Who Felt Sad or Hopeless,* by Sex,† Grade,† and Race/Ethnicity,† 2019

*Almost every day for >=2 weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the survey
†F > M; 10th > 9th, 11th > 9th; H > B, W > B (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Felt Sad or Hopeless,* 2003-2019†

*Almost every day for >=2 weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the survey
†Increased 2003-2019, no change 2003-2015, increased 2015-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Seriously Considered Attempting Suicide,* by Sex,† Grade, and Race/Ethnicity, 2019

*Ever during the 12 months before the survey
†F > M (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

This graph contains weighted results.
Percentage of High School Students Who Seriously Considered Attempting Suicide, *1993-2019†

*Ever during the 12 months before the survey
†Decreased 1993-2019, decreased 1993-2011, increased 2011-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Made a Plan About How They Would Attempt Suicide,* by Sex,† Grade,† and Race/Ethnicity, 2019

*During the 12 months before the survey
†F > M; 10th > 11th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Made a Plan About How They Would Attempt Suicide, *1993-2019†

During the 12 months before the survey
†Decreased 1993-2019, decreased 1993-2009, increased 2009-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Attempted Suicide,* by Sex, Grade, and Race/Ethnicity,† 2019

*One or more times during the 12 months before the survey
†B > W, H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Attempted Suicide,* 1993-2019†

*One or more times during the 12 months before the survey
†Decreased, 1993-2011, increased, 2011-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who Had a Suicide Attempt That Resulted in an Injury, Poisoning, or Overdose That Had to Be Treated by a Doctor or Nurse,* by Sex, Grade, and Race/Ethnicity,† 2019

*During the 12 months before the survey
†B > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Had a Suicide Attempt That Resulted in an Injury, Poisoning, or Overdose That Had to Be Treated by a Doctor or Nurse,* 1993-2019†

*During the 12 months before the survey
†No change 1993-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).] Data not available for 1995, 1997, 1999, 2001. This graph contains weighted results.
Percentage of High School Students Who Ever Tried Cigarette Smoking,* by Sex, Grade,† and Race/Ethnicity,‡ 2019

*Even one or two puffs
†12th > 9th, 12th > 11th; H > B, W > B, W > H (Based on t-test analysis, p < 0.05.)
‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Ever Tried Cigarette Smoking,* 1993-2019†

*Even one or two puffs
†Decreased 1993-2019, decreased 1993-2011, decreased 2011-2019 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]
This graph contains weighted results.
Percentage of High School Students Who First Tried Cigarette Smoking Before Age 13 Years,* by Sex, Grade, and Race/Ethnicity,† 2019

*Even one or two puffs
†H > B, W > B (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Percentage of High School Students Who Got 8 or More Hours of Sleep,* 2013-2019†

*On an average school night
†Decreased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]

This graph contains weighted results.
Percentage of High School Students Who Described Their Grades in School As Mostly A's or B's,* by Sex,† Grade, and Race/Ethnicity,‡ 2019

*During the 12 months before the survey
†F > M; W > B, W > H (Based on t-test analysis, p < 0.05.)
‡All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Described Their Grades in School As Mostly A's or B's, *2013-2019†

- *During the 12 months before the survey
- †Increased 2013-2019 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade (p < 0.05).]
Percentage of High School Students Who Used the Internet or Apps on Their Cell Phone While Driving,* by Sex, Grade,† and Race/Ethnicity,† 2019

*Not counting using their cell phone to get driving instructions or to determine their location, on at least 1 day during the 30 days before the survey, among students who drove a car or other vehicle
†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; B > H, B > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Carried a Gun on School Property, * by Sex, † Grade, † and Race/Ethnicity, 2019

*On at least 1 day during the 30 days before the survey
†M > F; 12th > 10th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Currently Used an Electronic Vapor Product on School Property, by Sex,* Grade, and Race/Ethnicity, 2019

*M > F (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Used Electronic-Vapor Products Mainly Because a Friend or Family Member Used Them, by Sex,* Grade, and Race/Ethnicity,* 2019

*F > M; B > H, W > H (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Ever Took Prescription Drugs Without a Doctor's Prescription,* by Sex, Grade, and Race/Ethnicity,† 2019

*Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax, one or more times during their life
†H > B (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Currently Took a Prescription Drug Without a Doctor's Prescription,* by Sex, Grade, and Race/Ethnicity, 2019

*Such as OxyContin, Percocet, Vicodin, codeine, Adderall, Ritalin, or Xanax, one or more times during the 30 days before the survey. All Hispanic students are included in the Hispanic category. All other races are non-Hispanic. This graph contains weighted results.
Percentage of High School Students Who Exercised to Lose Weight or to Keep from Gaining Weight,* by Sex, Grade,† and Race/Ethnicity, 2019

*During the 30 days before the survey
†9th > 12th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Tennessee - YRBS, 2019 - QN96
Percentage of High School Students Who Ate More Fruits and Vegetables to Lose Weight or to Keep from Gaining Weight, * by Sex, † Grade, and Race/Ethnicity, ‡ 2019

*During the 30 days before the survey
†F > M; H > B, H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Drank More Water to Lose Weight or to Keep from Gaining Weight,\(^*\) by Sex,\(^\dagger\) Grade,\(^\dagger\) and Race/Ethnicity, 2019

*During the 30 days before the survey
\(^\dagger\)F > M; 10th > 9th, 10th > 11th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Ate Less Food, Fewer Calories, or Foods Low in Fat to Lose Weight or to Keep from Gaining Weight,* by Sex,† Grade, and Race/Ethnicity, 2019

*During the 30 days before the survey
†F > M (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.

Tennessee - YRBS, 2019 - QN99
Percentage of High School Students Who Went Without Eating for 24 Hours or More to Lose Weight or to Keep from Gaining Weight,* by Sex,† Grade, and Race/Ethnicity, 2019

*Also called fasting, during the 30 days before the survey
†F > M (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Took Some Diet Pills, Powders, or Liquids Without a Doctor's Advice to Lose Weight or to Keep from Gaining Weight, * by Sex, Grade, † and Race/Ethnicity, ‡ 2019

*During the 30 days before the survey
†10th > 9th, 12th > 9th; H > W (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Vomited or Took Laxatives to Lose Weight or to Keep from Gaining Weight,* by Sex, Grade, and Race/Ethnicity, 2019

*During the 30 days before the survey
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
This graph contains weighted results.
Percentage of High School Students Who Smoked Cigarettes to Lose Weight or to Keep from Gaining Weight, * by Sex, Grade, † and Race/Ethnicity, 2019

*During the 30 days before the survey
†9th > 10th, 12th > 10th (Based on t-test analysis, p < 0.05.)
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
