

Optional Summer Programming Scheduling Template

The Summer Programming Scheduling Template is an optional resource that can be used to support districts and schools with planning out daily schedules for Summer Programming. This template is optional, and districts and schools should use a format that best supports the implementation of programming. The times included in each sample schedule can be updated to meet local needs.

Additional resources to support districts and schools with planning for scheduling can be found on the [Learning Acceleration website](#). Sample schedules and more information on instructional time requirements can be found in the [Summer Instructional Time and Waiver Guidance document](#).
