Grade 8 Social Studies
Module 2

United States History and Geography:
Growth of the Young Nation, the
Sectionalism of the American North, South,
and West, Slavery in America,
and the Civil War
Module Goal

The goal of this module is to provide information that will help educators increase their knowledge of grade-appropriate social studies concepts, knowledge, and skills to support effective planning or modification of their existing social studies instructional units for students with significant cognitive disabilities. The module includes important concepts, knowledge, and skills for the following instructional units:

- Growth of the Young Nation (1789–1849),
- The Sectionalism of the American North, South, and West (1800–1850),
- Slavery in America (1800–1850), and
- Civil War (1830–1865).

Module Objectives

The content module supports educators’ planning and implementation of instructional units in social studies by:

- Developing an understanding of the concepts and vocabulary that interconnect with information in the module units.
- Learning instructional strategies that support teaching students the concepts, knowledge, and skills related to the module units.
- Discovering ways to transfer and generalize the content, knowledge, and skills to future school, community, and work environments.

The module provides an overview of the social studies concepts, content, and vocabulary related to Growth of the Young Nation (1789–1849), the Sectionalism of the American North, South, and West (1800–1850), Slavery in America (1800–1850), and the Civil War (1830–1865). It also provides suggested teaching strategies and ways to support transference and generalization of the concepts, knowledge, and skills. The module does not include lesson plans and is not a comprehensive instructional unit. Rather, the module provides information for educators to use when developing instructional units and lesson plans.

The module organizes the information using the following sections:

I. Social Studies Academic Standards and Related Alternate Assessment Targets and Underlying Concepts;
II. Connecting Concepts;
III. Vocabulary and Background Knowledge information, including ideas to teach vocabulary;
IV. Overview of Units’ Content;
V. Universal Design for Learning (UDL) Suggestions;
VI. Transfer and Generalize Concepts, Knowledge, and Skills;
VII. Concepts and Vocabulary Multi-Age Planning: Grades six through eight; and
VIII. Tactile Maps and Graphics.
Section I

Social Studies Academic Standards and Related Alternate Assessment Targets and Underlying Concepts

It is important to know the expectations for each unit when planning for instruction. The first step in the planning process is to become familiar with the identified academic standards and related Alternate Assessment Targets (AATs) and Underlying Concepts (UCs) covered in the module. The AATs are specific statements of knowledge and skills linked to the grade-specific social studies academic standards. The UCs are basic key ideas or concepts linked to specific AATs. UCs are a basis for developing a more complex understanding of the knowledge and skills represented in the AAT and should not be taught in isolation. It is important to provide instruction on the AAT along with the UC in order to move toward acquisition of the same concepts, knowledge, and skills.

Table 1 includes the grade 8 academic standards and related AATs and UCs addressed by this module and organizes them by the units of study. While only the academic standards targeted for the Tennessee Comprehensive Assessment Program/Alternate (TCAP/Alt) are included, instruction on additional standards will aid in student understanding. Standards that are not included still represent important content for students to master. Therefore, the AATs and UCs included in the table do not cover all of the concepts that can be taught to support progress and understanding aligned to the standards.

The Tennessee Social Studies Academic Standards include the following codes:

- C – Civics
- E – Economics
- G – Geography
- H – History
- P – People
- TN – Tennessee

Table 1. Social Studies Academic Standards and Related AATs and UCs

<table>
<thead>
<tr>
<th>Academic Standards</th>
<th>Alternate Assessment Targets (AAT)</th>
<th>Underlying Concepts (UC)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Growth of the Young Nation (1789–1849)</strong> Students analyze the aspirations and ideals of the people of the new nation.</td>
<td><strong>8.39</strong> Identify the leaders and events and analyze the impact of western expansion to the development of Tennessee statehood, including: William Blount, John Sevier, Rocky Mount, Treaty of Holston, Cumberland Gap, River systems, Natchez Trace, Jackson Purchase. (GHPTN)</td>
<td>Identify the sequence of events that led to the development of Tennessee statehood using a timeline. Identify a reason different groups of people (i.e., early settlers in Tennessee and Native Americans) need to cooperate with each other.</td>
</tr>
</tbody>
</table>

1 Instruction is not intended to be limited to the concepts, knowledge, and skills represented by the AATs and UCs listed in Table 1.

