Virtual Education Report

School Year 2018-19

Tennessee Department of Education

Introduction

Each year, the Tennessee Department of Education releases an annual report on virtual programs and virtual public schools operating in the state. In compliance with T.C.A. § 49-16-104, the report provides information on student enrollment, academic performance, as well as funding for virtual education.

Additional information regarding virtual education is available on the Tennessee Department of Education’s website.

Highlights

- In 2011, the Tennessee General Assembly enacted the ***Virtual Public Schools Act***, providing local school districts the ability to establish their own virtual public school.
- Virtual schools are public schools that “**use technology to deliver a significant portion of instruction to students via the Internet in a virtual or remote setting**” (T.C.A. 49-16-203).
- As of the 2016-17 school year, there are eleven virtual schools active in Tennessee.
- **Virtual schools must comply with the same laws and rules and regulations as traditional public schools** on curriculum standards, class size, length of the school day and school year, regular student assessments, and teacher qualifications.
- School districts may manage their own virtual schools or may contract for services with nonprofit and for-profit entities. Of the eleven operational schools, nine are operated by the school districts. Tennessee Virtual Academy in Union County is operated by K-12, Inc. and Robertson County Virtual School is operated by Connections Learning.

Virtual Schools in Tennessee

Background

In 2011, the Tennessee General Assembly passed the *Virtual Public Schools Act*, authorizing school districts to establish virtual public schools. Virtual schools are public schools that “use technology to deliver a significant portion of instruction to students via the Internet in a virtual or remote setting” (T.C.A. 49-16-203). Virtual school students take all courses online, but in some cases students may receive support in a physical location. Virtual schools must comply with the same law , rules, and regulations as traditional public schools on curriculum standards, class size, length of the school day and school year, regular student assessments, and teacher qualifications.

Any student who is eligible for enrollment in a Tennessee public school may enroll in a virtual school, with districts having the option to charge tuition if the student does not live within

Virtual schools must comply with the same laws, rules, and regulations as traditional public schools.

district borders. Students have the option of enrolling full-time or part-time. Full-time students take all of their courses online through the virtual school. Part-time students take one or more courses online while enrolled in another public school.

Virtual programs in Tennessee offer a broad range of online courses and services to reach a variety of students, from struggling to gifted, who seek personalized pathways to learning opportunities. Throughout Tennessee, virtual programs take many forms including:

- **Supplemental programs:** students may enroll in individual online courses to supplement or serve as part of a full-time program in a traditional school
- **Blended learning:** combines online and face-to-face instruction mixed throughout the school day
- **Synchronous learning:** students and instructors must be online at the same time. Instruction takes place in real time at a specific set time
- **Asynchronous learning:** students may take online courses on their own schedule. Instructors provide material, lectures, tests, and assignments that can be accessed at any time

Students with unique learning needs, including disabilities and limited English proficiency, may enroll and participate in a virtual school. Virtual schools are required to provide the services included in each special education student's Individual Education Program (IEP).

Virtual School Information

School			
Bradley County Virtual School	Bradley County	April 20, 2012	3-12
Hamilton County Virtual School	Hamilton County	January 31, 2012	K-12

Student Mobility & Attrition

Student mobility refers to the number of students who leave the school after Oct. 1 divided by total enrollment of the school. **Attrition rate** is the difference between the number of students who enter and exit after Oct. 1. Student mobility and attrition rates appear high for virtual schools; however, this is expected since they enroll students for multiple reasons, including many virtual school that do not require enrollment for a full school year.

School	District	Entering Enrollment	Exit Enrollment	Mobility Rate	Attrition Rate
Bradley County Virtual School	Bradley County	25	5	26.32	39.22
Hamilton County Virtual School	Hamilton County	8	5	7329	9.68
Memphis Virtual School	Shelby County	108	93	5.38	9.2
Metro Nashville Virtual School	Davidson County	17	18	-0.72	-1.09
Robertson County Virtual School	Robertson County	21	14	10.94	16.67
Tennessee Online Public School	Bristol City	35	38	-1.12	-1.39
Tennessee Virtual Academy	Union County	213	283	-4.08	-5.19
Tennessee Virtual On-Line School	Wilson County	19	24	-4.95	-6.67
VITAL: Upper Cumberland e-Learning Network	Putnam County	3	9	-9.84	-11.32
Tennessee Virtual Learning Academy	Washington County	3	10	-17.5	-18.92
E. B. Wilson	Sumner County	29	9	21.51	34.48

Table 7. Virtual School Student Mobility and Attrition Rates (2018-19 School Year)

Accountability

Virtual schools are public schools created by a school district and, therefore, are subject to the same accountability laws, rules, and regulations as any other public school in Tennessee. The *Virtual Public Schools Act* specifically states that virtual school students shall be subject to the regular assessments in language arts, math, science, and social studies. Like each traditional public school, virtual school accountability data is published as part of the state Report Card and available for public review.

Virtual school accountability data is published as part of the state Report Card and available for public review.

The General Assembly placed additional accountability measures on virtual schools in 2013 focusing on student achievement growth, as represented by the Tennessee Value-Added Assessment System (TVAAS). TVAAS composites are reported on a 1-5 scale and are one-year scores. If a virtual school demonstrates student achievement growth at a level 1 of “significantly below expectations” for any three consecutive years of the school’s operation, the commissioner of education has the authority to enforce an enrollment cap or direct the district to close the school.

