

Review the action plan considerations from the dyslexia annual report. Provide any specific suggestions or advice from the perspective of your role and your involvement with districts to inform the department's work.

Considerations	Suggestions / Advice for the Department	Suggestions for Council Activities
<p>Highlighting districts that have reporting that reflects general prevalence rates and strong coding processes (21 districts at or above 10%).</p>		
<p>Increasing communication and technical assistance to districts that have reported less than one percent of students (25 districts) receiving dyslexia-specific interventions.</p>		
<p>Working with districts to increase understanding of the purpose of reporting and reviewing their process of coding students as receiving dyslexia-specific interventions.</p>		

Considerations	Suggestions / Advice for the Department	Suggestions for Council Activities
<p>Continuing to guide districts in identifying ways to internally train their building principals and RTI² teams to understand the screening process for characteristics of dyslexia.</p>		
<p>The department should continue to increase awareness around the appropriate use of accommodations for students with basic reading needs and their implications for both daily instruction and assessments.</p>		
<p>The department should continue to support improvement in this area by providing professional learning opportunities and resources that allow districts to build knowledge around dyslexia-specific interventions <u>and</u> critically analyze the resources and instruction that is occurring for students receiving dyslexia-specific interventions.</p>
