Dear Representative,

First, thank you guys for putting on the webinars and in-person meetings. I found yesterday's session very valuable. Second, La-Z-Boy would like to comment that we strongly believe rates should, to a high degree, correlate with actual emissions from each facility. We sincerely believe that the fees have a two pronged reason for existing: fund the governmental body regulating this arena and acting as an external force upon companies to encourage reduction in air emissions. If fees are spread in a more "equitable" manner, i.e. uniformly increased across all stakeholders, then the pressure to reduce emissions is reduced for the highest emitters.

Thank you for your consideration.

Have a blessed day,
Cody Buell