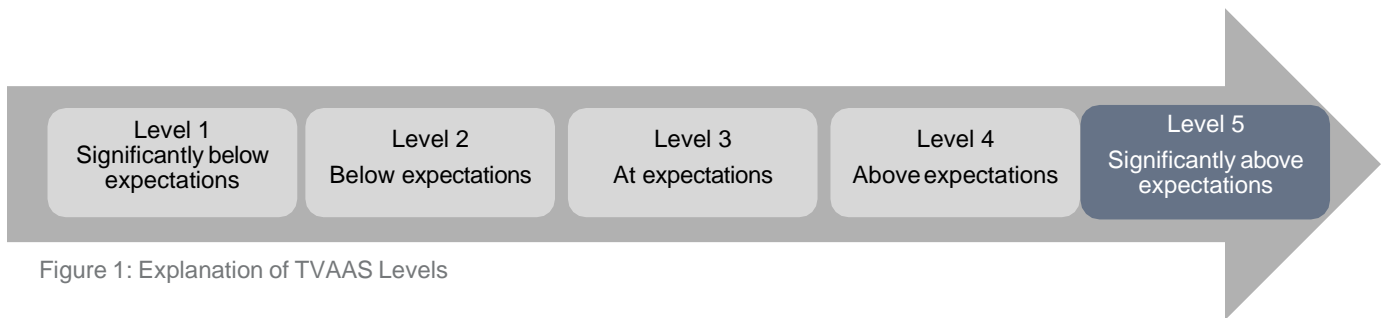

Figure 1: Explanation of TVAAS Levels

The table below shows TVAAS scores for virtual schools. In many cases TVAAS scores are not available. This is because class size tends to be lower in virtual school classrooms. In order to calculate a TVAAS score, there must be at least 10 valid tests. For virtual schools with available TVAAS scores, the scores are generally lower than the scores of the districts. The virtual school’s performance may be related to their high mobility and attrition rates since many virtual schools serve students who enroll for short periods of time.

Student Achievement Growth

School	District	Literacy		Numeracy		Literacy and Numeracy		Science		Social Studies		Overall Composite	
		SCH	LEA	SCH	LEA	SCH	LEA	SCH	LEA	SCH	LEA	SCH	LEA
Bradley County Virtual School	Bradley County	3	1	1	2	1	1	N/A	N/A	3	1	1	1

*Indicates school had insufficient data to generate TVAAS scores in this subject

N/A = Science not assessed during this academic year

Funding

Virtual schools are funded the same way as traditional public schools are funded. Per T.C.A. § 49-16-204, “a virtual school shall be provided resources as any other public school in the state. State funding allocations per basic education program (BEP) are district-based and not based on individual schools.” School districts can also use BEP funds from both local and state sources to implement and operate their virtual education programs. Districts are encouraged to apply for grants and accept donations to help fund their virtual education programs. The table below includes per-pupil expenditure for each school.

School	State Funds Generated
Bradley County Virtual School	\$XXXX
Hamilton County Virtual School	\$XXXX
Memphis Virtual School	\$XXXX
Metro Nashville Virtual School	\$XXXX
Robertson County Virtual School	\$XXXX
Tennessee Online Public School	\$XXXX
Tennessee Virtual Academy	\$XXXX
Tennessee Virtual On-Line School	\$XXXX

Virtual School and Programs Improvement Efforts

With the exception of one campus (Tennessee Online Public School in Bristol City Schools) accruing “Significantly Above Expectations” and another (Metro Nashville Virtual School) accruing “At Expectations” ratings for academic growth as measured by the Tennessee Value-Added Assessment System (TVAAS), all remaining Tennessee virtual schools with student populations large enough for reliable calculation of such metrics demonstrated overall levels of performance in the 2018-19 school year that indicate critical underlying issues of instructional effectiveness. Five of these schools (Bradley County Virtual School, Memphis Virtual School, Robertson County Virtual School, Tennessee Virtual Academy, and Tennessee Virtual Online School) accrued the lowest-possible composite levels for academic growth, with one other (E.B. Wilson) demonstrating only slightly better results that were still below state expectations.

Based on these statewide performance trends, the Tennessee Department of Education initiated a multi-pronged strategy in 2019 designed to foster instructional capacity within existing virtual schools and equip LEAs seeking to establish new virtual schools with expanded technical assistance and oversight.

- *In nearly all cases, the overall levels of achievement of each individual district exceeded those of the individual virtual school they oversee.* Therefore, TDOE has initiated expanded monitoring activities of those virtual schools demonstrating three or more consecutive years of “Significantly Below Expectations” TVAAS performance. Led by the Assistant Commissioner and supported by counterparts representing Special Populations, Standards & Materials, Data & Analytics, and other departmental divisions, the department convenes ongoing reviews of all aspects of instruction, assessment, and student support in collaboration with district and campus-level stakeholders.
- *Effective instruction in a virtual environment entails some nuances unique to that context combined with practices associated with effective teaching and learning in traditional school environments.* Recognizing this balance of competencies required for success, TDOE has commenced the development of a series of tailored tools to support virtual school and district leaders in gauging teacher and school-level effectiveness within the virtual learning environment.
- *LEAs seeking to establish new virtual schools must be provided meaningful guidance that provide clarity on state-level expectations and exemplars of practices associated with high-performing virtual schools.* In recognition of this need, TDOE has undertaken an overhaul of its new program application review process for virtual schools that will now include expanded opportunities for departmental feedback derived from fourteen explicit criteria. LEAs ultimately approved for establishment of new virtual schools will continue receiving guidance from TDOE in the form of monthly progress monitoring visits conducted jointly by the department, regional CORE representatives, and district and campus stakeholders.
