| The number and type of hazardous waste handlers permitted and/or registered by the Commissioner                                              | 3      |
| A list of hazardous waste generators, transporters, and disposal facilities                                                                  | 5      |
| Fees Due, Paid, and Past Due                                                                                                                 | 88     |
| The amount of hazardous waste, by type, generated, transported, treated, stored, and disposed of in Tennessee                                | 90     |
| The number of permit applications received, granted, requested, and pending, by type                                                         | 91     |
| The number and type of enforcement actions in process and initiated during the reporting period, and the results of such enforcement actions | 92     |
| Recommendations for legislative action to improve the hazardous waste regulatory program                                                     | 93     |

---

## **PREFACE**

Pursuant to Tennessee Code Annotated § 68-212-118 the following Annual Hazardous Waste Regulatory Program Report is prepared and submitted on December 1, 2021 for Reporting Year 2019 by the Commissioner of the Department of Environment and Conservation as well as the Underground Storage Tanks and Solid Waste Disposal Control Board. The report evaluates the performance of the State of Tennessee's Hazardous Waste Regulatory Program as stipulated in the Tennessee Code Annotated.

### **Summary of the State of Tennessee's Hazardous Waste Regulatory Program**

The Hazardous Waste Management Regulatory Program regulates activities associated with hazardous waste generation, transportation, storage, treatment, and disposal that are subject to the EPA's Resource Conservation and Recovery Act (RCRA) Subtitle C. The Hazardous Waste Management Program operates under the authority of the Hazardous Waste Management Act of 1977 (TCA §68-212-101 et seq.) and various Hazardous Waste Management rules.

Implementation of Tennessee's Hazardous Waste Program began in October 1980. The Memorandum of Agreement between the State of Tennessee and EPA, Region 4 was signed January 2017 Tennessee has been authorized by EPA to administer the majority of the federal program and receives a grant in support of this effort.

The coordinated state and federal program regulate activities such as:

- the permitting and inspection of hazardous waste storage, recycling, treatment, and disposal facilities;
- the management of hazardous waste from generators (primarily manufacturing industry) through the required waste stream notifications, annual reports, and waste reduction plans;
- the annual registration of hazardous waste transporters; and
- the regulation of used oil facilities.

Permitted hazardous waste management facilities receive hazardous wastes for treatment, storage, or disposal. These facilities are often referred to as treatment, storage, and disposal facilities, or TSDFs.

Permitted hazardous waste treatment facilities use various processes (such as incineration or oxidation) to alter the character or composition of hazardous wastes. Some treatment processes enable waste to be recovered and reused in manufacturing settings, while other treatment processes dramatically reduce the amount of hazardous waste.

Permitted storage facilities temporarily hold hazardous wastes until they are treated or disposed of while disposal facilities are the final and permanent destination for hazardous wastes. The most common type of disposal facility is a landfill, where hazardous wastes are disposed of in carefully constructed units designed to protect groundwater and surface water resources.

The detailed regulations located in Tennessee Rules 0400-12-01-.06, 0400-12-01-.07, and 0400-12-02 ensure that TSDFs operate safely and protect human health and the environment. Facilities that currently or plan to treat, store, or dispose of hazardous wastes must obtain a RCRA permit using the procedures outlined in Rule 0400-12-01-.07 or 0400-12-02. A RCRA permit is a legally binding document that establishes operating requirements and provisions specific to the permit applicant, depending on the treatment, storage, or disposal activities conducted at the facility. Permits are written to address the specific geography of the facility, the types of hazardous waste management units, and the specific waste streams that will be managed at the facility. The permit also outlines facility design and operation, lays out safety standards, and describes activities that the facility must perform, such as monitoring and reporting. Permits typically require facilities to develop emergency plans, train employees to handle hazards, perform the requirements of the permit such as groundwater monitoring in addition to providing financial assurance.

#### Data Collection

Handlers and generators of hazardous waste are required to notify the state of their activity pursuant to the Hazardous Waste Management Regulations Chapter 0400-12-01 et seq. Completed forms are required to be submitted by March 1<sup>st</sup> each year detailing their hazardous waste activity for the previous calendar year, frequently referred to as the "Report Year."

| REPORTING PERIOD                    | MUST BE POST-MARKED BY | PRELIMINARY DATA IS KEYED BY | AUDIT AND FINAL DATA ENTRY |
|-------------------------------------|------------------------|------------------------------|----------------------------|
| January 1, 2019 - December 31, 2019 | March 1, 2020          | December 2020                | September 2021             |

## **Hazardous Waste Handlers/Generators Permitted or Registered by the Commissioner**

The Tennessee Hazardous Waste Management Act of 1977, TCA Section 68-212-101, requires the Division of Solid Waste Management (DSWM) to identify and regulate hazardous waste generators, hazardous waste treatment storage and disposal facilities, and hazardous waste transporters. Hazardous waste generators are categorized into three groups: large quantity generators (LQG); small quantity generators (SQG); and conditionally exempt small quantity generators (CESQG). The numbers for each generator status are listed in Table 1.

