

Division of Solid Waste Management Hazardous Waste Program

Annual Hazardous Waste Regulatory Program Report Reporting Year 2020

Table of Contents	
Preface	1
The number and type of hazardous waste handlers permitted and/or registered by the Commissioner	3
A list of hazardous waste generators, transporters, and disposal facilities	4
Fees Due, Paid, and Past Due	65
The amount of hazardous waste, by type, generated, transported, treated, stored, and disposed of in Tennessee	66
The number of permit applications received, granted, requested, and pending, by type	67
The number and type of enforcement actions in process and initiated during the reporting period, and the results of such enforcement actions	67
Recommendations for legislative action to improve the hazardous waste regulatory program	68

PREFACE

Pursuant to Tennessee Code Annotated § 68-212-118 the following Annual Hazardous Waste Regulatory Program Report is prepared and submitted on December 1, 2022 for Reporting Year 2020 by the Commissioner of the Department of Environment and Conservation as well as the Underground Storage Tanks and Solid Waste Disposal Control Board. The report evaluates the performance of the State of Tennessee's Hazardous Waste Regulatory Program as stipulated in the Tennessee Code Annotated.

Summary of the State of Tennessee's Hazardous Waste Regulatory Program

The Hazardous Waste Management Regulatory Program regulates activities associated with hazardous waste generation, transportation, storage, treatment, and disposal that are subject to the EPA's Resource Conservation and Recovery Act (RCRA) Subtitle C. The Hazardous Waste Management Program operates under the authority of the Hazardous Waste Management Act of 1977 (TCA §68-212-101 et seq.) and various Hazardous Waste Management rules.

Implementation of Tennessee's Hazardous Waste Program began in October 1980. The Memorandum of Agreement between the State of Tennessee and EPA, Region 4 was signed January 2017. Tennessee has been authorized by EPA to administer the majority of the federal program and receives a grant in support of this effort.

The coordinated state and federal program regulate activities such as:

- The permitting and inspection of hazardous waste storage, recycling, treatment, and disposal facilities.
- The management of hazardous waste from generators (primarily manufacturing industry) through the required waste stream notifications, annual reports, and waste reduction plans.
- The annual registration of hazardous waste transporters; and the regulation of used oil facilities.

Permitted hazardous waste management facilities receive hazardous wastes for treatment, storage, or disposal. These facilities are often referred to as treatment, storage, and disposal facilities, or TSDFs.

Permitted hazardous waste treatment facilities use various processes (such as incineration or oxidation) to alter the character or composition of hazardous wastes.

Some treatment processes enable waste to be recovered and reused in manufacturing settings, while other treatment processes dramatically reduce the amount of hazardous waste.

Permitted storage facilities temporarily hold hazardous wastes until they are treated or disposed of while disposal facilities are the final and permanent destination for hazardous wastes. The most common type of disposal facility is a landfill, where hazardous wastes are disposed of in carefully constructed units designed to protect groundwater and surface water resources.

The detailed regulations located in Tennessee Rules 0400-12-01-.06, 0400-12-01-.07, and 0400-12-02 ensure that TSDFs operate safely and protect human health and the environment. Facilities that currently or plan to treat, store, or dispose of hazardous wastes must obtain a RCRA permit using the procedures outlined in Rule 0400-12-01-.07 or 0400-12-02. A RCRA permit is a legally binding document that establishes operating requirements and provisions specific to the permit applicant, depending on the treatment, storage, or disposal activities conducted at the facility. Permits are written to address the specific geography of the facility, the types of hazardous waste management units, and the specific waste streams that will be managed at the facility. The permit also outlines facility design and operation, lays out safety standards, and describes activities that the facility must perform, such as monitoring and reporting. Permits typically require facilities to develop emergency plans, train employees to handle hazards, perform the requirements of the permit such as groundwater monitoring in addition to providing financial assurance.

Data Collection

Handlers and generators of hazardous waste are required to notify the state of their activity pursuant to the Hazardous Waste Management Regulations Chapter 0400-12-01 et seq. Completed forms are required to be submitted by March 1st each year detailing their hazardous waste activity for the previous calendar year, frequently referred to as the "Report Year."

REPORTING PERIOD	MUST BE POST- MARKED BY	PRELIMINARY DATA IS KEYED BY	AUDIT AND FINAL DATA ENTRY
January 1, 2020 - December 31, 2020	March 1, 2021	December 2021	September 2022

Hazardous Waste Handlers Permitted or Registered by the Commissioner

The Tennessee Hazardous Waste Management Act of 1977, TCA Section 68-212-101, requires the Division of Solid Waste Management (DSWM) to identify and regulate hazardous waste generators, hazardous waste treatment storage and disposal facilities, and hazardous waste transporters. Hazardous waste generators are categorized into three groups: large quantity generators (LQG); small quantity generators (SQG); and conditionally exempt small quantity generators (CESQG). The numbers for each generator status are listed in Table 1.

