

Correlation of Social Studies Standards, United States History and Geography

To support social studies instruction in Tennessee and in response to concerns from the field over the differences between the current (2014) and revised (2019) Tennessee Academic Standards for Social Studies, the department has created a series of correlation documents. These documents show the links between the current (2014) and revised (2019) social studies standards. They are intended to serve as a model for educators to reference as they design units and become more familiar with the revised standards.

To prepare to use this document, teachers should thoroughly review it in its entirety. **The bolded portions of the revised (2019) standards show specific areas of new content.** This delineation within the standards will allow teachers to use a targeted approach when preparing materials and lessons. Teachers should focus on acquiring materials and lessons for the parts of the standard that are bolded as they may need further preparation to teach these topics; materials aligned to the un-bolded portions of the standards may only need refinement. In addition to thoughtful preparation using this document, there are additional components for which educators will need to plan and prepare. Districts (and teachers) should use their own judgment as to how best to use this document when preparing instruction.
