

Who we are:

The Department of Environment and Conservation exists to enhance the quality of life for citizens of Tennessee and to be stewards of our natural environment.

We foster a work environment that's inclusive as well as diverse, where our people can be themselves. Every idea and perspective is valued so that our culture reflects the people we serve.

Our department is committed to providing a cleaner, safer environment that goes hand-in-hand with economic prosperity and increased quality of life in Tennessee. We deliver on our mission through managing regulatory programs that maintain standards for air, water and soil quality while providing assistance to businesses and communities in areas ranging from recreation to waste management. We manage the state park system and programs to inventory, interpret and protect Tennessee's rich natural, historical, and archaeological heritage.

About the Division of Water Resources (DWR):

The Division Water Resources is responsible for managing, protecting and enhancing the quality of the state's water resources for all Tennesseans through voluntary, regulatory and educational programs. Division activities include establishment of water quality criteria; issuance of permits and certifications; evaluation of monitoring data; conducting inspections; management of financial assistance for infrastructure and oversight activities related to stream channel modification, wetland alterations, dredging, groundwater protection, wellhead protection, safe dams, septic systems, pretreatment, bio solids application, and storm water.

BOE Student Intern Division of Water Resources Chattanooga Environmental Field Office Compensation: \$20 per hour

Do you care about the environment and want to learn how you can protect it? Then we have the perfect summer internship opportunity where you can take your passion for the environment and learn how TDEC protects Tennessee's air, land, and water. The Division of Water Resources (DWR) is hiring a summer student intern to work in our Chattanooga Environmental Field Office. Students will assist staff with our stream monitoring program, including calibration of equipment, collection of water samples from streams and rivers, and collection of benthic macroinvertebrates. Students will assist with the review of data and data entry. Students will also have the opportunity to shadow staff on regulatory inspections.

If you enjoy learning and working with people involved in protecting and conserving water resources, this opportunity serves to provide that experience.

Highlighted Responsibilities:

- Calibrate field and laboratory equipment.
- Collect water samples from streams and rivers.
- Collect benthic macroinvertebrates from streams and rivers.
- Conduct data entry related to stream monitoring and regulatory compliance.
- Shadow staff on regulatory inspections.

Qualifications:

- Students earning a degree in environmental science, biology, chemistry, ecology, geology, engineering, or an acceptable related field.
- Actively enrolled in college and have a Junior, Senior, or Graduate student status as of May 2024.
- Legally authorized to work in the U.S.
- Have a valid driver's license.

How to Apply:
