The lands shown here are all owned and managed by the agencies represented on this map for future multiple-use management of the various resources available to Tennesseans and visitors. Together these properties represent virtually all of Tennessee's forests.

Total area of all forests combined is distributed throughout nine physiographic regions. All receive a considerable amount of timber and other forest products. Forests located in the U.S. Navy's Cherokee National Forest and the U.S. Air Force's Tellico O-7 Reservoir Park are also shown.

While the public has access to approximately 80% of the forested lands, portions of lands owned by the U.S. Air Force and the U.S. Navy are closed to the public. All other lands in Tennessee are generally open to the public.

The State Parks, the most highly developed of the Tennessee Recreation Lands, are managed to provide campgrounds, picnic areas, and hiking trails. These areas are designed to provide for both passive and active recreation.