</tr>
</thead>
<tbody>
<tr>
<td><strong>The Sectionalism of the American North, South, and West (1800–1850)</strong> Students analyze the paths of the American people in the three regions of the United States from 1800 to the mid-1800s and the challenges they faced as they became increasingly sectionalized.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>8.59 Describe American settlements in Texas after 1821 and the causes for the Texas War of Independence, including the roles of David Crockett and Sam Houston in the war and the legacy of the Alamo. (GHPTN)</strong></td>
<td>Identify causes of the Texas War of Independence.</td>
<td>Identify reasons that cause disputes among groups of people.</td>
</tr>
<tr>
<td><strong>8.63 Trace the major figures and events in the discovery of gold in California and its impact on the economy of the United States, including John Sutter, and 49’ers. (CEGH)</strong></td>
<td>Identify events associated with the discovery of gold in California (e.g., people traveled to California; the population of California grew; development of new mining techniques).</td>
<td>Identify a change to a community that results from the discovery of a nearby natural resource (e.g., gold, coal or oil).</td>
</tr>
<tr>
<td><strong>Slavery in America (1800–1850)</strong> Students analyze the growth of slavery and the resulting controversies.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>8.66 Analyze the impact of the various leaders of the abolitionist movement, including John Brown and armed resistance; Harriet Tubman and the Underground Railroad; William Lloyd Garrison and The Liberator; Frederick Douglass and the Slave Narratives; and Harriet Beecher Stowe’s Uncle Tom’s Cabin, Virginia Hill and Free Hill, Tennessee; Francis Wright and Nashoba Commune; and Elihu Embree’s The Emancipator. (CEHPTN)</strong></td>
<td>Identify how the Underground Railroad helped slaves move northward to freedom.</td>
<td>Identify reasons why slaves would want to escape (such as living conditions, family structure, etc.).</td>
</tr>
<tr>
<td><strong>Civil War (1830–1865)</strong> Students analyze the multiple causes, key events, and complex consequences of the Civil War.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>8.72 Identify on a map the boundaries constituting the North and the South and delineate and evaluate the geographical differences between the two regions, including the differences between agrarians and industrialists. (EGP)</strong></td>
<td>Identify differences between agriculture in the South and industries in the North.</td>
<td>Identify products manufactured in the North or products grown in the South using a historical resource map.</td>
</tr>
</tbody>
</table>
**Section II**

**Connecting Concepts**

Grade-level social studies content includes Connecting Concepts, concepts that connect information between different people, places, events, and time periods. Helping students make connections between these types of concepts and new content information supports comprehension of the concepts, knowledge, and skills as well as transference and generalization (see Section VI for more information). Connecting Concepts that are specific to this module connect to content across the units within the module as well as across modules and across grades.

A Connecting Concept is a common link between multiple standards and units of study. The Connecting Concepts, by being revisited and linked to multiple units of study, become a strong foundation of understanding and support the students in learning new concepts. For example, understanding how natural resources affect a community is a Connecting Concept that applies to the study of population growth in California due to the Gold Rush and the different economies of the agrarians of the South and the industrialists of the North. Some Connecting Concepts may apply across multiple content areas and instructional emphases (e.g., science when studying Earth resources such as minerals and oil).

**Teaching Connecting Concepts**

The following strategies pulled from the principles of UDL (CAST, 2011) are ways in which to teach Connecting Concepts to help students understand the concepts and make connections between different curricular content. During instruction, highlight:

- patterns (e.g., Show how leaders have shaped and continue to shape events and outcomes.),
- critical features (e.g., Emphasize the benefits and downfalls of the gold rush.),
- big ideas (e.g., The slaves gained their freedom as a result of many people’s actions to advocate for the slaves’ rights and freedoms.), and
- relationships (e.g., Make connections between the geographical features, including climate and the economies of different regions of the country.).

For example, connect the rich soil and level ground in parts of the South to an agrarian economy. In addition, build connections between familiar and new information (e.g., the connection between the local economy and that of other parts of the state or country).
Following are **Connecting Concepts** for this Content Module — Growth of the Young Nation (1789–1849), the Sectionalism of the American North, South, and West (1800–1850), Slavery in America (1800–1850), and the Civil War (1830–1865).