Transporters of hazardous waste are required to obtain a permit if they drop off or pick up hazardous waste in the State of Tennessee. The DSWM permits and tracks both in state and out of state transporters that operate or reside in Tennessee. Other states require an EPA ID for such a transporter (just as Tennessee requires out of state transporters to have an EPA ID from their home state). An effort is made to check transporters against other data- bases, particularly US DOT web sites.

**Table 1: Number and Type of Hazardous Waste Handlers/Generators**

| # OF FACILITIES | HAZARDOUS WASTE ACTIVITY                               |
|-----------------|--------------------------------------------------------|
| 2,274           | Conditionally Exempt Small Quantity Generators (CESQG) |
| 544             | Small Quantity Generators (SQG)                        |
| 473             | Large Quantity Generators (LQG)                        |
| 9               | TSD Active Generators                                  |
| 51              | Active TSD Facilities                                  |
| 277             | Hazardous Waste Transporters                           |
| 35              | Hazardous Waste Transfer Facilities                    |
| 85              | Used Oil Transporters                                  |
| 35              | Used Oil Transfer Stations                             |

Note: Data queried from local database some data values may change slightly as adjustments and audits are completed. CESQG count based on EPA database RCRAInfo. Used oil count based on EPA database RCRAInfo.

## **Hazardous Waste Generated, Received, and Shipped in the State of Tennessee**

Hazardous waste generated in the state of Tennessee is separated into two distinct categories, wastewaters and non-wastewaters. Wastewaters are defined using the following handling codes: H03 Released onsite directly to publicly owned treatment works (POTW); H06 onsite wastewater treatment unit; H07 onsite elementary neutralization. All other waste is determined to be a non- wastewater.

**Table 4a: Wastewater vs. Non-wastewater Generated in Tennessee**

|                                       | <b>POUNDS</b>  | <b>TONS</b> |
|---------------------------------------|----------------|-------------|
| Total Amount of Wastewater            | 84,907,242,126 | 42,453,621  |
| Total Amount of Waste Generated in TN | 84,967,699,085 | 42,483,849  |
| Percent Wastewater of Total           | 99.90%         |             |

**Table 4b: Hazardous Waste Received from Outside of Tennessee Compared to Waste Generated and Transported within Tennessee**

|                                             | <b>POUNDS</b> | <b>TONS</b> |
|---------------------------------------------|---------------|-------------|
| Waste Received Outside Tennessee            | 185,892,919   | 92,946      |
| Total Waste Received Within Tennessee       | 206,634,217   | 103,317     |
| Percentage Waste Received from Out of State | 90%           |             |

Note: Data was supplied by Waste Audit on 6/22/2021; 2019 ALR from ALL sources some data values may change slightly as adjustments and audits are completed.

**Table 4c: Hazardous Waste Shipped Out of State Compared to Waste Shipped Within Tennessee**

|                                                     | <b>POUNDS</b> | <b>TONS</b> |
|-----------------------------------------------------|---------------|-------------|
| Total Waste Shipped Offsite for Treatment/ Disposal | 176,224,755   | 88,112      |
| Total Waste Shipped Out of State                    | 147,001,677   | 73,501      |
| Percentage Shipped Outside of TN                    | 83%           |             |

Note: Data based on local database 6/17/2021 some data values may change slightly as adjustments and audits are completed.

Note: Data queried from internal database and RCRAInfo EPA Hazardous waste information depository Data received and reviewed August 11, 2021 from the Division of Solid Waste Management Enforcement Section.

## RECOMMENDATIONS FOR LEGISLATIVE ACTION TO IMPROVE HAZARDOUS WASTE REGULATORY PROGRAM

The State of Tennessee is authorized by a memorandum of agreement between the State of Tennessee and the United States Environmental Protection Agency, Region 4, to administer the Resource Conservation and Recovery Act Hazardous Waste Program. This agreement is a requirement and condition of State authorization. As the Federal Program changes, the authorized State Program must be revised to remain in compliance with the requirements of 40 C.F.R. Part 271. The State of Tennessee, Division of Solid Waste Management, Hazardous Waste Program prepares updates for stake holder review and Underground Storage Tanks and Solid Waste Disposal Control Board review/approval. Recent Tennessee updates include the generator improvement rule that became effective on May 13, 2021, and the aerosol can rule that became effective on June 3, 2021. The pharmaceutical rule was approved by the Underground Storage Tanks and Solid Waste Disposal Control Board on August 4, 2021 and is expected to become effective in the first part of 2022.
