Annual Hazardous Waste Regulatory Program Report
Reporting Year 2023

Table of Contents

PREFACE	1
THE NUMBER AND TYPE OF HAZARDOUS WASTE HANDLERS PERMITTED AND/OR REGISTERED BY THE COMMISSIONER	3
A LIST OF HAZARDOUS WASTE GENERATORS, TRANSPORTERS, USED OIL TRANSPORTERS, USED OIL TRANSFER STATIONS AND DISPOSAL FACILITIES	4
FEES DUE, PAID, AND PAST DUE	57
THE AMOUNT OF HAZARDOUS WASTE, BY TYPE, GENERATED, TRANSPORTED, TREATED, STORED, AND DISPOSED OF IN TENNESSEE	58
THE NUMBER OF PERMIT APPLICATIONS RECEIVED, GRANTED, REQUESTED, AND PENDING, BY TYPE	59
THE NUMBER AND TYPE OF ENFORCEMENT ACTIONS IN PROCESS AND INITIATED DURING THE REPORTING PERIOD, AND THE RESULTS OF SUCH	59
RECOMMENDATIONS FOR LEGISLATIVE ACTION TO IMPROVE THE HAZARDOUS WASTE REGULATORY PROGRAM	60

Preface

Pursuant to Tennessee Code Annotated § 68-212-118 the following Annual Hazardous Waste Regulatory Program Report is prepared and submitted by December 1, 2025, for Reporting Year 2023 by the Commissioner of the Department of Environment and Conservation as well as the Underground Storage Tanks and Solid Waste Disposal Control Board. The report evaluates the performance of the State of Tennessee's Hazardous Waste Regulatory Program as stipulated in the Tennessee Code Annotated.

Summary of the State of Tennessee's Hazardous Waste Regulatory Program

Hazardous waste is regulated under Subtitle C of EPA's Resource Conservation and Recovery Act (RCRA). The Hazardous Waste Management Regulatory Program is a comprehensive program ensuring that hazardous waste is managed safely from generation to final disposal (cradle-to-grave). Subtitle C regulations define requirements for hazardous waste generators; transporters; and treatment, storage, and disposal facilities including permitting requirements, enforcement, and corrective action. The Hazardous Waste Management Program operates under the authority of the Hazardous Waste Management Act of 1977 (TCA §68-212-101 et seq.) and various Hazardous Waste Management rules.

Implementation of Tennessee's Hazardous Waste Program began in October 1980. The Memorandum of Agreement between the State of Tennessee and EPA, Region 4 was signed January 2017. Tennessee has been authorized by EPA to administer the majority of the federal program and receives a grant in support of this effort.

The coordinated state and federal program regulate activities such as:

- RCRA permits for hazardous waste treatment, storage, and disposal facilities.
- Inspections of hazardous waste permitted facilities.
- Inspections of hazardous waste generators and recycling facilities.
- The management of hazardous waste from generators (primarily manufacturing industry) through the required waste stream notifications, annual reports, and waste reduction plans.
- Annual permitting of hazardous waste transporters, registration of used oil transporters, and the regulation of used oil facilities.

As an authorized state, the Tennessee Hazardous Waste Management Rules must be as stringent as the federal rules. Tennessee Hazardous Waste Management Rules 0400-12-01 et seq., and 0400-12-02 ensure that the management and permitting of hazardous waste activities are aligned with the federal rules and are protective of human health and the environment.

Facilities that treat, store, or dispose of hazardous waste must obtain a RCRA permit using

the procedures outlined in the Hazardous Waste Management Rules. Facilities with treatment, storage, or disposal permits are often referred to as TSDFs (treatment, storage, disposal facility). A RCRA permit is a legally binding document that establishes operating requirements and provisions specific to the permit applicant based on the treatment, storage, or disposal activities conducted at the facility. Permits are site specific addressing the geography of the facility, the types of hazardous waste management units, permitted waste streams, and the type of treatment, storage, and/or disposal activity conducted at the facility. Facility design and operation, financial assurance, safety standards, activities that the facility must perform, such as monitoring and reporting, are included in the permit conditions and requirements. Permits must develop emergency plans, employee hazard training and training to ensure the employees meet the permit requirements such as groundwater monitoring.

Permitted hazardous waste treatment facilities use various processes and may include incineration or oxidation to alter the character or composition of hazardous wastes. Some treatment processes enable waste to be recovered and reused in manufacturing settings, while other treatment processes reduce the amount of hazardous waste.

Permitted storage facilities temporarily store hazardous wastes pending treatment and final disposition of the hazardous waste at a permitted disposal facility. A hazardous waste landfill is designed and constructed to protect groundwater and surface water resources.

Data Collection

Hazardous waste generators and hazardous waste permitted facilities are required to notify the state of their activity pursuant to the Hazardous Waste Management Rule 0400-12-01 et seq. Completed forms are required to be submitted by March 1st each year detailing hazardous waste activity for the previous calendar year, frequently referred to as the "Report Year." The following table identifies the dates associated with the annual report for the 2023 Report Year.

REPORTING PERIOD	MUST BE POSTMARKED	PRELIMINARY DATA ENTERED
January 1, 2023 - December 31, 2023	March 1, 2024	December 2024

Hazardous Waste Generators, Permitted, and Registered Facilities

The Tennessee Hazardous Waste Management Act of 1977, TCA Section 68-212-101, requires the Division of Solid Waste Management (DSWM) to identify and regulate hazardous waste generators; hazardous waste treatment, storage, and disposal facilities; and hazardous waste transporters. Hazardous waste generators are categorized into three groups: large quantity generators (LQG), small quantity generators (SQG), and very small quantity generators (VSQG). The numbers for each generator category are listed in Table 1.