Transporters of hazardous waste are required to obtain a permit if they drop off or pick up hazardous waste in the State of Tennessee. The DSWM permits and tracks both in state and out of state transporters that operate or reside in Tennessee. Other states require an EPA ID for such a transporter (just as Tennessee requires out of state transporters to have an EPA ID from their home state). An effort is made to check transporters against other data- bases, particularly US DOT web sites.

Table 1: Hazardous Waste Handlers/Generators

# OF FACILITIES	HAZARDOUS WASTE ACTIVITY
631	Conditionally Exempt Small Quantity Generators (CESQG)
505	Small Quantity Generators (SQG)
428	Large Quantity Generators (LQG)
10	TSDF Active Generators
51	Active TSD Facilities
254	Hazardous Waste Transporters
35	Hazardous Waste Transfer Facilities
60	Used Oil Transporters
37	Used Oil Transfer Stations

Note: Data queried from local database some data values may change slightly as adjustments and audits are completed. Some counts have been taken from EPA database RCRAInfo.

Note: Some data values may change slightly as adjustments and audits are completed. This can occur over a period of years. Every attempt is made to obtain the most current data. HW TRANSPORTER MAINT FEE is collected from 2020 all other fees are from January 1 to December 31, 2020. All raw data is received from Fiscal Services and then it is matched to internal documentation which gives the final data used for reporting. Report received from Fees on 3/23/2022.

Hazardous Waste Generated, Received, and Shipped in the State of Tennessee

The Hazardous Waste Generated in the state of TN is separated into two distinct categories, wastewaters and non-wastewaters. Wastewaters are defined using the following handling codes: H03 Released onsite directly to publicly owned treatment works (POTW); H06 onsite wastewater treatment unit; H07 onsite elementary neutralization. All other waste is determined to be a non- wastewater.

Table 4a: Wastewater vs. Non-wastewater Generated in TN

	POUNDS	TONS
Total Amount of Wastewater	79,840,208,562	39,920,104
Total Amount of Waste Generated in TN	86,941,417,423	43,470,709
Percent Wastewater of Total	91.8%	

Note: Data was supplied by Waste Audit on 1/11/2022; 2020 ALR from ALL sources some data values may change slightly as adjustments and audits are completed.

Table 4b: Hazardous Waste Received from Outside of TN Compared to Waste Generated and Transported within TN

	POUNDS	TONS
Total Waste Received Within TN	194,587,866.26	97,294
Waste Received Outside TN	174,599,475.25	87,300
Percentage Waste Received from Out of TN	89.7%	

Note: Data was supplied by Waste Audit on 1/19/2022; 2020 ALR from ALL sources some data values may change slightly as adjustments and audits are completed.

Table 4c: Hazardous Waste Shipped Out of State Compared to Waste Shipped Within Tennessee

	POUNDS	TONS
Total Waste Shipped Offsite for Treatment/ Disposal	151,541,635.15	75,771
Total Waste Shipped Out of TN	122,113,309.94	61,057
Percentage Shipped Outside of TN	81%	

Note: Data was queried from local database 1/19/2022 some data values may change slightly as adjustments and audits are completed.

Table 5: 2020 Number of Permit Applications Received, Granted, Requested, and Pending, by Type

PERMIT TYPE	Start 2020	Received 2020	Final determination 2020	Pending end of 2020
Storage	3	1	0	4
Storage/Treatment	4	0	0	4
Open Burning	0	1	0	1
Combustion (Treatment)	2	0	0	2
Disposal	0	0	0	0
Post-Closure	2	1	1	2
Corrective Action Only	2	1	2	1
TOTAL	13	4	3	14

Note: Received and reviewed 1/13/2022 from the Division of Solid Waste Management's Hazardous Waste Permitting Group.

Table 6: 2020 Number and Type of Enforcement Actions in Process and Initiated During Reporting Period

ORDER TYPE	ORDER COUNT	CLOSED 2020	PENDING IN 2020
Notices of Violation Issued	65	65	0
Warning Letters Issued	9	8	1
Director's Orders Issued	5	5	0
Commissioner's Orders	0	0	0
Permit Appeal	0	0	0
Compliance Agreement	0	0	0
Consent Order	1	0	0

Note: Data queried from internal database and RCRAInfo EPA Hazardous waste information depository
Data received and reviewed 10/8/2021 from the Division of Solid Waste Management Enforcement Section.

RECOMMENDATIONS FOR LEGISLATIVE ACTION TO IMPROVE HAZARDOUS WASTE REGULATORY PROGRAM

The State of Tennessee is authorized by a memorandum of agreement between the State of Tennessee and the United States Environmental Protection Agency, Region 4, to administer the Resource Conservation and Recovery Act Hazardous Waste Program. This agreement is a requirement and condition of State authorization. As the Federal Program changes, the authorized State Program must be revised to remain in compliance with the requirements of 40 C.F.R. Part 271. The State of Tennessee, Division of Solid Waste Management, Hazardous Waste Program prepares updates for stake holder review and Underground Storage Tanks and Solid Waste Disposal Control Board review/approval. Recent Tennessee updates include the generator improvement rule that became effective on May 13, 2021, and the aerosol can rule that became effective on June 3, 2021. The pharmaceutical rule became effective on April 11, 2022.