**Students understand:**
- how to think spatially and use a variety of maps and map tools (e.g., compass rose, legend)
- how to interpret physical and political features on a variety of maps
- how geography affects a region’s economy
- reasons people move to and/or leave places
- how natural resources affect a community
- the structure and purpose of government and its relationship to democracy and citizenship
- the rights and responsibilities of citizens of the United States
- how a political structure of a place benefits people
- benefits, reasons, and ways groups cooperate
- causes of disagreements and conflict between countries and groups of people
- ways groups of people advocate for rights and freedom
- importance of people’s actions in history
- importance of leaders to guide change
- results of leaders guiding change

**Connecting Concept Resources**

Grant Wiggins talks about “big ideas” in this article.  

This site provides examples and printable versions of graphic organizers for social studies that can be modified to meet the students’ needs.  
[https://walch.com/samplepages/050078.pdf](https://walch.com/samplepages/050078.pdf)

Teaching History has a video explaining historical thinking to teachers and an article about how to adapt documents for the classroom.

- [http://teachinghistory.org/historical-thinking-intro](http://teachinghistory.org/historical-thinking-intro)

Education Resources Information Center provides a story with activities, Gram’s Trunk, that motivates students to investigate history (grades K-8).  

The American Historical Association shares the “five C’s of historical thinking.”  

---

² The resources in this module may change over time and no longer be available.
Section III

Vocabulary and Background Knowledge

Vocabulary is critical to building an understanding of social studies concepts, knowledge, and skills. The vocabulary words that students gain through experiences provide ways for students to comprehend new information (Sprenger, 2013). Students can better understand new vocabulary when they have some background knowledge to which they can make connections. In addition, learning new vocabulary increases students’ background knowledge. Therefore, it is important to teach vocabulary purposely when introducing new concepts, knowledge, or skills (e.g., Tennessee becoming a state) and in the context of the specific content (e.g., Teach the terms “state,” “state constitution,” and “westward expansion,” in the context of explaining the timeline and events leading to Tennessee statehood.).

This module includes two types of vocabulary words, both equally important to teach. The first type, general vocabulary words, labels groups of words that address different people, places, events, and time periods. For example, understanding the meaning of the word “economy” helps students to connect to related words (e.g., laborer, manufacture, products, import, export, etc.). The second type of vocabulary word, specific content words, represents groups of words that address a specific person, group of people, place, event, or time period. Specific content words are typically proper nouns, such as Civil War, and connect to general words (e.g., war, slaves, rights, etc.). Providing instruction on general words provides background knowledge when introducing corresponding or related specific words.

Key Vocabulary for Instructional Units

Table 2 and Table 3 contain lists of key general vocabulary words and specific content words that are important to the units in this module. Each general vocabulary word should be taught to the student using a student-friendly description of what the word means, an example of the word, and a historical example.

Teach the specific content vocabulary using a student-friendly description of the word meaning and a possible connection to a general vocabulary word. Do not teach memorization of vocabulary words; instead place emphasis on understanding the word. For example, a student should be able to state that people traveled to California to find gold instead of simply defining the word “gold.”
Table 2. General Vocabulary Words

General Vocabulary – words that generalize to different people, places, events, and time periods. Describe the word and provide examples (e.g., Plantations are very large farms where cotton was grown. *Example: The African Americans worked as slaves on plantations.*).

<table>
<thead>
<tr>

</table>
**Ideas to Support Vocabulary Learning**

Table 4 includes ideas and examples for teaching vocabulary in a way to build conceptual understanding of the words.

