This Foundational Literacy Skills Plan has been approved by the Tennessee Department of Education and meets the requirements of the Tennessee Literacy Success Act. All portions of the Foundational Literacy Skills plan were submitted to the department and approved. To view the supplemental artifacts, please contact the district directly.

Daily Foundational Literacy Skills Instruction in Grades K-2

Cheatham County Schools use a foundational skills curriculum grounded in reading science and aligned to Tennessee ELA standards as approved by the state Textbook and Instructional Materials Quality Commission. This curriculum uses foundational skills as the primary form of instruction and has a designated block of time (60 minutes daily) for foundational skills instruction in grades K-2. This instructional time includes activities that build phonological awareness, phonics practice, and fluency practice in addition to comprehension and vocabulary work (“word work”). During that instruction, teachers explicitly teach a sound, the students practice the sound aloud (learning how to produce pure sound), the teacher models writing the sound, the students refer to their individual code chart on which they write the sound. Students apply the skill in independent practice (small group or individual).

For example, in first-grade unit 3, week 2, the focus skill is r-Blends. Students will learn/practice phoneme blending, blend and build words, practice spelling and dictation with r-blends. Students will have the opportunity to further their learning in small groups by reading decodable text aligned with the sounds taught in explicit instruction.

Our improvements for next year will be continued professional development during the summer and collaboration during grade-level meetings for teachers to collaborate and district grade-level collaboration during half-day professional development throughout the school year.

Daily Foundational Literacy Skills Instruction in Grades 3-5

Cheatham County School District has an integrated literacy block for grades three (3) through five (5) grounded in reading science and aligned to Tennessee ELA standards. Our curriculum materials are selected from those approved by the state Textbook and Instructional Materials Quality Commission. During the integrated ELA block that meets an evidence-based approach to applying foundational skills within daily lessons, our students receive a total of 85-90 minutes of ELA instruction. Although the daily schedule is not the same at each school, all daily instruction includes components for knowledge-building (to build and improve the ability to comprehend complex texts and apply that knowledge as they listen, read, write, think, and speak) for about 60 minutes per day and foundational skills instruction that includes fluency, grammar, morphology, spelling, and writing for at least 30 minutes per day. Our adopted curriculum also engages students in work around
fluency, vocabulary, and comprehension. The fluency, vocabulary, and comprehension skills are not taught in isolation, but are embedded within the lesson to ensure continuity, cohesion, and connection.

**Universal Reading Screener for Grades K-5. This screener complies with RTI² and Say Dyslexia requirements.**

The CCSD uses EasyCBM as the universal screener for reading. We give universal screening assessments three times a year, in the Fall, Winter, and Spring. We also use it for our progress monitoring in Tiers II and III of RTI2. The screener is listed in the Tennessee RTI² framework manual as a compliant curriculum-based measure.

**Intervention Structure and Supports**

In the fall, students are given a universal screener (easyCBM) to determine which students have a significant reading deficiency or are “at-risk”. Our school level data teams (grade-level teachers, counselors, school psychologists, and principals) review universal screener data to determine which students score at the 25th percentile or below. Those students demonstrating need are classified as in need of Tier II or Tier III instruction. Students who are tentatively classified as needing Tier II or Tier III interventions are given a diagnostic/survey assessments to determine specific deficits. Students receive daily, small-group intervention for at least 45 minutes in their area of greatest deficit.

We have research-based options for reading intervention support available to our students who are “at-risk” and/or who have been identified with a significant reading deficiency. Our recently adopted ELA curriculum contains an assessment and remediation guide in which teachers can find activities that directly address skill gaps. They can tailor this to the needs of their RTI group of students. If that intervention is not proving to be effective, more intensive, strategic interventions (such as 95 percent Group) become an option. Data teams meet every 4 ½ weeks to determine if a change in the intervention the intervention is needed. The data team also looks at other variables (attendance, engagement, student history) as part of the decision-making process before a change is made to the programming or teacher.

Our students receive explicit instruction in their area of deficit in small groups using research-based materials and strategies. These students are also screened using additional survey level assessments to determine if they have characteristics of dyslexia. Students who do demonstrate those characteristics receive intensive intervention as outlined in the “Say Dyslexia” Law using programs that meet the law’s requirements. Our district uses a research-based supplemental program as intervention for students with characteristics of dyslexia. Our district notifies families of students who demonstrate characteristics of dyslexia. Families are notified through the Progress
Monitoring Reports that the 95 Percent Group curriculum is used to support those students, as it is aligned with the International Dyslexia Association’s elements of effective reading instruction for students with dyslexia. The program is also characterized as explicit, systematic, sequential, multi-sensory, phonics-based instruction aligned to meet the individual needs of students.

Intervention takes place daily during a grade-level time in each school's master schedule designated exclusively for RTI. When students are in their RTI groups, they work on activities and tasks that make them stronger in their specific skill of need.

**Parent Notification Plan/Home Literacy Reports**

Cheatham County Schools notify parents of children in grades K-5 whose EasyCBM Benchmark scores are at or below the 25th percentile. Those students are considered “at-risk” for or having a significant reading deficiency. Letters are sent home immediately after schools complete the fall universal screening. Students' scores are communicated in parent-friendly language that provides a clear explanation of student skill gaps and the depth and extent of student needs. The parents are told what intervention their student will receive and the amount of time each day the student will receive services. We also explain the importance of being able to ready by the end of 3rd grade.

Parents are subsequently notified of their child's progress, or lack of progress, after the 4 ½ week data team meetings. In the parent progress report, data teams note any changes being made if the child is not showing sufficient progress as evidenced by progress monitoring and universal screening data. We also recommend activities that parents can do at home with their children to support the area of deficit. These communications go out to parents with students in grades K-3 three times annually and are shared in grades 4 and 5 annually. Additionally, the ELA curriculum contains parent letters in the younger grades that outline the foundational skills and knowledge domains for the coming week that will inform and equip parents to work with the child.

**Professional Development Plan**

Academic Specialists (instructional coaches) in Cheatham County will participate in the free and optional Reading 360 Early Literacy Training series. Although teachers in grades K-5 will not attend this summer, they will attend the summer of 2022. Cheatham County teachers will attend professional development through our state adopted literacy curriculum for grades K-5.
