Subject: Camden Update 5-9-2017

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Friday 5/5 through Monday 5/8. My previous update covered the period through Thursday 5/4. After this update, I'm going to start issuing weekly updates as there relatively little new information to provide. I expect to issue these weekly updates on Mondays.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Placed additional clay cover on Industrial Waste Cell
- Soil from borrow area placed on Aluminum Processing Waste Cell
- Earthwork on both containment berms complete
 - Geomembrane welding scheduled for this week
- Installed one of two leachate head transducers in Aluminum Processing Waste Cell on 5-5-2017
 - Second Transducer installed 5-8-17
 - Transducer installation work complete
- Watered site roads to minimize dust during clay hauling for interim cap on Industrial Waste Cell