**Table 4. Ideas to Teach Vocabulary Effectively (Marzano 2004)**

<table>
<thead>
<tr>
<th>Ideas</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Explain, describe, and/or give examples of the vocabulary word rather than formal definitions.</td>
<td>For example, “An abolitionist is someone who wanted to end slavery. Frederick Douglass was an abolitionist.”</td>
</tr>
<tr>
<td>Have students restate the vocabulary word in their own words. Take this opportunity to help students connect new vocabulary, especially general vocabulary, to prior knowledge.</td>
<td>Have students draw or use pictures to identify and describe vocabulary words such as “gold,” “coal,” and “lumber.” Have students tell about events that helped free slaves in their own words.</td>
</tr>
<tr>
<td>Have students represent vocabulary words in pictures, symbols, graphic organizers, or pictographs.</td>
<td>Have students complete a timeline on Tennessee statehood (see Figure 1 for an example). Provide support as needed (e.g., help from peer or adult, viewing model, using alternative and augmentative communication [AAC], etc.).</td>
</tr>
</tbody>
</table>
| Provide multiple exposures to vocabulary words in a variety of ways. This does not suggest mass trials, but rather distributed trials in different ways or contexts. Reference http://projectlearnet.org/tutorials/learning_trials.html for information on learning trials. | • Talk about types of careers (e.g., agricultural, mining, manufacturing, etc.) when college and career planning.  
• Watch videos about career paths/jobs held by people in local communities and government, including those relative to the mid–1700s to mid–1800s in Tennessee.  
• Have students read an adapted book about the Civil War and geography. (e.g., http://bookbuilder.cast.org/view.php?op=view&book=17475&page=1).  
• Have students practice terms related to the North and the South leading up to and during the Civil War using flashcards in a paper version or online (e.g., https://quizlet.com/127173763/civil-war-northsouth-flash-cards/). |
| Ask students to discuss the vocabulary words with each other. | • Have students use their mode of communication to use a word in a sentence or choose the sentence that uses the word correctly.  
• Have students share their representations (e.g., pictures) of their favorite word with each other. |
| Play vocabulary word games with students. | • Have students review people, places, and events related to Tennessee statehood using flashcards (e.g., https://quizlet.com/168018402/tennessee-statehood-flash-cards/).  
• Have students complete word wall activities (e.g., http://www.readingrockets.org/content/pdfs/World_W... |
### Ideas

<table>
<thead>
<tr>
<th>Ideas</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Have students watch a dramatization or have them act out the vocabulary term.</td>
<td>Have students deliver parts of the Emancipation Proclamation using their preferred system of communication (e.g., verbal, communication board, switch activated recording, etc.).</td>
</tr>
</tbody>
</table>

2 Refer to Section V, Universal Design for Learning (UDL) Suggestions for additional instructional strategies.

#### Vocabulary Example

To build an understanding of terms relating to Tennessee statehood, have students create a timeline of events. See Figure 1 for an example. Educators may need to support, modify, or adapt steps as needed for individual students. For example, one student may create by copying from a resource timeline, another student may drag and drop text boxes with the information into the correct order, and another student may cut and paste events onto a paper timeline. Two National Center and State Collaborative (NCSC) resources are available and may prove helpful:

- Use systematic instruction as described in the NCSC Instructional Guide ([https://wiki.ncscpartners.org](https://wiki.ncscpartners.org))
- Reference ideas in the NCSC Vocabulary and Acquisition Content Module ([https://wiki.ncscpartners.org](https://wiki.ncscpartners.org))

#### Figure 1. Tennessee Statehood Timeline

- Tennessee region is made into a new territory (1789)
- William Blount is territorial governor (1790–1796)
- Treaty of Holston is negotiated (1791)
- Tennessee adopts a constitution and becomes a state (1796)
Vocabulary Resources:
Vocabulary.com provides explanations of words using real-world examples. Once signed in, an educator can create word lists for students. [http://www.vocabulary.com/](http://www.vocabulary.com/)

Text Project provides Word Pictures that are free for educators to use. It includes word pictures for core vocabulary and various content areas including science and social studies. This link will take you to the Word Pictures page where you can select the category of words you want to use. [http://textproject.org/classroom-materials/textproject-word-pictures/](http://textproject.org/classroom-materials/textproject-word-pictures/)

The Teach Tennessee History site has Frayer Model explanations and organizers, along with many other types of organizers that may be useful. [http://www.teachtnhistory.org/index.cfm/m/223/Teacher_Resources/](http://www.teachtnhistory.org/index.cfm/m/223/Teacher_Resources/)

Education Place provides a variety of graphic organizers to be used for vocabulary instruction that are free to print and copy. [http://www.eduplace.com/graphicorganizer/index.jsp](http://www.eduplace.com/graphicorganizer/index.jsp)

Directions and link to creating an online memory game that can be used for vocabulary or concepts. [https://www.youtube.com/watch?v=XwNAX26J_oQ](https://www.youtube.com/watch?v=XwNAX26J_oQ) and [http://matchthememory.com/](http://matchthememory.com/)

Section IV
Overview of Units’ Content

This section of the module contains additional content and references to support educators’ understanding and instruction of the instructional units. The information reflects important content to address the AATs and to build students’ knowledge, skills, and abilities; however, it is not exhaustive and should be expanded upon as needed.

Unit 1 – Growth of the Young Nation (1789–1849): Students analyze the aspirations and ideals of the people of the new nation.