A transporter of hazardous waste which originates or terminates in Tennessee must have received an installation identification number and a transporter permit. The DSWM permits and tracks both in state and out of state transporters that operate in Tennessee. Consistent with federal rules all hazardous waste transporters must have an installation identification number also known as an EPA ID Number. The State maintains a list of hazardous waste transporters that are permitted to pick up or drop off hazardous waste in Tennessee.

Table 1: Hazardous Waste Generators, Permitted, and Registered Facilities

# OF FACILITIES	HAZARDOUS WASTE ACTIVITY
727	Very Small Quantity Generators (VSQG)
581	Small Quantity Generators (SQG)
321	Large Quantity Generators (LQG)
4	Reverse Distributors
51	Active TSD Facilities
268	Hazardous Waste Transporters
36	Hazardous Waste Transfer Facilities
93	Used Oil Transporters
32	Used Oil Transfer Stations

Note: Data queried from a local database and EPA RCRAInfo. Data values may change as adjustments and audits are completed.

Note: Some data values may change as adjustments and audits are completed. This can occur over a period of years. Every attempt is made to obtain the most current data. All raw data is received from Fiscal Services and then it is matched to internal documentation which gives the final data used for reporting. Report received from Fees on Date.

Hazardous Waste Generated, Received, and Shipped in the State of Tennessee

The Hazardous Waste Generated in the state of TN is separated into two distinct categories, wastewater, and non-wastewaters. Wastewater is defined using the following handling codes: H03 Released onsite directly to publicly owned treatment works (POTW); H06 onsite wastewater treatment unit; H07 onsite elementary neutralization. All other waste is determined to be a non- wastewater.

Table 4a: Wastewater vs. Non-wastewater Generated in TN

WASTEWATER GENERATED	POUNDS	TONS
Total Amount of Wastewater Generated	83,328,160,362.04	41,664,080.18
Total Amount of Non-Wastewater Generated	707,560,132.15	353,780.07
Total Waste Generated	84,035,720,494.18	42,017,860.25
Percent Wastewater of Total	99.1%	

Note: Data was supplied by Waste Audit on 3/4/25; 2023 ALR from ALL sources some data values may change slightly as adjustments and audits are completed.

Table 4b: Hazardous Waste Received from Outside of TN Compared to Waste Generated and Transported within TN

WASTE RECEIVED	POUNDS	TONS
Total Waste Received Within TN	63,134,306.43	31,567.15
Waste Received Outside TN	53,983,146.32	26,991.57
Percentage Waste Received from Out of TN	85.5%	

Note: Data was supplied by Waste Audit on 3/4/25; 2023 ALR from ALL sources some data values may change slightly as adjustments and audits are completed.

Table 4c: Hazardous Waste Shipped Out of State Compared to Waste Shipped Within Tennessee

WASTE SHIPPED	POUNDS	TONS
Total Waste Shipped Offsite for Treatment/ Disposal	200,235,612.57	100,117.81
Total Waste Shipped Out of TN	189,837,460.60	94,918.73
Percentage Shipped Outside of TN	94.8%	

Note: Data was queried from local database 3/4/25, some data values may change slightly as adjustments and audits are completed.

Table 5: 2023 Number of Permit Applications Received, Granted, Requested, and Pending, by Type

PERMIT TYPE	BEGINNING 2023	RECEIVED 2023	FINAL DETERMINATION 2023	PENDING END OF 2023
Storage	3	0	1	2
Storage/Treatment	3	0	0	3
Open Burning (Treatment)	1	0	0	1
Combustion (Treatment)	3	1	1	2
Disposal	0	1	0	1
Post-Closure	2	0	2	0
Corrective Action	1	1	0	2
TOTAL	13	3	4	12

Note: Received and reviewed Date from the Division of Solid Waste Management’s Hazardous Waste Permitting Group.

Table 6: 2023 Number and Type of Enforcement Actions in Process and Initiated During Reporting Period

ORDER TYPE	ORDER COUNT	CLOSED 2023	PENDING END OF 2023
Notices of Violation Issued	242	0	0
Warning Letters Issued	16	14	2
Director’s Orders Issued	12	7	5
Commissioner’s Orders Issued	3	2	1
Permit Appeal	1	0	1
Compliance Agreement	0	0	0
Consent Order	1	1	0

Note: Data queried from internal database and RCRAInfo EPA Hazardous waste information depository Data received and reviewed (3/5/25) from the Division of Solid Waste Management Enforcement Section.

Recommendations for Legislative Action to Improve the Hazardous Waste Regulatory Program

The State of Tennessee is authorized by a memorandum of agreement between the State of Tennessee and the United States Environmental protection Agency, Region 4, to administer the Resource Conservation and Recovery Act Hazardous Waste Program. As the Federal Program is amended, the State Program must be amended to remain in compliance with the requirements of 40 C.F.R. Part 271. The State of Tennessee, Division of Solid Waste Management, Hazardous Waste Program prepares amendments for stake holder review and submits the amendments to the Underground Storage Tank and Solid Waste Disposal Control Board for review/approval to maintain equivalent to the Federal Program.
