Attachments: SWMSWP-IDL030000212-EWS Camden-Termination Final-LTTR-20170707-2202.pdf

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 7/1 through Friday 7/7. My previous update covered the period through Friday 6/30.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Continued to treat Industrial Waste Cell leachate
- Performed routine daily gas system and cover operation and maintenance activities
- Repaired erosion from stormwater on the Aluminum Waste Processing Cell
- Replaced two leachate storage tank inlet lines due to partial clogging from deposits
- Performed daily ammonia monitoring
- Completed Industrial Waste Cell sprinkler system installation, system functional
- Continuing site clean-up and housekeeping activities
- Majority of EWS equipment has been removed from site
 - Two pick-up trucks remain to be removed from site
 - No date set for second auction event (for heavy equipment)
- Development of closure design ongoing

One administrative item of note occurred last week. Monday July 3, 2017 was the last day to receive public comments or a request for public hearing on the EWS permit termination. Two comments were received, neither of which impacted the permit termination. No request for public hearing was received. The permit termination notification was signed and dated Friday July 7, 2017 and sent to the EWS bankruptcy trustee by certified mail. The effective date of the termination is either Tuesday July 11th or the day the bankruptcy trustee receives the notification (as demonstrated by the date of the signature on the letter receipt certification), whichever is later. The termination notification can be found on the Dataviewer on the TDEC website. I have also attached a pdf for everyone's convenience.