Content:

Tennessee Statehood
- Statehood timeline
- Key leaders:
  - William Blount
  - John Sevier
- Treaty of Holston
- Key places, trails, rivers, and their significance to Tennessee statehood:
  - Cumberland Gap
  - Rocky Mount
  - Natchez Trace
  - River systems (e.g., Tennessee River, Mississippi River, and Cumberland River)
  - Jackson Purchase
Unit 2 – The Sectionalism of the American North, South, and West (1800–1850): Students analyze the paths of the American people in the three regions of the United States from 1800 to the mid–1800s and the challenges they faced as they became increasingly sectionalized.

Content:
Texas War of Independence
- Early settlements in Texas
- Causes for the Texas War of Independence
- Roles of:
  - David Crockett
  - Sam Houston
- The Alamo

California Gold Rush
- Movement of people to California
- Population impact of the California Gold Rush
- Development of new mining techniques
- Economic impact of the California Gold Rush
- John Sutter
- 49’ers

Unit 3 – Slavery in America (1800–1850) Students analyze the growth of slavery and the resulting controversies.

Content:
- Impact of the abolitionist movement
- Underground Railroad
- Leaders, events, and documents of the abolitionist movement:
  - John Brown and armed resistance
  - Harriet Tubman and the Underground Railroad
  - William Lloyd Garrison and The Liberator
  - Frederick Douglass and the Slave Narratives
  - Harriet Beecher Stowe’s Uncle Tom’s Cabin
  - Virginia Hill and Free Hill, Tennessee
  - Francis Wright and Nashoba Commune
  - Elihu Embree’s The Emancipator
- Northward movement of slaves

Unit 4 – Civil War (1830–1865) Students analyze the multiple causes, key events, and complex consequences of the Civil War.

Differences between the North and South during the Civil War
- Boundaries of the North and South
- Geographical differences between the two regions
- Economic differences between the two regions
- Differences between agrarians and industrialists

Abraham Lincoln
- Presidency
- Writings and speeches and their importance
o “House Divided” in 1858
o “Gettysburg Address” in 1863
o “Emancipation Proclamation” in 1863
o Inaugural address in 1861
o Inaugural address in 1865

Unit Content Resources:

Time Maps has a timeline that links to historical maps for a variety of places.

• Reading Like a Historian provides a lesson plan on the Emancipation Proclamation.  
• PBS provides a lesson plan on Abraham Lincoln’s views on slavery.  

Section V

Universal Design for Learning (UDL) Suggestions

The three principles of UDL guide development of instruction, instructional materials, and assessments to provide the widest range of students with access to learning. Students with significant cognitive disabilities, especially students with visual and/or hearing impairments and students with complex communication needs, require additional scaffolds, adaptations, and modifications to access content and support learning. The three principles of UDL establish a framework for providing these. UDL provides guiding principles to create instructional materials and activities in a flexible manner to address the needs of different types of learners. Additionally, the flexibility allows for further individualization. Table 5 provides strategies for the UDL Principle I, Multiple Means of Representation: presenting information in a variety of ways to address the needs of different types of learners. Table 6 provides strategies for the UDL Principle II, Multiple Means of Action and Expression: providing a variety of ways for students to interact with the instructional materials and to demonstrate understanding. Table 7 provides strategies for the UDL Principle III, Multiple Means of Engagement: providing a variety of ways to engage and motivate students to learn.

These strategies can assist all students in understanding the basic concepts. Some of the examples include adaptation ideas for students with vision, hearing, and/or physical limitations. Each example has a code to indicate when it includes specific adaptation ideas for these needs:

V = visually impaired (low vision, blind, or deaf-blind)
H = hearing impaired (deaf, hard of hearing, or deaf-blind)
P = physical disability (limited use of hands)
<table>

