↕ Heterolithic A ↕

Fort Payne Fm.  
Facies

**Heterolithic B:** 1-2 cm thick crinoidal grainstone interbedded with 3-5 cm thick siliciclastic mudstone that contains abundant crinoid grains.

**Crinoidal grainstone,** medium- to coarse-grained.

**Silicified Crinoidal Grainstone**

**Siliciclastic mudstone** with local concentrations of dispersed crinoid grains.
