How to Comment

The Tennessee Department of Environment and Conservation is requesting public comments on the proposed permit actions. Obtaining a broad range of facts and opinions on Agency actions is one of the best ways to ensure quality decisions. Persons wishing to comment on the proposed permit actions may

submit comments in writing to the Mining Section at the Knoxville Environmental Field Office, Attn: Public Notice Coordinator; by fax to (865) 594-6105; or by e-mail to DMGR.PublicNotice@tn.gov. Comments must be received before the close of the comment period (see page 1).

How to Request a Public Hearing

Interested persons may request in writing that the Division hold a public hearing on any application. The request must be filed before the close of the comment period. You must indicate the interest of the party requesting a hearing, the reasons that a hearing is warranted, and the water quality issues being raised. When there is significant public interest for a hearing, the Division will hold a hearing in accordance with Rule 0400-40-05-.06 (12). A separate public notice will announce the public hearing.

How the Department Will Proceed

The Director of the Division of Mineral and Geologic Resources will determine the final permit action after considering comments submitted during the comment period, the hearing record, if any, and the requirements of Federal and State acts and regulations.

To Obtain Permit Details

Copies of the applications, draft permits, and supporting documentation are maintained in the Mining Section's permit files at the Knoxville Environmental Field Office. There is a nominal fee for copying. The files are available for public inspection during normal visiting hours. E-mail Kara.Blevins@tn.gov or call (865) 594-5460 to schedule an appointment for the review. Information is also available in the Division of Mineral & Geologic Resources Data Viewer at: https://www.tn.gov/environment/about-tdec/tdec-dataviewers.html.

State of Tennessee Antidegradation Policy

Tennessee's Antidegradation Statement is found in Rule 0400-40-03-.06 of the Tennessee Department of Environment and Conservation. The primary purpose of the antidegradation policy is to establish a greater level of protection for high quality waters. Some high quality waters are in near pristine condition. Others are determined to be high quality due to specialized uses and/or unique features.

Generally, there are two types of high quality waters. Outstanding National Resource Waters receive the greatest level of protection. The Board of Water Quality, Oil and Gas designates these waters. New discharges or expansion of existing discharges cannot degrade existing water quality. The Department identifies other high quality waters known as Exceptional Tennessee Waters and protects against their degradation. The Department may allow some degradation if the Department deems it economically and socially necessary.

Non-Exceptional Tennessee Waters refer to surface waters that do not have the identification and/or designation as high quality. These waters must achieve and maintain Tennessee's Water Quality Standards.

State of Tennessee Policy of Non-Discrimination

Pursuant to the State of Tennessee's policy of non-discrimination, the Tennessee Department of Environment and Conservation does not discriminate on the basis of race, sex, religion, color, national or ethnic origin, age, disability, or military service in its policies, or in the admission or access to, or treatment or employment in its programs, services or activities.