</tbody>
</table>
| Use assistive technology to allow the student to interact with the instructional materials and content. | Have students participate in an interactive Abraham Lincoln site (e.g., [http://constitutioncenter.org/lincoln/#](http://constitutioncenter.org/lincoln/#)). Use adapted keyboard and mouse. **P**  
Have students read articles about the Treaty of Holston (e.g., [http://www.tnmagazine.org/treaty-of-the-holston-helped-create-city-of-knoxville/](http://www.tnmagazine.org/treaty-of-the-holston-helped-create-city-of-knoxville/)) and the Texas War of Independence (e.g., [https://www.eduplace.com/ss/socsci/books/content/ilessons/51/iils_gr5CA_u5_c11_l3.pdf](https://www.eduplace.com/ss/socsci/books/content/ilessons/51/iils_gr5CA_u5_c11_l3.pdf)). Use a screen reader. **V**  
Have students read an article and take an online quiz about the Civil War (e.g., [http://mrnussbaum.com/readingcomp/civcomp/](http://mrnussbaum.com/readingcomp/civcomp/)). Use a screen reader. **V**  
Use an adapted mouse. **P**  
Use the accessibility features (e.g., high contrast, magnifier, narrator, online keyboard, etc.) of the computer operating system or the web browser to increase access. **V/P** |
| Present instructional materials in a manner that provides access.        | Place materials on a slant board or clip to a book holder. Provide students with clips to hold pages of the text book open. **P**  
Provide a page turner, commercial or DIY (e.g., a pencil with eraser placed in an adaptive pencil holder [https://s-media-cache-ak0.pinimg.com/236x/85/46/54/85465490f5ba51888802ad30d7522d74.jpg](https://s-media-cache-ak0.pinimg.com/236x/85/46/54/85465490f5ba51888802ad30d7522d74.jpg)). **P**  
Provide written and/or pictorial directions for multi-step activities. **H** |
| Provide voice output devices for students to select the correct answer.   | Record correct answers and distractors on a voice output multiple message switch or multiple voice output switches and have students answer questions using the switch. **V/P**  
Consider having students use three switches with generic labels (e.g., a, b, c or red, blue, green, three different textures) in which they listen to all three and then select the correct answer. **V/P** |
| Provide simulation activities.                                            | Have students explore an interactive map of the Underground Railroad (e.g., [http://www.eduplace.com/kids/socsci/books/applications/imaps/maps/g5s_u6/](http://www.eduplace.com/kids/socsci/books/applications/imaps/maps/g5s_u6/)). Use an adapted keyboard and mouse. **P**  
Have students explore an interactive map showing the status of the states during the Civil War (e.g., [http://mrnussbaum.com/cwchallenge/](http://mrnussbaum.com/cwchallenge/)). Use an adapted mouse. **P** |
| Create accessible graphic organizers (e.g., a digital graphic organizer that allows drag and drop) and maps. | Have students explore an online timeline of events leading to the Texas War of Independence (e.g., [http://www.softschools.com/timelines/texas_revolution_timeline/64/](http://www.softschools.com/timelines/texas_revolution_timeline/64/)).  
Have students drag and drop state names into the correct classification: Union States, Confederate States, or Border States (e.g., [http://mrnussbaum.com/civil-war-states-containers/](http://mrnussbaum.com/civil-war-states-containers/)). Use an adapted mouse. **P** |
<table>
<thead>
<tr>
<th>Strategies</th>
<th>Examples</th>
</tr>
</thead>
</table>
| Provide a schedule and visual timer.                                      | Have students use a tactile schedule (e.g., [http://www.autismclassroomresources.com/visual-schedule-series-object-schedules_25/](http://www.autismclassroomresources.com/visual-schedule-series-object-schedules_25/)). V/P  
Have students use a mini-schedule or a first-then schedule for each content instructional session. Provide a schedule with tangible symbols. V/P  
Have students select the next activity on the schedule and set the timer or visual timer to indicate how long the student has before a break. |
| Vary the challenge and amount of information presented at a time.         | Introduce Tennessee as a state and discuss the various regions of the state. Then discuss the history of how it became a state. Provide information in short blocks of time, gradually increasing the instructional time.                                                                                                         |
| Make connections to topics or activities that are motivating.            | Read about a popular sports figure being inducted into the Hall of Fame, and then have students create a flyer placing an abolitionist into a Hall of Fame (e.g., [http://mrnussbaum.com/abolition-hall-of-fame/](http://mrnussbaum.com/abolition-hall-of-fame/)).  
Have students listen to a letter written by a gold miner from the California Gold Rush (e.g., [http://www.eyewitnesstohistory.com/californiagoldrush.htm](http://www.eyewitnesstohistory.com/californiagoldrush.htm)). |
| Allow choices as possible.                                                | Allow students to choose a key abolitionist to research and report on. Allow students to set their academic and behavioral goals with assistance as needed. Allow students to choose an appropriate break time.                                                                                               |
| Provide opportunities to work collaboratively with peers.                | Provide opportunities for students to work in a general education classroom with peers when learning about slavery in America or have peer tutors come into the special education classroom to work on a project about Abraham Lincoln. Model how to support students’ learning for the general education teacher and classmates. |
UDL Resources

The National Center on Universal Design for Learning has a plethora of information on UDL and examples and resources.
www.udlcenter.org

Symbaloo is a free online tool that allows an educator to create bookmarks using icons. It is easy to create and allows an educator to provide students links to sources of information that can be used for specific instructional units.
www.symbaloo.com

This site provides a brief description of Symbaloo and multiple ways to use the online tool.

