• 6:00-6:06 Meeting welcome and opening

• 6:06-7:00 Public Question and Answer
Options on WebEx

- Below are options available to use during the WebEx meeting. These will be displayed on the lower center of the screen.
  - Note: Some options may be disabled by the host.

- Go to chat box (can be used for asking questions during meetings)
- Mute/unmute microphone
- Leave meeting. Note that you can re-enter meeting later.
- Raise hand icon
- Go to chat box (can be used for asking questions during meetings)
One important note as we get started is APC’s permitting as it relates to local ordinances:

The following language is at the bottom of TDEC’s air permit cover pages:
- No Authority is Granted by this Permit to Operate, Construct, or Maintain any Installation in Violation of any Law, Statute, Code, Ordinance, Rule, or Regulation of the State of Tennessee or any of its Political Subdivisions.

We do not have any authority over water pollution, traffic roadways & mobile sources, odors, noise, outdoor lights, and any concerns not regulated by the Division of Air Pollution Control.

We cannot answer your questions on zoning but are happy to answer questions related to air quality and environmental permitting.
Public Meeting

• Division of Air Pollution Control (APC) posted the notice for the meeting on the Division’s website on July 20 for a permit at the following location:
  • 348 Chevy Road, Tracy City, TN 37387
• APC Division received comments and opted to conduct a public meeting for the project. Any comments received verbally or in writing will be reviewed by the Division of APC staff.
• For more information about the facility, visit the APC dataviewer link: https://dataviewers.tdec.tn.gov/dataviewers/f?p=19031:34001
Air Pollution Control

- Will Collins – Construction Permit Process
- Hernan Flores – Brief overview of proposed Rock Crushing and Sizing Operation
Construction Permit Process

- Apply 90 days prior to construction
- Public notice and 30-day public comment period
- Drafted construction permit
- Applicant shall comply with prepared permit conditions, applicable state and federal air quality regulation and recordkeeping.
It is the intent and purpose of this (law) to maintain purity of the air resources of the state consistent with the protection of normal health, general welfare and physical property of the people, maximum employment and the full industrial development of the state.
The Division issues permits that are protective of public health. The Division also has a comprehensive inspection program implemented by our field services group, as well as a compliance validation group involved in the direct measurement of air contaminants from emission sources. If an applicant has shown they will meet the rules and regulations, the Division will proceed with permit issuance.

Permits contain limits and work practice standards that are required by rules and regulations, implemented to protect public health, and contain monitoring, recordkeeping, and reporting requirements that are designed to demonstrate compliance with those limits and work practice standards.
Rock Crushing

Rock Crushing

- The construction permit application submitted is for a Rock Crushing and Sizing Operation.
- Division of Air Pollution Control has given the following identification numbers:
  - Facility ID: 31-0088
  - Construction Permit Number: 980253
- This proposed Rock Crushing Operation would consist of crushers, screens, conveyors and associated equipment used to produce sand.
- The means to control the dust at this facility shall be by “Wet Suppression”. This means water would be applied to suppress any dust resulting from crushing, screening, or conveying activities.
Meeting Logistics

• To ask a question or comment:
  – Enter your question in chat
  – Raise your hand by hovering over your name in WebEx
  – Lastly, we will open up the phone lines

▪ Please give your name and location prior to your question

▪ Remember, written comments can be submitted until no later than 4:30 p.m. CDT on August 26, 2022.

• Please be respectful to others. If participants are disruptive, you may be re-muted by the host or removed from the meeting.

• Please keep you video off to minimize any bandwidth issues.