Perkins School for the Blind provides information on using tangible symbols to increase communication, create personal schedules, and provide choices.
http://www.perkinselearning.org/videos/webcast/tangible-symbols

Teaching History provides directions for adapting documents for classroom use.

Section VI

Transfer and Generalize Concepts, Knowledge, and Skills

For learning to be meaningful for all students, including students with significant cognitive disabilities, it is important to intentionally make connections to future content, real-world application, and college and career readiness skills. For example, explain how individuals, such as Harriet Tubman, Frederick Douglass, and Harriet Beecher Stowe, helped abolish slavery in America using different methods. Discuss how the students can affect change in their future (e.g., showing they are capable, advocating for their rights, etc.). Additionally, the instruction of social studies concepts, knowledge, and skills may be the catalyst to developing other areas such as needed communication skills, reading/listening comprehension, age-appropriate social skills, independent work behaviors, and skills in accessing support systems. Table 8 provides instructional ideas to help transfer and generalize concepts, knowledge, and skills and suggested opportunities to embed other skills into instruction.
Table 8. Transfer and Generalization Ideas

<table>
<thead>
<tr>
<th>Area</th>
<th>Instruction</th>
<th>Opportunity to Embed Skills</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Communication</strong></td>
<td>While teaching vocabulary, make connections to real-life or future opportunities to use the words (e.g., while advocating for self and others).</td>
<td>Use the context of the content area instruction to increase language skills, work on articulation, or access alternative and augmentative communication (AAC) systems.</td>
</tr>
<tr>
<td><strong>Reading and Listening Comprehension</strong></td>
<td>Provide information through reading books and articles when working on reading/listening comprehension or word identification.</td>
<td>Provide practice on communication skills when students are answering questions about the book or article on the content.</td>
</tr>
<tr>
<td><strong>Age-Appropriate Social Skills</strong></td>
<td>Make connections between the Connecting Concepts and real-life experiences showing the benefits, reasons, and ways groups cooperate.</td>
<td>Provide opportunities to work alongside same age peers to practice age-appropriate social skills.</td>
</tr>
<tr>
<td><strong>Independent Work Behaviors</strong></td>
<td>Encourage and reinforce independent completion of tasks to build independent work skills.</td>
<td>Practice use of personal schedules and mini-schedules during content instruction. Work on self-monitoring and evaluation.</td>
</tr>
<tr>
<td><strong>Skills in Accessing Support Systems</strong></td>
<td>Encourage students to ask appropriately for assistance from peers and adults when working on the content.</td>
<td>Use this time to have the student work on behavior and communication skills.</td>
</tr>
</tbody>
</table>

**Section VII**

**Concepts and Vocabulary Multi-Age Planning: Grades Six through Eight**

Multi-age planning requires that instructional decisions address the span of the grade levels of the students in the class. Recognizing the Connecting Concepts and the General and Specific Vocabulary that apply to multiple units within and across a grade span provides information to teach concepts that build a foundation for specific curricular content (i.e., specific people, places, events, and time periods). This section illustrates the grade-level **Connecting Concepts** and the **General and Specific Vocabulary** across grades six through eight. This view (see Tables 9 – 13) allows educators of multi-age and multi-grade classrooms to address the same or similar concepts and vocabulary to all students along with the specific curricular content.

## Section VIII

### Tactile Maps and Graphics

The maps and graphics guidelines will help create tactile versions of instructional maps, diagrams, models, and timelines to use with students who are blind or deaf-blind. The tactile maps and graphics
may be beneficial to other students as well. A tactile graphic is a representation of a graphic (e.g., picture, drawing, diagram, map, etc.) in a form that provides access through touch. It is not an exact copy of the graphic. The section provides basic guidance and links to more comprehensive resources.

**Importance of Tactile Maps and Graphics**

It is important to provide tactile graphics for young readers (BANA, 2010). It helps students understand and gain information when presented with science and social studies concepts, knowledge, and skills. Science instruction often presents diagrams (e.g., water cycle) and two-dimensional models of living and nonliving things (e.g., model of cell) to teach the related concepts. Social studies instruction often uses maps and timelines to illustrate where and when people existed and events occurred. The following guidance includes information to build upon when creating tactile graphics.

**Tactile Graphic Guidance**

1. **Determine need for graphic:** When encountering graphics in instructional materials, determine if the graphic is essential to understanding the concept. The Braille Authority of North America (2010) provides a decision tree to help in this determination. It can be accessed online at [http://www.brailleauthority.org/tg/web-manual/index.html](http://www.brailleauthority.org/tg/web-manual/index.html) by selecting “Unit 1 Criteria for Including a Tactile Graphic.”

2. **Consult with the local educator trained to work with students with visual impairments.**

3. **Determine the essential information in the graphic.** Read the surrounding information and the caption to determine which information in the graphic to exclude. For example, a map to illustrate location of key countries would not need state lines and capital cities and may not need all of the surrounding countries.

4. **Reduce unnecessary detail in the graphic.** Identify details that are not necessary for interpreting the information in the graphic. For example, a model of the water cycle may show crevices on the mountains, leaves on a tree, and waves in an ocean. Eliminate unnecessary details, as they are difficult to interpret tactiley.

5. **Remove frames or image outlines if they serve no purpose.** Ensure that all lines are necessary (e.g., line that indicates a body of water), and remove any that are not.

6. **Modify the size of the graphic.** Modify the graphic as needed to reduce clutter and allow a blank space between adjacent textures. Additionally, consider the size of the student’s hand.

7. **Use solid shapes as feasible.** When solid shapes do not clearly represent the information, use clear solid lines.

8. **Systematically teach exploration and interpretation of tactile graphics.** Systematic instruction and repetition are important when teaching a student to understand a tactile graphic. Pairing the tactile graphic with a 3-dimensional object may help (e.g., pair a raised line drawing of a pencil, an example of goods, with a pencil).
Specific Graphic Type Guidance
Following is information for specific types of graphics that may support instruction in science and social studies.

Graphic Organizers/Concept Maps
• It is best to present information to compare or make connections in a tactile graphic. A tactile graphic presents the information in a spatial display and aids in comparison better than a list.

Diagrams/Models
• Limit the number of areas, lines, and labels. Having more than five makes interpretation difficult.
• Consider pairing a tactile graphic with a 3-dimensional model.

Timelines
• Present timelines in the same direction every time (i.e., horizontal or vertical).

Maps
• Distinguish water from land using a consistent background texture for the water.
• Align the direction of the compass rose arrows with the lines of longitude and latitude on the map.

Creating Tactile Graphics
Following are some ways to create tactile graphics. Additional information can be found at www.tactilegraphics.org.

Commercial products:
• Capsule paper or swell paper – print
• Thermoform

Textured shapes can be made from:
• Sticky back textured papers found at craft stores
• Corrugated cardboard
• Fabric with texture (e.g., corduroy, denim)
• Silk leaves
• Cork
• Felt
• Vinyl
• Mesh tape (used for drywall)
• Sandpaper

Raised lines can be made from:
• Glue (best not to use water-based glue)
• Wax pipe cleaners
Resources

Creating Tactile Graphics created by the High Tech Center Training Unit provides basic principles of tactile graphics, characteristics of good tactile graphics, the planning process, guidelines for designs, and more. [http://www.htctu.net/trainings/manuals/alt/Tactile_Graphics.pdf](http://www.htctu.net/trainings/manuals/alt/Tactile_Graphics.pdf)

The Texas School for the Blind and Visually Impaired provided basic principles for Preparing Tactile Graphics, element arrangement on a tactile graphic, resources for preparing quality graphics, etc. [http://www.tsbvi.edu/graphics-items/1465-basic-principles-for-preparing-tactile-graphics](http://www.tsbvi.edu/graphics-items/1465-basic-principles-for-preparing-tactile-graphics)

Perkins School for the Blind has short videos that explain the importance of tactile graphics and information on spatial relationships and graphic literacy, moving from models to graphics, and strategies for reading tactile graphics. [http://www.perkinselearning.org/videos/webcast/teaching-tactile-graphics](http://www.perkinselearning.org/videos/webcast/teaching-tactile-graphics)
